#### Health Department

As required by the provisions of the County's paramedic/ambulance franchise agreement with Westmed Ambulance, Inc., on October 20, 2006, the Director of Health formally notified the franchisee (Westmed Ambulance, Inc.) that it is not meeting the contractually required response times in the Salinas Rural Fire Protection District zone. Although technically a breach of contract, this is the only area of the County in which Westmed has not been able to consistently achieve the response time requirements stipulated in the franchise agreement.

The Salinas Rural Fire Protection District zone response area is considered Urban, requiring arrival of an ambulance within 8 minutes, 90% of the time. Due to the size of the response zone, combined with the low call volume (averaging less than two calls per day), geographic dispersal of medical assistance requests has presented a significant challenge to Westmed.

Despite this technical breach, the EMS Agency views the level of service presently provided within the Salinas Rural Fire Protection District, and the County as a whole, to be superior to that provided under the previous contract with American Medical Response. The contractor will have 5 calendar days from receipt of the notice of breach to present a written plan to "cure the breach". The EMS Agency, and officials from the Salinas Rural Fire Protection District, will work with Westmed Ambulance, Inc. to ensure that the appropriate corrective action plan is developed and implemented.
