Dear Mr. Lester,

I am a Monterey Peninsula resident and am very concerned about the impacts of development in the Del Monte forest. I am aware of the findings of the Coastal Commission's Monterey County Local Coastal Program Periodic Review dated December 2003. I vigorously support the findings of the Commission regarding protection of environmentally sensitive habitats, especially Monterey Pine forest, and I believe continuous native stands of trees should be preserved in tact. There are many acres of native forest that are in danger of being cut down or fragmented. We urge the Commission to require protection for the remaining acres of this delicate, precious, and rare resource.

1

We request that the Commission to take into account these comments and the impacts on the surrounding communities when considering development in, and fragmentation of, the Del Monte forest.

Respectfully,
