Monterey County Subdivision Committee Members,

Regarding - Our Local Orchid Must Be Protected as ESHA

Dear Subdivision Committee Members,

I write to insist you protect our highly valued and imperiled local orchid - **Yadon's Rein Orchid.**

As you know this orchid was listed as an Endangered Species in 1998 because its numbers are falling and its habitat is increasingly lost to development of our native Monterey pine forest.

The Coastal Commission Letter on the DEIR (March 22, 2004) states that our Coastal Act is clear - **all species officially listed under either our state or the federal Endangered Species Act are protected as Environmentally Sensitive Habitat Area (ESHA).**

Yet the County DEIR for the Pebble Beach Company development refuses to acknowledge this.

I insist you recommend rejection of this project until County Planning acknowledges this and protects our imperiled local Yadon's Rein Orchid as required by Coastal Act as Environmentally Sensitive Habitat Area.

Thank you,

D. Dilworth
