This lovely and beautifully fragile Orchid is a Federally listed Endangered species as of September 11 1998. Monterey County is well within the range of this species.

Its habitat is almost entirely native Monterey pine forest. its largest populations are in Del Monte Forests' Jeffers' Forest and just East of the Cypress Point Golf Course.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Yadon's (Rein Orchid) Piperia (Piperia yadonii).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a

specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

-
* 645 - YADON'S (REIN ORCHID) PIPERIA (PIPERIA YADONII) HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Yadon's (Rein Orchid) Piperia (Piperia yadonii) Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Yadon's (Rein Orchid) Piperia (Piperia yadonii) Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 648 - SEASIDE BIRD'S BEAK (CORDYLANTHUS RIGIDUS VAR. LITTORALIS).

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Seaside Bird's Beak (Cordylanthus rigidus var. littoralis).

If you claim the document contains proof of no-significant-impact for

this impact please explicitly state the page number and paragraph.

This is a Federally and California listed Endangered species. It grows in the coast ranges of Monterey and Santa Barbara Counties, in closed cone conifer forest, coastal shrub, oak woodland and chapparral on dry sandy soils below 3000 feet ASL.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Seaside Bird's Beak (*Cordylanthus rigidus* var. *littoralis*).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 649 - SEASIDE BIRD'S BEAK (CORDYLANTHUS RIGIDUS VAR LITTORALIS). HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Seaside Bird's Beak (Cordylanthus rigidus var. littoralis) Habitat.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Seaside Bird's Beak (Cordylanthus rigidus var littoralis). Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 650 - TIDESTROM'S LUPINE (LUPINUS TIDESTROMII VAR. TIDESTROMII).

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Tidestrom's Lupine (Lupinus tidestromii var. tidestromii).

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

This is a Federally and California listed Endangered species.
It grows
in coastal dunes on the Monterey Peninsula.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective

(non-subjective) CRITERIA used to determine the impact significance on
Tidestrom's Lupine (Lupinus tidestromii var. tidestromii).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the

equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

-

* 653 - SANTA CRUZ WALLFLOWER (ERYSIMUM TERETIFOLIUM) HABITAT.

The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the project's potential impacts on Santa Cruz Wallflower (Erysimum teretifolium) Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Santa Cruz Wallflower (*Erysimum teretifolium*) Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 654 - SANTA CRUZ TARPLANT (*HOLOCARPA MACRADENIA*).

The Document appears to have ignored this potentially significant impact. Please carefully analyze and disclose the project's potential impacts on Santa Cruz Tarplant (*Holocarpa macradenia*).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

This plant is California listed as Endangered and is a Federally listed candidate species. Sometimes called Santa Cruz Tarweed, it grows along the coast in Monterey, Contra Costa and Santa Cruz Counties.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Santa Cruz Tarplant (*Holocarpa macradenia*).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be

impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

* 656 - MENZIE'S WALLFLOWER.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Menzie's Wallflower.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

This is a Federally and California listed Endangered species as of 1995 (NDDBS). (Erysimum menziesii) It grows in coastal dunes at Pt. Lobos in Monterey County, at Asilomar State park and from Fort Bragg to North of Humboldt bay.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Menzie's Wallflower.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 657 - MENZIE'S WALLFLOWER HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Menzie's Wallflower Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Menzie's Wallflower Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 658 - COASTAL DUNES RATTLEWEED.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Coastal Dunes Rattleweed.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

This is a Federally listed Endangered species. It grows in coastal dunes and scrub along Monterey Bay and San Diego Bay.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Coastal Dunes Rattleweed.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 659 - COASTAL DUNES RATTLEWEED HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Coastal Dunes Rattleweed Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Coastal Dunes Rattleweed Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 660 - MONTEREY BAY (OR SAND) GILIA (ASTRALAGUS TENER VAR. TITI).

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Monterey Bay (or Sand) Gilia (Astragalus tener var. titi).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Sand Gilia is Federally listed as Endangered as of June 22 1992 (57 FR 27858) and California listed as Threatened species. It grows in coastal dunes, scrub and maritime chaparral from Moss Landing to the Monterey Peninsula. Fort Ord may support 50 to 70 percent of its range on some 3757 acres. A small population was found west of Highway One.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Monterey Bay (or Sand) Gilia (Astragalus tener var. titi).

1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
- 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
- 3b. Please quote the definition used.
4. If no measurement units are used please state that clearly.
- 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
- 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.
6. Please quantify the existing or current BASELINE measurement (level) for each criteria.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
9. Please state the variance's MARGINS of ERROR or confidence level.
10. Please state whether this MARGIN of ERROR is measured or assumed.
11. If an average is used, please state which kind of average.
12. Please state the most extreme values which could be encountered.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
15. Please provide a graph of HISTORICAL measurements.
16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20s. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

-
* 661 - MONTEREY BAY (OR SAND) GLIA (ASTRALAGUS TENER VAR TITI). HABITAT.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the project's potential impacts on
Monterey Bay (or Sand) Gilia (Astragalus tener var. titi) Habitat.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Monterey Bay (or Sand) Gilia (Astragalus tener var titi). Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 662 - CONTRA COSTA GOLDFIELDS.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the project's potential impacts on
Contra Costa Goldfields.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

This is a Federally listed Endangered species as of June 18 1997 (62 FR 33029). It was found at Fort Ord on June 1998. FWS Biological Opinion March 99 It occurs in shallow vernal pools and vernal pool margins in open grassy areas of woodland and valley grassland communities.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Contra Costa Goldfields.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 663 - CONTRA COSTA GOLDFIELDS HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Contra Costa Goldfields Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective

(non-subjective) CRITERIA used to determine the impact significance on Contra Costa Goldfields Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
- * 664 - MONTEREY SPINEFLOWER (CHORIZANTHE PUNGENS VAR PUNGENS).
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Monterey Spineflower (Chorizanthe Pungens var Pungens).
- If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.
- This is a Federally listed Threatened species as of Feb 4 1994 (59 FR 5499). Fort Ord may support 75 to 90 percent of its range on some 10,402 acres. Residential development and recreational use have reduced its population.
- QUANTIFICATION OF BASELINES AND IMPACTS:
- This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Monterey Spineflower (Chorizanthe Pungens var Pungens).

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 666 - YADON'S WALLFLOWER (ERYSIMUM MENZIESII SSP YADONII).

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on

Yadon's Wallflower (Erysimum Menziesii ssp Yadonii).

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

This is a Federally and California listed Endangered species as of 1995 (NDDBS). Monterey County is well within the range of this species.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Yadon's Wallflower (Erysimum Menziesii ssp Yadonii).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 667 - YADON'S WALLFLOWER (ERYSIMUM MENZIESII SSP YADONII) HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Yadon's Wallflower (Erysimum Menziesii ssp Yadonii) Habitat.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Yadon's Wallflower (Erysimum Menziesii ssp Yadonii) Habitat.

* 671 - ROBUST SPINEFLOWER HABITAT.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on
Robust Spineflower Habitat.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Robust Spineflower Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 672 - HICKMAN'S ONION (ALLIUM HICKMANII).

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Hickman's Onion (Allium hickmanii).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Monterey County is well within the range of this species.
Global Rank: G2
Calif Native Plants Society List: 1B, CNPS Code: 2-2-3
Listing Status - Federal: Category 1 ("Species of Concern")
Its habitat includes native Monterey pine forest.
"...more than 200 Hickman's Onions [were] present [on the Macomber Estates site in Pebble Beach's Jeffer's Forest in Pescadero Canyon]."
Macomber Estates Final EIR. 1992 p 71

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Hickman's Onion (Allium hickmanii).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal

laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.
3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.
8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.
9. What margin of error do these numbers have?
10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or

specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species
18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

-

* 673 - HICKMAN'S ONION (ALLIUM HICKMANII) HABITAT.

The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the project's potential impacts on Hickman's Onion (Allium hickmanii) Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Hickman's Onion (Allium hickmanii) Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20s. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
24. Please state whether the MARGIN of ERROR is measured or assumed.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
27. Please state whether the MARGIN of ERROR is measured or assumed.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
29. Please list all potential CUMULATIVE impacts related to this one.
30. Please describe all potential CUMULATIVE impacts related to this one.
31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergetic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 674 - HOOKER'S MANZANITA.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Hooker's Manzanita.
- If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.
- Monterey County is well within the range of this species.
Calif Native Plants Society List: 1B
Listing Status - Federal: Category 2
Calif Native Plants Society List: 1A
Its habitat includes native Monterey pine forest.

-

* 676 - COAST BUCKWHEAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Coast Buckwheat.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Smith's Blue Butterfly (*Euphilotes enoptes smithi*) is a Federally listed
Endangered species since June 1 1976 (41 FR 22044).
Monterey County lies
within the center of the natural range of this species.
Monterey County
is well within the range of this species. It has been found at the mouth
of the Salinas River.

This butterfly is a subspecies found in some 25 localities within the
coastal fog belt of Monterey and Santa Cruz Counties. It is found
almost exclusively on two species of wild buckwheat:
Eriogonum
latifolium, which occurs on coastal sand dunes and bluffs,
and *E.*
parvifolium, which occurs on dunes, bluffs, and chaparral-covered
hillsides away from the immediate coast. -Salinas Valley
Saltwater
Intrusion Project DEIR/S Technical Appendices Dec 1990

The butterflies lay their eggs exclusively in the buckwheat species
mentioned above. It is also a food source for the butterfly.
It rarely travels more than 100 yards from its home plant.

"Coast buckwheat (*Eriogonum parvifolium*) was sighted growing on a road
cut on the southwest end of the project site (Macomber Subdivision in
Jeffers Forest in Pescadero Canyon) near Seventeen-Mile Drive."
Macomber Estates Final EIR. 1992 p 71

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Coast Buckwheat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable,
credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it

vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 677 - BIOMASS WEIGHT (OR MASS) LOSS.

The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the project's potential impacts on Biomass Weight (or Mass) Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Biomass "The weight or volume of all living things in a given geographical area. It is a measure of the abundance of life, both plant and animal, that a particular area can support." -Dictionary of Scientific Literacy, 1992

Biomass is "the total mass of all individuals of a species in a given area." from the 1978 textbook "Biological Science, An Ecological Approach."

Please estimate the mass (weight) and volume of the loss of the biomass as a separate impacts.

Please use pounds and kilograms to measure this impact. Alternatively you can use kilograms per hectare or pounds per acre.

Wood can vary in density from 160 (balsa) to 1040 kilograms per cubic meter. Most woods range between 320 to 720 kg/m³ and can vary within a wood species by some 10 percent. Radiata (Monterey) pine has a density of 520 kg/cubic meter. USDA Forest Products Lab, 1996 (28.5 pounds / cubic foot - Dunning 1916)

According to the PG&E Forester for the Monterey Peninsula area, Stuart Craig, a mature Monterey pine typically weighs about 5 tons (ten thousand pounds). A natural Monterey Pine forest can have a tree density of 60 to 400 trees per acre.

Counting trees is not a substitute for measuring or estimating biomass as trees can vary in biomass by more than 2 magnitudes (seedling vs mature tree) in mass.

At 500 kilograms per cubic meter a single Sequoia redwood tree can exceed 750,000 kilograms (1.65 million pounds) in trunk mass alone; a coast redwood tree trunk can exceed 500,000 kilograms (1.1 million pounds); a Douglas fir can reach 175,000 kilograms; a sitka spruce 170,000 kilograms; a western red cedar 250,000 kilograms.

While a typical old growth forest biomass is some 400 tons per acre, an old growth redwood forest can easily have a biomass of 1800 tons per acre and a rainforest contains some 180 tons per acre.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Biomass Weight (or Mass) Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 678 - BIOMASS VOLUME LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Biomass Volume Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Please estimate the mass (weight) and volume of the loss of the biomass as a separate impacts.

Please use cubic feet and cubic meters to measure this impact.

Counting trees is not a substitute for measuring or estimating biomass as tree's biomass can vary by more than a magnitude in volume.

A single Sequoia redwood tree can exceed 1400 cubic meters in trunk volume alone; a coast redwood tree can exceed 1000 cubic meters (trunk volume); a Douglas fir can reach 350 cubic meters; a sitka spruce 330 cubic meters; a western red cedar 500 cubic meters.
"Redwood Forest"
Island Press 1998

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Biomass Volume Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 679 - BIOMASS RESTORATION.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Biomass Restoration.

Developers and loggers typically want to evade dealing with biomass because when they only count the trees lost - they falsely claim they can reasonably mitigate one seedling for every tree cut. To use their own ratio we suggest that for every cubic meter of biomass removed that one cubic meter of living forest be replaced as mitigation; and one ratio we suggest that for every kilogram of biomass removed that one kilogram of living forest be replaced as mitigation.

* 680 - LOSS OF ENERGY CONSERVATION FROM TREES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Loss of Energy Conservation from Trees.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Loss of Energy Conservation from Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 681 - NATIVE TREE PLANTING TO INCREASE ENERGY CONSERVATION.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Native Tree Planting to Increase Energy conservation.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

* 682 - LOSS OF COOLING SHADE FROM TREES.

The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the project's potential impacts on Loss of Cooling Shade from Trees.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"Gaps left by single-tree loggers had less shade and higher peak temperatures (95 degrees vs. 79 degrees) than natural tree falls. Such a change might have a variety of consequences. For example, the researchers found that the higher temperatures attracted heat-loving lizards. These predators sunbathe and then lunch in the surrounding forest. More sunny spots - and more lunching lizards-might threaten both their prey and competitors." Vitt, Conservation Biology, June 1998 reported in Science News June 20, 1998

Trees provide significant areas of shade which prevent heating of soils and their drying. Dry soils do not support some native species of plants and microorganisms and can support invasive plants.

The amount of shade a tree provides can be measured in square feet at noon.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Loss of Cooling Shade from Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 683 - NATIVE TREE PLANTING TO INCREASE COOLING SHADE.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Native Tree Planting to Increase Cooling Shade.

Trees cast shadows and emit water vapor which cools the air underneath and seeping out with the wind.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

* 684 - TREE REMOVAL CAUSING HUMIDITY LOSS IN DRY CLIMATES.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Tree removal Causing Humidity Loss in Dry Climates.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Trees cast shadows and emit water vapor which cools the air and humidifies it.

Labware Direct (1 800 356 0783) sells humidity detection systems measuring concentrations as low as 0.1% with +/- 2% accuracy.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Tree removal Causing Humidity Loss in Dry Climates.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 685 - LOSS OF NIGHTTIME WARMING INSULATION FROM TREES.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on
Loss of Nighttime Warming Insulation from Trees.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Loss of Nighttime Warming Insulation from Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 686 - LOSS OF WIND PROTECTION FROM TREES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Loss of Wind Protection from Trees.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Trees and forests can dramatically reduce wind speed at ground level
compared with the same area devoid of trees.

"[The wind] can be screaming above an old growth forest and almost silent inside." says Dennis Thompson, professor of meteorology at Pennsylvania State U. quoted in Backpacker magazine, Aug 1999, p 29

California Code 4799.07. The Legislature finds and declares that:
(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Loss of Wind Protection from Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows

whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 687 - NATIVE TREE PLANTING TO INCREASE WIND PROTECTION.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Native Tree Planting to Increase Wind Protection.

California Code 4799.07. The Legislature finds and declares that:

(c) Trees play an important role in energy conservation by the modification of temperature extremes, humidity, and winds. This role is particularly important in reducing the amount of energy consumed in heating and cooling buildings and homes, and potentially in producing a local fuel and energy source.

* 688 - SONGBIRD HABITAT LOSS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Songbird Habitat Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Code 4799.07. The Legislature finds and declares that:

(e) Trees also help reduce noise, provide habitat for songbirds and other wildlife, reduce surface runoff and protect urban water resources, and enhance the aesthetic quality of life in the city.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Songbird Habitat Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 689 - NATIVE TREE PLANTING TO INCREASE SONGBIRD HABITAT.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of
Native Tree Planting to Increase Songbird Habitat.

California Code 4799.07. The Legislature finds and declares that:

(e) Trees also help reduce noise, provide habitat for songbirds and other wildlife, reduce surface runoff and protect urban water resources, and enhance the aesthetic quality of life in the city.

* 690 - SURFACE RUNOFF PROTECTION LOSS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on
Surface Runoff Protection Loss.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

California Code 4799.07. The Legislature finds and declares that:

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 693 - NATIVE TREE PLANTING TO INCREASE AESTHETIC ENHANCEMENT.**

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Native Tree Planting to Increase Aesthetic Enhancement.

California Code 4799.07. The Legislature finds and declares that:

(e) Trees also help reduce noise, provide habitat for songbirds and other wildlife, reduce surface runoff and protect urban water resources, and enhance the aesthetic quality of life in the city.

*** 694 - MORE TREES LOST THAN REPLACED.**

The Document appears to have ignored this potentially significant impact.

Please carefully analyze and disclose the project's potential impacts on More Trees Lost than Replaced.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

Growing conditions in urban areas for trees and associated plants have worsened so that many California cities are now losing more trees than are replaced. Even when 5 trees are planted for every one that is cut down, the total number of trees declines.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on More Trees Lost than Replaced.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 695 - LOSS OF PSYCHOLOGICAL LINK WITH NATURE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Loss of Psychological link with Nature.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Code 4799.07. The Legislature finds and declares that:
(a) Trees serve as a vital resource in the urban environment and as an important psychological link with nature for the urban dweller.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Loss of Psychological link with Nature.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 696 - NATIVE TREE PLANTING TO IMPROVE PSYCHOLOGICAL LINK WITH NATURE.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Native Tree Planting to Improve Psychological link with Nature.

California Code 4799.07. The Legislature finds and declares that:
(a) Trees serve as a vital resource in the urban environment and as an important psychological link with nature for the urban dweller.

-

* 697 - LOSS OF OLD TREES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Loss of Old Trees.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Not infrequently, environmental consultants fail to recognize the ecological value of old trees, dead trees, snags, and fallen trees.

Dead standing trees, called snags, provide habitat for many animals that do not live in fallen trees.

"Dead trees are so important to the functioning of forest ecosystems that Maine wildlife biologist Mac Hunter devoted an entire chapter to the subject in his recent book "Wildlife, Forests, and Forestry: Principles of Managing Forests for Biological Diversity. Snags create important habitat for many species of birds, insects and mammals. Cavity nesting species such as woodpeckers and nuthatches help control insects (e.g. bark beetles) that could cause significant tree mortality if unchecked. Owls and aAmerican Kestrels, which often live in cavities created by woodpeckers, help control prolific small mammals that could wipe out conifer seeds and severely reduce regeneration." Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House

The following is taken verbatim from an EIR by EMC Planning Group of Monterey, CA describing a rare native forest of Monterey pines in Pebble Beach, California -

"A large stand of mature to OVER-mature Monterey pine (Pinus radiata) trees dominate the site." "There are several large, dead, standing trees as well as fallen trees, decaying stubs, and snags present on the project site. They are not the result of disease or insect damage but the effects of old age. '... many Monterey Pine seedlings, saplings and poles suffer from overcrowding or the effects of competing understory vegetation during the establishment phase. Notwithstanding this overall characterization, many individual trees are healthy and vigorous."

How extraordinarily wonderful. Trees dying from old age. This is a description of a healthy living, natural forest. Not many people alive today have ever seen one.

According to the United Nations Food and Agricultural Organization the entire continent of Europe doesn't have a single native, natural forest left, yet this writer's words and tone clearly intends for the reader to consider this healthy natural forest as something like a run down car or house.

This is the viewpoint of a forester, not an ecologist. A forester wants a vigorous, young tree farm where trees don't have to compete with any other vegetation. Foresters don't like old trees because the wood might have decay and they darned sure like snags because you cant turn them into lumber.

It is important to note that "over-mature" cannot be found in an ecology or biology textbook because it is solely a forester's term.

Please tell us the number and percentage of mature and "over-mature" trees.

Please define over-mature in context with a healthy forest.

Please define overcrowding.

Please explain clearly what harm happens in an overcrowded ecosystem.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Loss of Old Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 698 - LOSS OF SNAGS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Loss of Snags.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Not infrequently, environmental consultants fail to recognize the ecological value of old trees, dead trees, snags, and fallen trees.

Snags provide habitat for many animals that do not live in old trees, or fallen trees.

"Dead trees are so important to the functioning of forest ecosystems that Maine wildlife biologist Mac Hunter devoted an entire chapter to the subject in his recent book "Wildlife, Forests, and Forestry: Principles of Managing Forests for Biological Diversity. Snags create important habitat for many species of birds, insects and mammals. Cavity nesting species such as woodpeckers and nuthatches help control insects (e.g. bark beetles) that could cause significant tree mortality if unchecked. Owls and aAmerican Kestrels, which often live in cavities created by woodpeckers, help control prolific small mammals that could wipe out conifer seeds and severely reduce regeneration." Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Loss of Snags.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 699 - LEAVE SNAGS STANDING.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of
Leave Snags Standing.

Dead standing trees, called snags, provide habitat for many animals that do not live in fallen trees.

"Dead trees are so important to the functioning of forest ecosystems that Maine wildlife biologist Mac Hunter devoted an entire chapter to the subject in his recent book "Wildlife, Forests, and Forestry: Principles of Managing Forests for Biological Diversity. Snags create important habitat for many species of birds, insects and mammals. Cavity nesting species such as woodpeckers and nuthatches help control insects (e.g. bark beetles) that could cause significant tree mortality if unchecked. Owls and aAmerican Kestrels, which often live in cavities created by woodpeckers, help control prolific small mammals that could wipe out conifer seeds and severely reduce regeneration." Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House

* 700 - LOSS OF FALLEN TREES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Loss of Fallen Trees.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

Not infrequently, environmental consultants fail to recognize the ecological value of old trees, dead trees, snags, and fallen trees.

Fallen trees provide habitat for many animals that do not live in old trees, or Snags.

After a tree falls it becomes home to other insects, bacteria, and animals. It decomposes to become food for the rest of the forest.

"Dead trees are so important to the functioning of forest ecosystems that Maine wildlife biologist Mac Hunter devoted an entire chapter to the subject in his recent book "Wildlife, Forests, and Forestry: Principles of Managing Forests for Biological Diversity. Snags create important habitat for many species of birds, insects and mammals. Cavity nesting species such as woodpeckers and nuthatches help control insects (e.g. bark beetles) that could cause significant tree mortality if unchecked. Owls and aAmerican Kestrels, which often live in cavities created by woodpeckers, help control prolific small mammals that could wipe out conifer seeds and severely reduce regeneration." Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Loss of Fallen Trees.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 701 - OVERCROWDED SEEDLINGS.

This is an impact normally caused by misinformed mitigation.

Typical Mitigation for forest logging includes planting seedlings.

What is the density (seedlings per hectare or per acre) that seedlings

will be planted?

What percentage of the seedlings will survive to become a mature tree?

What is the density (seedlings per hectare or per acre) of the seedling species when they become mature and then old?

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
Overcrowded Seedlings.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
Overcrowded Seedlings.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
Overcrowded Seedlings.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: Overcrowded Seedlings.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY
Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
Overcrowded Seedlings.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
Overcrowded Seedlings.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 702 - ONE TO ONE SEEDLING PLANTING MITIGATION.

A typical mitigation for forest removal includes planting seedlings on a one-to-one basis for each tree killed and removed. This is more than 99 percent non-mitigation.

First, it almost wholly ignores the loss of biomass in volume and mass.
Second, it assumes that planting seedlings somewhere they don't now live will be self-sustainable.
Third, if the seedlings will be planted where they do live now, it assumes that the density of trees and seedlings is less than normal.

Typically -

- 1) there is no map of the seedling planting location.
- 2) there is no analysis of impacts of planting seedlings at the proposed location.
- 3) there is no evidence that the proposed location can sustainably support any new trees.
- 4) There is no answer to the question - "If the tree seedlings can sustainably live in the new location, why aren't they living there now?"

So -

- 1) Please provide a map of the seedling planting location.
- 2) Please provide an impact analysis of impacts of planting seedlings at the proposed location.

3) please provide substantial evidence that the proposed location can sustainably support new trees - and how many at what density per acre.

4) Please answer the question - "If the tree seedlings can sustainably live in the new location, why aren't they living there now?"

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
One to One Seedling Planting Mitigation.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
One to One Seedling Planting Mitigation.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
One to One Seedling Planting Mitigation.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: One to One Seedling Planting Mitigation.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
One to One Seedling Planting Mitigation.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
One to One Seedling Planting Mitigation.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 703 - GAP PHASING.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of Gap Phasing.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

There is no evidence that gap phasing mimics any healthy natural forest process. Loggers have claimed that it increases the number of trees in the man-made gaps. The fallacies include that to do so you have to damage a living ecosystem; that you are artificially forcing a higher number of seedlings (not trees) most of which cannot reach maturity - of the trees which already are living.

"Gaps left by single-tree loggers had less shade and higher peak temperatures (95 degrees vs. 79 degrees) than natural tree falls. Such a change might have a variety of consequences. For example, the researchers found that the higher temperatures attracted heat-loving lizards. These predators sunbathe and then lunch in the surrounding forest. More sunny spots - and more lunching lizards-might threaten both their prey and competitors." Vitt, Conservation Biology, June 1998 reported in Science News June 20, 1998

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Gap Phasing.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 704 - FOREST ECOSYSTEM SERVICES LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Forest Ecosystem Services Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"A tree that lives 50 years will contribute services worth \$196,250 within its life span." California Dept of Forestry and Fire Protection quoted in Forest Voice, 1998 Citizens Guide, Native Forest Council.

Temperate/boreal forests provide approx \$300 in Ecosystem services per hectare per year. "The value of the worlds ecosystem services and natural capital" by Costanza et al, Nature 15 may 1997 pg 256

Tropical forests provide approx \$2000 in Ecosystem services per hectare per year. "The value of the worlds ecosystem services and natural capital" by Costanza et al, Nature 15 may 1997 pg 256

Forests provided ecological services on the order of \$300 per hectare per year. Wade Roush, Science May 16 1997 pg 1029

Those services include: Species protection (Think of what it costs to keep an endangered animal alive in a zoo, compared to a native habitat), storm protection, flood control, drought recovery and other aspects of habitat response to environmental variability mainly controlled by

vegetation structure, prevention of loss of soil by wind, runoff or other removal processes, soil formation, nutrient cycling, waste treatment, pollution control, detoxification, atmospheric gas regulation, climate regulation, pollination, dynamic regulation of populations, reduction of herbivory by top predators, habitat for resident and transient populations, food, lumber, fuel and fodder production; medicine products, genes for disease resistance, ornamental species, eco-tourism, sport fishing, and other outdoor activities, aesthetic, artistic, educational, spiritual and scientific values.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Forest Ecosystem Services Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 705 - LOGGING CAUSED BIOMASS LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Logging caused Biomass Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Logging caused Biomass Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 706 - LOGGING CAUSED BIODIVERSITY CHANGE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Biodiversity Change.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Gaps left by single-tree loggers had less shade and higher peak temperatures (95 degrees vs. 79 degrees) than natural tree falls. Such a change might have a variety of consequences. For example, the researchers found that the higher temperatures attracted heat-loving lizards. These predators sunbathe and then lunch in the surrounding forest. More sunny spots - and more lunching lizards-might threaten both their prey and competitors." Vitt, Conservation Biology, June 1998
reported in Science News June 20, 1998

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Logging caused Biodiversity Change.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 712 - LOGGING CAUSED FLOODING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Flooding.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

On January 21, Dean Lucke, Assistant Deputy Director for Forest Practice of the California Department of Forestry (CDF) wrote a letter to John Campbell, president of the Pacific Lumber Company (PL) stating,
"Freshwater and Elk River are experiencing an increased rate of flooding and sedimentation that corresponds with the current cycle of logging in these watersheds. The increase in peak flows following a rainfall event appears to be a cumulative effect of timber harvesting."

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Logging caused Flooding.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable,

credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the

baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 713 - LOGGING CAUSED GROUNDWATER LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Groundwater loss.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

The famous 1960's Hubbard Brook Experiment in New Hampshire by Bormann and Likens found that logging an entire valley has major impacts when compared to a natural valley.

The logged and herbicided valley had a 30 to 40 percent increase in water runoff as compared to the unlogged forest.

The amount of nutrients leaving the untouched natural forest ecosystem by way of the creeks was roughly equal to the dissolved nutrients entering the ecosystem in rain and snow. -Living in the Environment, G. Tyler Miller pg 122

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Logging caused Groundwater loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 714 - LOGGING CAUSED NUTRIENT AND ORGANIC MATTER DEPLETION.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Nutrient and Organic Matter Depletion.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

The famous Hubbard Brook Experiment in New Hampshire by Bormann and Likens found that logging an entire valley has major impacts when compared to a natural valley.

The logged and herbicided valley had six (6) to eight (8) times the loss

of minerals in the unlogged forest.

The logged and herbicided valley had 60 fold increase in Nitrate ion loss as opposed to the unlogged forest.

The logged and herbicided valley had six fold increase in Calcium ion loss as opposed to the unlogged forest.

The logged and herbicided valley had 15 fold increase in Potassium ion loss as opposed to the unlogged forest.

So much nitrogen was lost from the experimental valley the overfertilized stream below became covered with populations of cyanobacteria and algae.

The amount of nutrients leaving the untouched natural forest ecosystem by way of the creeks was roughly equal to the dissolved nutrients entering the ecosystem in rain and snow.
-Living in the Environment, G Tyler Miller pg 122

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Logging caused Nutrient and Organic Matter Depletion.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 717 - LOGGING CAUSED FRAGMENTATION.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Fragmentation.
- If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Logging caused Fragmentation.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 718 - LOGGING CAUSED INCREASED EDGE EFFECTS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Logging caused Increased Edge Effects.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Logging caused Increased Edge Effects.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

* 720 - LOGGING CAUSED LOSS OF COOLING SHADE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Logging caused Loss of Cooling Shade.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Gaps left by single-tree loggers had less shade and higher peak temperatures (95 degrees vs. 79 degrees) than natural tree falls. Such a change might have a variety of consequences. For example, the researchers found that the higher temperatures attracted heat-loving lizards. These predators sunbathe and then lunch in the surrounding forest. More sunny spots - and more lunching lizards-might threaten both their prey and competitors." Vitt, Conservation Biology, June 1998
reported in Science News June 20, 1998

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Logging caused Loss of Cooling Shade.

1b. If no objective criteria are used please state that clearly.

*** 722 - LOGGING CAUSED REDUCED PRODUCTIVITY AND INCREASE OF NON-NATIVE SPECIES.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on

Logging caused Reduced productivity and increase of non-native species.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Logging caused Reduced productivity and increase of non-native species.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 723 - FOREST LOSS.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Forest Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Dr. Robert Repetto, senior economist at the World Resources Institute, a Washington research organization, calculated the "loss of value from [Indonesian] deforestation was four times as high as the value of timber extracted." New York Times, Science Times Tuesday May 20, 1997

Logging Impacts
The harmful negative effects of logging include: Loss of biomass, loss of biodiversity, loss of species and habitat, soil damage, soil compaction, erosion, landslides, nutrient and organic matter depletion, silting of creeks, increased edge effects, fragmentation, loss of vertical diversity, loss of cooling shade, increase in soil exposure to sun and attendant leaching increase, acidification, loss of nitrogen,

toxic runoff from petroleum products in asphalt roads, dust covering plants from dirt roads, reduced productivity and increase of non-native species and all of the above's cumulative contribution to loss of forest quality.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Forest Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 724 - FOREST ECOSYSTEM LOSS.

The Document appears to have ignored this potentially significant Impact.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 726 - FOREST EDGE EFFECT INCREASE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Forest Edge Effect Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Edge habitats have been well-demonstrated to differ from core habitats in several ecological systems." US-FWS Marbled Murrelet 1997

Edge Effects & Weather
"Edge effect" describes how trees at a new edge of a forest, where trees have been cut for timber or roads or subdivisions, are exposed to much higher wind gusts - which knocks them over prematurely, and erosion which exposes roots, and loss of wildlife and biodiversity necessary to sustain a healthy forest.

Forests near induced edges, for example, may have a higher density but lower diversity of birds than the interior forest. A number of studies have shown increased predation of songbird and quail eggs near forest edges. The predation is worst near developed areas (which might have unnaturally high populations of cats, raccoons, skunks, jays an crows)."
- Mitch Lansky "Beyond the Beauty Strip"

There are three kinds of edge effect simply described: 1) trees cut in a forest, 2) roads cut in a forest, 3) Urban development next to a forest.

Please identify by mapping which of each of these effect exist now and how they will change if the project is approved.

Please identify and map the length of each edge of forest and the amount of forest affected by different impacts such as barking dogs, dogs running loose, lights from homes, noise from roads.

Please identify the length of the new edge for each subdivision after the proposed development and map and detail the number of acres that have been lost that were previously unaffected by edge.

Please detail any proposed mitigation of micro-climate (tiny and very local weather) changes near roads and homes.

Please describe the health of the forest when it is reduced to "Islands"

(where there may no longer be any true forest interior).

Please describe the "Edge effects" of rain and heightened erosion on the remaining trees after the forest is cut down.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Forest Edge Effect Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 727 - FOREST LOSS FROM WINDTHROW.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Forest loss from Windthrow.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Windthrow occurs when trees are knocked down by wind and killed because of the removal of a forest's natural soft edges and the creation of sharp man-made edges to a forest. The sharp man-made edges of a forest and loss of the soft natural edge of a forest is typically caused by logging, road building or clearing for buildings. In a natural forest the canopy and trunks of a forest are sheltered from direct impact of high winds.

Windthrow is an indirect but real and predictable impact which kills more trees than those which are logged.

"Windthrow can knock down Monterey pines from 300 meters to a mile from a newly cut edge of a forest." - Prof William Libby, UC Berkeley
Professor Emeritus Forest Genetics - personal contact 1995.

"The approximately 9 acres of native Monterey pine forest to be cleared for the golf course represents a substantial long-term impact. Additional loss of trees is likely to result from 'windthrow', as the cleared area behind the first rank of trees is roughly perpendicular to the site's strong prevailing winds." - Monterey County's Spanish Bay Project Final approval 1984 pg 25.

Please quantify and map the areas expected to experience forest loss from windthrow in addition to that caused by planned tree cutting.

Please describe the "Edge effects" of wind on the remaining trees after the proposed forest cutting is finished.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Forest loss from Windthrow.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 728 - MICROBIOTIC CRUSTS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Microbiotic Crusts.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

SOIL MICROBIOTIC CRUSTS ECOSYSTEM VALUES

Belnap, Jayne 1990 Microbiotic Crusts: Their Role In Past and Present Ecosystems Park Science: a Resource Management Bulletin

Soil microbiotic crusts have a large role in maintaining healthy soils, especially in the arid west. Microbiotic soil crusts help stabilize soils, trap and hold soil nutrients thus enriching the soil, fix atmospheric nitrogen to again enrich the soils, and colonize disturbances such as lava flows first. Human activities and uses such as grazing can seriously damage these crusts.

Fletcher, J.E. and Martin, W.P. 1948 Some effects of algae and molds in the rain-crust of desert soils, Ecology 29:95-100

Soil crusts are found to help stabilize the soil, improve infiltration, decrease erosion, and aid in the establishment of seedlings in desert environments. These crusts demonstrate an increase in soil organic content of up to 300%, and increases in soil nitrogen content of up to 400%, where crusts are highly developed. Nostoc algae, a nitrogen fixer, was present where the largest increases in soil nitrogen were found.

Brotherson, J.D. and Rushforth, S.R. 1983 Influence of Cryptogamic Crusts on Moisture Relationships of Soils in Navajo National Monument, Arizona, Great Basin Naturalist 43(1): 73-78

Cryptogamic crusts were found to increase the depth of water penetration

into the soil, decrease runoff, and lower water infiltration rates into the soil. These crusts are thought to be as important in desert ecosystems for their role in water conservation as for their role in reducing erosion.

Loope, W.L. and Gifford, G.F. 1972 Influence of a soil microfloral crust on select properties of soils under pinyon-juniper in southeastern Utah, Journal of Soil and Water Conservation :164-167

Cryptogamic crusts are found to decrease soil permeability, especially when irrigated, and increase soil infiltration rates. Sedimentation production also tends to increase once crusts have been disturbed.

Jeffries, D.L., Klopatek, J.M., Link, S.O., and Bolton, H. Jr. 1992 Acetylene reduction by cryptogamic crusts from a blackbrush community as related to resaturation and dehydration, Soil Biology and Biochemistry 24:1101-1105

Study of rates of nitrogen fixation in cryptogamic crusts in ungrazed, lightly, and heavily grazed areas of blackbrush community. Cryptogamic crusts fix a significant amount of nitrogen in these communities. Moderate and heavy grazing significantly reduces the amount of nitrogen fixed, and this could be the reason why grazed areas show such long recovery times in this community.

GRAZING HARM TO SOIL MICROBIOTIC CRUSTS Hogan, David 1994 Cryptogamic Doomsday, Wild Earth

The argument is made that cryptogamic crusts are essential to the stability of western arid ecosystems. It is also noted that livestock grazing is the single largest factor in the destruction of these soil crusts. It is recommended that grazing be stopped on all arid western lands.

Anderson, D.C., Harper, K.T., and Rushforth, S.R. 1982 Recovery of Cryptogamic Soil Crusts from Grazing on Utah Winter Ranges Journal of Range Management 35(3):355-359

(From the conclusion:) "Our data demonstrated that cryptogamic cover is severely reduced by domestic grazers. Both the number of cryptogamic species and their contribution to the total cover suffer under the hooves of grazing animals." Cryptogamic soil organisms were found not to compete with or affect numbers of vascular plants in the area.

Kleiner, E.F., and Harper, K.T. 1977 Soil properties in relation to cryptogamic groundcover in Canyonlands National Park, Journal of Range Management 30(3):202-205

Study of two areas, one never grazed, one continuously grazed lightly in winter for decades and stopped five years previous. Cryptogamic cover

was significantly higher in the protected area. Soil nitrogen and phosphorous were also higher in the protected area, as was the amount of organic litter. Analysis points to grazing as the cause of the loss of the cryptogamic crust and other vegetational differences between the two areas.

Beymer, R.J., and Klopatek, J.M. 1992 Effects of Grazing on Cryptogamic Crusts in Pinyon-Juniper Woodlands in Grand Canyon National Park, American Midland Naturalist 127:139-148

Cryptogamic crusts demonstrate a significant decline in presence and biomass from grazing pressures. Reduction in the percent cover of cryptogamic soils crusts also correlates with a reduction in cover for the dominant grass species (mutton grass), which is preferred by cattle. Recommends grazing decisions and policy consider cryptogamic soil crusts as an indicator of ecosystem condition.

Brotherson J.D., Rushforth, S.R., and Johansen, J.R. 1983 Effects of Long-term Grazing on Cryptogam Crust Cover in Navajo National Monument, Arizona, Journal of Range Management 36(5):579-581

Cryptogamic crusts were compared in areas grazed and areas removed from grazing for forty years. Grazing was found to significantly lower the cover values of cryptogamic species. Mosses and lichens are more heavily impacted than algae. Authors recommend grazing policies be modified to manage for and encourage cryptogamic crust formation and maintenance.

Dunne, J. 1989 Cryptogamic soil crusts in arid ecosystems, Rangelands 11:180-182

This article gives a description of the role of cryptogamic crusts in arid ecosystems. Noted are the importance of these crusts for reducing erosion and soil stabilization, and nitrogen fixing. Other research quoted has shown these crusts are seriously harmed by grazing, and a removal of cattle causes a slow recovery of the crusts, with a resulting lowering of erosion, sedimentation and an increase rate of infiltration. The report concludes that range managers have yet to address issues of cryptogamic soil protection in livestock management plans or policies.

Johansen, J.R. and St. Clair, L.L. 1986 Cryptogamic soil crusts: recovery from grazing near Camp Floyd State Park, Utah, USA, Great Basin Naturalist 46(4):632-640

Comparisons are made between cryptogamic crusts in an area protected from grazing for seven years and an area protected from grazing for twenty years. Although for algae, the sites were similar in terms of degree of crusting, significant differences in major group frequencies

were found, with the more recently grazed site having a lower algal frequency. Moss and lichen communities had significantly less cover and diversity in the more recently grazed areas than in the area protected for twenty years. Recovery of the more recently grazed site was deemed to be as yet incomplete.

Lesica, P. and Shelley, J.S. 1992 Effects of cryptogamic soil crust on the population dynamics of *Arabis fecunda* (Brassicaceae), American Midland Naturalist 128:53-60

Cryptogamic soil crusts increase survival for juvenile and adult *Arabis fecunda* plants. Due to its small seed size, this may be more beneficial to the plant than increased germination. Although cattle do not eat the plant, trampling damage to the plant and to the crust is likely to lower the distribution of this already rare plant.

Jeffries, D.L. & Klopatek, J.M. 1987 Effects of Grazing on the Vegetation of the Blackbrush Association, Journal of Range Management Vol. 40 (5): 390- 392.

In ungrazed fields densities of microtine prey were significantly higher than in mowed or mowed-grazed fields. Similar results to Kunkle and Meiman (1968). Riparian zones important; water, easy terrain, cover, microclimate and palatable forage. This attracts wildlife, livestock and people - road location, creation, water use, mining. Unwise reduction in cover of other species. Recovery of cryptogamic soil crusts was virtually nonexistent on the protected site, even after 6 years of above average rainfall.

Anderson, D. C., Harper, K. T., and Holmgren, R. C. 1982 Factors Influencing Development of Cryptogamic Soil Crusts in Utah Deserts Journal of Range Management 35(2):180-185

Grazing by sheep was found to reduce the area covered by and the diversity of species found in cryptogamic soils. Cryptogamic soil formation was found to be dependent on the physical properties of the soils. Cryptogamic soils exert a widespread influence to stabilize soils where they occur. Grazing during the dry season may cause damage to the cryptogamic crust that prevents the re-establishment of necessary algal species. The authors conclude: "Pragmatically, any domestic grazing use may prove to be incompatible with highly developed cryptogamic crusts such as those occurring in Virginia Park of Canyonlands National Park.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Microbiotic Crusts.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows

whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 729 - INABILITY OR FAILURE TO ENFORCE CONDITIONS OF APPROVAL.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Inability or Failure to Enforce Conditions of Approval.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

According to Dale Ellis, Monterey County Code Enforcement Supervisor at a Carmel Valley Town Hall meeting Aug 30 1999, the County approves some 300 Discretionary permits per year and each permit has an average of 25 conditions. This is some 7,500 NEW conditions every year and some 75,000 conditions approved for the past decade.

Mr. Ellis also stated at that public meeting that his office gets some 350 complaints of condition violation per year and that his office
"Doesn't come close to dealing with all of them."

CEQA Section 21081.6(b) states
"A public agency SHALL provide that measures to mitigate or avoid significant effects on the environment are FULLY ENFORCEABLE...."

My dictionary defines "enforce" as "able to impose performance."
1) All conditions must have a numeric goal and a completion date.

Non Quantified Mitigations and Conditions can not be enforced.

When a condition has no numeric, or completion date, performance goals it is not possible to objectively, or judicially, determine whether the goal has been achieved. This makes that condition unenforceable failing the CEQA Section 21081.6b mandate.

2) Monterey County has no process or method of tracking or enforcing conditions of project approval.

a. The 1997 Monterey County Grand Jury reports found that Monterey County Planning can not provide any evidence of a method or ability to merely MONITOR condition compliance on a development project after they are approved, let alone enforce conditions.

Grand Jury report Jan 5 1998 pg 36 (Recommendation 5):
"The [Planning and Building Inspection Department] develop a system for keeping track of and reporting on a regular basis how long it takes from the time a ... complaint is filed until the matter is settled."

b. The County has no place to look up an approved project's conditions and whether each condition has been met or not.

Grand Jury report Jan 5 1998 pg 36 (Recommendation 6):
"The [Planning and Building Inspection Department] accept the responsibility and devise a careful system for making sure that all conditions imposed on a building permit or subdivision permit are, in fact, fully met."

Lacking a system of tracking condition compliance, Monterey County can not reasonably assert that any conditions will be met.

3) Monterey County has repeatedly failed to enforce conditions of approval.

a. The 1997 Monterey County Grand Jury reported that the Rancho Chualar 1 Project did not fulfill its conditions of approval EVEN THOUGH THE COUNTY SIGNED OFF ON A LEGAL DOCUMENT THAT THEY HAD.

Grand Jury report Nov 25 1997 pg 6:
"There is no evidence that the county made any attempt to verify, by inspection, that the conditions in fact have been met [for Rancho Chualar 1]. THERE IS CLEAR EVIDENCE THAT SOME OF THE CONDITIONS HAVE NOT BEEN MET [FOR RANCHO CHUALAR 1]."

Grand Jury report Nov 25 1997 pg 6:
"... the County has already agreed that the developer has met all the commitments of [Rancho Chualar 1]."

b. Grand Jury report Jan 5 1998 pg 34 (4c):
"A subdivision was approved and constructed, but the plans for complying with the special conditions of approval were not provided for a year after the construction of the subdivision was begun. MUCH of the work to comply with the CONDITIONS OF APPROVAL REMAINS UNDONE TO THIS DAY, YEARS AFTER THE SUBDIVISION WAS COMPLETE AND OCCUPIED."

c. In 1994 when I asked about the status of a 1984 project's conditions (Pebble Beach's Spanish Bay), a project Planner told me "We don't have a list of the conditions and so we can't tell you whether they've been completed."

d. In Fall 1997 when I tried to find the list of conditions for Markham Ranch Phase 3, I was told by Planning Department staff (several times)
"We can't find the Markham Ranch Phase 3 file (at all). All we have is the file on Phases 1 and 2." In addition I was told "There is no planner in charge of that project." Whatever the reasons are for failing to enforce conditions, failing to enforce them shows a pattern of behaviour that is impermissible under CEQA Section 21081.6(b).

e. Two letters to the editor in the March 24, 1998 Monterey County Herald show how County "Planning" arrogantly refuses to make or enforce

adequate runoff mitigation conditions on a project in Carmel Valley.

d. In Fall 2002, Monterey County approved 2.5 miles of illegal bulldozing after-the-fact by the Kleisners that seriously damaged steelhead and red-legged frog habitat in Joshua and Garrapata Creeks in Big Sur.

e. Also in Fall 2002, Monterey County approved the Investmark development even though they had twice done heavy logging after their permit expired.

4) Monterey County removes substantial conditions and zoning, quietly, without meaningfully notifying the outraged public.

1. Canada Woods East had a "Permanent Scenic Easement" removed from the land by the Board of Supervisors with no meaningful public notice.

2. Rancho Chualar 1 had a "Permanent Agricultural Conservation Easement" removed with a possibly misleading description as an item on the Board of Supervisors consent calendar. This was five years after the condition was imposed on the project. Project opponents were not notified.

5) Conditions must be Citizen Enforceable. In order to be fully enforceable, a developer's failure to perform conditions must be able to be brought by a citizen before a judge.

When Monterey County has the authority to enforce mitigation conditions and they, however accidentally or neglectfully fail to, or chose not to monitor or enforce a condition, that condition is not "fully enforced" or fully enforceable.

There is no law allowing citizens to enforce conditions of project approval.

There is no law preventing the County from allowing citizen enforcement of project conditions.

Thus any conditions imposed by Monterey County are not "Fully Enforceable" as required by CEQA Section 21081.6b unless each can be brought by a citizen before a judge.

All of the above is Substantial Evidence showing that Monterey County, for whatever reasons (whether they are incapable of or unwilling to), do not monitor or enforce conditions of project approval to be able to "fully enforce" them.

Thus NO conditions imposed by Monterey County can be reasonably claimed to be "FULLY ENFORCEABLE" as required by CEQA Section 21081.6b unless they contain citizen enforcement provisions.

Until Monterey County can demonstrate an ability to fully enforce conditions of past approvals no new conditions, lacking citizen

enforcement provisions are legal under CEQA Section 21081.6b.

Only when Monterey County can either -
1) increase enforcement to adequately monitor all approved conditions, or
2) stop or reduce approvals to the level of the County's capacity to monitor and enforce all approved conditions can CEQA's 21081.6b requirement be achieved.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inability or Failure to Enforce Conditions of Approval.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 730 - ENFORCABLE CONDITIONS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Enforcable Conditions.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Enforcable Conditions should include -

1. Permits for each potentially harmful activity.
2. For causing harm - A Fine of five times the potential profits.
3. For large harm -
* Large Fine - 10 - 25 times the size of the potential profits, plus
* Lose permit for a year or more.
4. For egregious or second violation -
* Large Fine - 100 times the size of the potential profits, plus
* Lose permit for life.
5. All Equipment is seized and sold.
6. For an extreme or third violation -
* All the above plus
* Jail time.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact
significance of
Enforcable Conditions.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 731 - COMPUTER MODEL DATA AND CONCLUSIONS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Computer Model Data and Conclusions.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

A lot of public policy decisions are now hidden by use of computer models.

The DEIR uses computer models for Air pollution and Noise estimations and calculations.

"The bed fits, not because it is cleverly built to size, but because it cuts off your feet." P. Huber

"Although the precise numbers and realistic pictures produced by computer simulations give an illusion of accuracy, a ravening swarm of assumptions, simplifications, and outright errors lurk beneath."

This "is not the old science fiction cliché of supersmart machines shucking the shackles of humanity, but rather semi-stupid [software] programs placed in positions of responsibility - a kind of digital Peter Principle, in which computers rise to their level of incompetence." -Science, 11, Feb, 2000 Vol 287 pg 960

I often critique computer models when they are used in government studies. My background includes employment as senior design engineer for an English race car manufacturer (Eldon), at least twelve years study of higher math and applied physics and 30 years as a computer scientist - (incidentally I created an award winning software product (in PC Magazine's Editor's Choice Box 1990 - and yet I don't always understand the comic strip B.C. - oh well.) The following quotes are from a standard reference I use. The quoted material is from Prof Stermann of MIT. The narrative and questions are mine.

I find a vast distinction between software for standard commercial purposes and software used to make public policy decisions (Perhaps we should refer to confidential public policy making software as half-vast). Commercial software should and does have absolute copyright protection from reverse engineering. However, software used for making public policy should have no such immunity when its data and processes are secret.

DATA REQUIRED

Skepticism of the computer model results can be valid, but even if wrong, those asserting the results cannot refute your critique unless they disclose their data and process.

INDEPENDENT VERIFICATION IMPOSSIBLE

All results from commercial software (accounting, word processing, spreadsheets, graphics, statistics etc.) can be independently verified much like you can independently verify your grocery shopping receipt. The reason is that although your grocery shopping receipt doesn't often explicitly tell you the method it uses, it does provide you with all the facts (or data). The implication is that only addition, subtraction and multiplication are used in entirely deducible method.

In sharp contrast, because computer models, and especially those used to suggest public policy, are almost always custom made (or task specific), their results cannot be independently verified.

Unless the facts and reasoning used and probably more importantly those not used - are known. Those facts and reasoning are known in the programming world as data, assumptions and procedures.

Because of their typical "black box nature" if a computer model's data, assumptions and procedures are not publicly available for inspection the model author/programmer could give you any science fiction answer, result or conclusion they want. If, as is so common, a public agency relies on the "expert's" conclusions the model's authors could be creating or skewing public policy.

ENVIRONMENTAL PROCEDURES LAWS REQUIRE FACTS

Both the national environmental policy law (NEPA) or your state environmental procedures law (if you have one) require the disclosure of a computer models' data, assumptions and procedures. Most environmental procedures laws require the decision based upon facts and reason and prohibit mere speculation or opinion. If data and reasoning are not disclosed, the conclusions are legally barred because they have no more value than voodoo.

COMPUTER MODELS MISLEADING

From: A Skeptics Guide to Computer Models by Dr. John D. Stermann Westview Press 1991:

"Because computer models are so poorly understood by most people, it is easy for them to be misused, accidentally or intentionally. Thus there have been many cases in which computer models have been used to justify decisions already made and actions already taken, to provide a scapegoat when a forecast turned out to be wrong, or to lend specious authority to an argument."

Computer models are often less than ideal:

"They are so poorly documented and complex that no one can examine their assumptions. They are black boxes."

"They are so complicated that the user has no confidence in their consistency or conclusions."

"They are unable to deal with relationships and factors that are difficult to quantify, for which numeric data do not exist, or that lie outside the expertise of the specialists who built the model."

"No one can (or should) make decisions on the basis of computer model results that are simply presented, "take 'em or leave 'em." In fact, the primary function of model building should be educational rather than predictive."

1) Please avoid computer models unless the models and their documentation are made fully, and without charge, available to the public with specific hearing time set aside for a discussion of each model's value and problems.

The following checklist (courtesy of Prof John Stermann) outlines some of the key questions that should be answered to evaluate the validity of a model and its appropriateness as a tool for solving a specific problem. Please answer the following questions for each computer model used in your document:

Is the model documented?
Is the documentation publicly available?
Can third parties use the model and run their own analyses with it?

How has the model been reconciled with empirical tests?

What specific version of the model is to be used?

How will public notice take place if the model is ever modified - even slightly (e.g. for bug fixes)?

What is the problem at hand?
What problem is addressed by the model?
What problems are not addressed by the model?

What is the boundary of the model?
What factors are endogenous?
What factors are exogenous?
What factors are excluded?
Are soft variables included?
Are feedback effects properly taken into account?
Does the model capture possible side effects, both harmful and beneficial?

What is the time horizon relevant to the problem?
Does the model include as endogenous components those factors that may change significantly over the time horizon?

Are appropriate time delays taken into account?
Are appropriate constraints taken into account?
Are appropriate potential bottlenecks taken into account?

Is the model robust in the face of extreme variations in input assumptions?

How sensitive are the policy recommendations derived from the model to plausible variations in its assumptions?

Are the results of the model reproducible? Or are they adjusted (add factored) by the model builder?

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Computer Model Data and Conclusions.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 732 - TREE CANOPY (VERTICAL DIVERSITY) HABITAT LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Tree Canopy (Vertical Diversity) Habitat Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"A study in Oregon found 66 invertebrate species in an old-growth forest canopy and only 15 in the canopy of a younger forest. Furthermore, few of the species in the young forest were insect predators. This is important because predatory and parasitic species in older forests help check the proliferation of insects that could potentially do widespread damage." (Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House citing Tim Schowalter, "Insects and Old Growth," Forest Planning Canada, Vol 5 1990:5)

This could help explain why old-growth Monterey pine forests seem resistant to Pine Pitch Canker (PPC) while younger and fragmented stands appear more susceptible.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Tree Canopy (Vertical Diversity) Habitat Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 733 - LOSS OF TALL SNAGS FOR BIRD ROOSTING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Loss of Tall Snags for Bird Roosting.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"Dead trees are so important to the functioning of forest ecosystems that Maine wildlife biologist Mac Hunter devoted an entire chapter to the subject in his recent book "Wildlife, Forests, and Forestry: Principles of Managing Forests for Biological Diversity. Snags create important habitat for many species of birds, insects and mammals. Cavity nesting species such as woodpeckers and nuthatches help control insects (e.g. bark beetles) that could cause significant tree mortality if unchecked. Owls and aAmerican Kestrels, which often live in cavities created by woodpeckers, help control prolific small mammals that could wipe out conifer seeds and severely reduce regeneration." Beyond the Beauty Strip, Mitch Lansky 1992, Tilbury House

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Loss of Tall Snags for Bird Roosting.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 734 - FOREST CLEARING ALLOWING OFF-ROAD VEHICLE TRAVEL / PARKING AND SOIL DAMAGE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on

Forest clearing allowing Off-road Vehicle Travel / Parking and Soil Damage.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Forest clearing allowing Off-road Vehicle Travel / Parking and Soil Damage.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 735 - GOWEN CYPRESS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Gowen Cypress.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

This is a Federally listed Threatened species as of August 1998
(Cupressus govenia ssp. govenia). Monterey County is well within the
range of this species.

The proposed equestrian center will directly kill several Gowen
Cypresses. The impacts of horses and increased trail usage will further
degrade this imperiled species and its native habitat.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Gowen Cypress.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

We request that the Federal Register (or state equivalent) announcement of the listing of this species, and where the species is state listed the equivalent state public notice, be made a part of this review and considered.

ENDANGERED SPECIES

This project site appears to meet all three US-FWS criteria indicating the potential to find the species or its habitat on the project site.

SPECIES RANGE

1. Please provide a map of this species geographic range. Please use Venn diagrams as used in the FWS & NMFS March 1998 ESA Consultation Handbook pg pgs 4-16/4-17.

LOCAL OBSERVATIONS

2. Please provide a map of this species' habitat, local to the project.

3. Please identify all recent observations of the species on the local habitat map.

4. Please describe whether the population(s) affected by this project is a source or a sink population.

HABITAT TYPES AND RANGE

5. Please provide a comprehensive description of all of the species' known habitats, including foraging and migration habitats.

6. Please provide a comprehensive description of the maximum distance the species has been observed from known nesting, breeding and foraging habitats.

MINIMUM VIABLE POPULATION

7. Please describe the size of land area needed to sustain a single breeding pair (or an asexual individual) of this species for 100 years.

8. Please describe the number of individual breeding pairs (or individuals) needed to sustain a minimum viable population for 100 years.

9. What margin of error do these numbers have?

10. Please describe the size of land area needed to sustain a minimum viable population for 10 generations of this species.

VULNERABILITY AND THREATS

11. Please describe all characteristics of this species which make it vulnerable to extinction (e.g. specialized feeding habits, limited or specialized distribution, occupies top trophic levels, low reproductive potential, or hunted for commercial products).

12. Please identify, quantify and describe all major, moderate and potential threats to the species, in order of priority, which can limit the carrying capacity and population productivity factors for this species (e.g. loss of habitat, pesticides).

ONSITE HABITAT SIZE & QUALITY

13. Please quantify and describe the species maximum potential onsite habitat size in acres.

14. Please quantify the size of the species habitat which could be potentially lost in acres both permanently and temporarily.

15. Please quantify the number of individuals of this species which could potentially be lost and which impacts could cause each loss.

16. Please describe the qualities of each area of the habitats which could be lost, and which specific impacts could cause each loss.

FOOD CHAIN

17. Please describe and quantify the food chain for this species

18. Please discuss whether the listed species is a generalist or a specialist which only eats one species of food and if that food will be impacted by the activity.

19. Please describe and quantify the potential impacts, decrease and losses of the species' food chain due to the project.

PREDATORS

20. Please describe and quantify the potential impacts, declines and losses of the listed species from predators of the species which may be assisted by the project.

BIODIVERSITY

21. Please quantify and describe the existing Genetic Biodiversity for this species. Please quantify the existing genetic breadth using the number of variants of this species' Microsatellite DNA. If such studies do not exist please state this clearly.

22. Please quantify the potential reduction in size of the genetic variants in this species' Microsatellite DNA.

23. Please analyze and quantify the potential genetic bottleneck impacts on this species from this project.

24. Please quantify the potential reduction in size of the Species' Genetic Biodiversity due to this project.

25. Please quantify the Species' existing non-genetic Biodiversity.

26. Please quantify and describe the existing Ecosystem Biodiversity this species inhabits.

27. Please quantify and describe the potential reduction in size of the Species' Biodiversity due to this project.

* 736 - GOWEN CYPRESS HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Gowen Cypress Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Gowen Cypress Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
9. Please state the variance's MARGINS of ERROR or confidence level.
10. Please state whether this MARGIN of ERROR is measured or assumed.
11. If an average is used, please state which kind of average.
12. Please state the most extreme values which could be encountered.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
15. Please provide a graph of HISTORICAL measurements.
16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20a. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
24. Please state whether the MARGIN of ERROR is measured or assumed.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
27. Please state whether the MARGIN of ERROR is measured or assumed.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
29. Please list all potential CUMULATIVE impacts related to this one.
30. Please describe all potential CUMULATIVE impacts related to this one.
31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergetic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 737 - NATIVE MONTEREY PINE (P. RADIATA) TREE LOSS.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Native Monterey Pine (P. radiata) Tree Loss.
- If you claim the document contains proof of no-significant-impact for
- this impact please explicitly state the page number and paragraph.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 738 - PLANTING X ACRES OF MONTEREY PINE TREES.

Trees alone are not a forest, and planting trees, while environmentally generally a step in the right direction, does not make a forest. A

forest is a dynamic ecological system of interdependent species and habitats.

"Simply planting trees does not compensate for the loss of the habitat because many other factors affect whether a habitat is ecologically valuable." US-Fish & Wildlife Service, letter on mitigating loss of Monterey Pine habitat to Monterey County, Jan 19, 1996

Health
A tree farm can have healthy trees as does a native forest. But, a healthy tree does not make a healthy forest.

The genetic diversity difference between a forest and planted trees is enormous. A natural forest has as much genetic diversity as the number of trees it contains. Planted trees are typically clones with identical genes - all the trees are essentially twins.

The biological diversity of a natural forest is broad, complete and stable. The biological diversity of planted trees is extremely narrow, almost incomplete and instable.

How many species in a Tree Farm? How many species in a Healthy Forest?

The biomass of a natural forest is large and almost unvarying.
The biomass of planted trees is tiny and changing.

Myth: Dead and dying trees are bad for a forest.
What's Beethoven doing right now? - Decomposing.
While a healthy forest is full of healthy live trees, a Healthy Forest is also full of death, decay and rot.

Snags
How many dead standing trees in a tree farm? Generally Zero.
How many dead standing trees in a natural forest? Several per acre.
Woodpeckers eat insects including bark beetles which are primary

suspects of Pine Pitch Canker transmission. Woodpeckers need snags to live in. Urban Forests do not have snags. Urban Forests have more Pine Pitch Canker.

Cleared underbrush?
A forest which has had its ground cover vegetation artificially removed is not a healthy forest.

Dead Fallen logs?
After a tree falls it becomes home to other insects, bacteria, and animals. It decomposes to become food for the rest of the forest.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
Planting X acres of Monterey Pine Trees.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
Planting X acres of Monterey Pine Trees.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
Planting X acres of Monterey Pine Trees.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: Planting X acres of Monterey Pine Trees.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
Planting X acres of Monterey Pine Trees.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
Planting X acres of Monterey Pine Trees.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of

them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 739 - NATIVE MONTEREY PINE BIOMASS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Native Monterey Pine Biomass.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

According to the PG&E Forester for this area, Stuart Craig, a mature Monterey pine typically weighs about 5 tons (ten thousand pounds).
Please estimate the number of Monterey pines that would be cut down and killed.

Natural forests of mature Monterey Pine contain about 200 to 400 trees

per acre. This comes to about 1 million pounds of Monterey Pine biomass per acre.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Native Monterey Pine Biomass.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 740 - MONTEREY PINE BIOMASS PROTECTION.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Monterey Pine Biomass Protection.

* 741 - MONTEREY PINE NATIVE FOREST LOSS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Monterey Pine Native Forest Loss.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

We do not know the natural cycle of population variability of native Monterey Pine Forest, but we do know its decline is directly caused by human destruction - and there is no end in sight for that.

"A 1981 study estimated that for each hectare of US Wetlands destroyed by development, the lost ability to soak up floodwaters increased annual flood damages by \$3300 to \$11,000." Forests provided ecological services on the order of \$300 per hectare per year. Wade Roush, Science May 16 1997 pg 1029

By allowing induced growth due to the Dam, this species could be threatened by increased development.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on

Monterey Pine Native Forest Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 742 - MONTEREY PINE NATIVE FOREST LOSS HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Monterey Pine Native Forest Loss Habitat.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Monterey Pine Native Forest Loss Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 743 - NATIVE MONTEREY PINE GENETIC RESOURCE LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Native Monterey Pine Genetic Resource Loss.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

The Draft EIR for Pebble Beach Lot Program pg 3 states "Many of the impacts address the loss of up to 57,000 trees, and the resultant loss of wildlife habitat and ENDANGERMENT TO THE MONTEREY PINE SPECIES ITSELF."

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Native Monterey Pine Genetic Resource Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 744 - MONTEREY PINE FOREST ECOLOGICAL SERVICES LOSS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on
Monterey Pine Forest Ecological Services Loss.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

Fog drip provides as much as 45 percent of a redwood's annual water use.
Some understory plants depend completely on fog drip. In a 3 year study,
in an intact redwood forest 34 percent of the hydrologic input per year
came from fog drip. After logging the fog drip contribution dropped to 17
percent. Oecologica, January 1999, Todd Dawson, Cornell University
Monterey pine is also highly dependent on fog drip. Its inland boundary
is defined as the extent of the fog line.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance on
Monterey Pine Forest Ecological Services Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable,
credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 745 - MONTEREY PINE (P. RADIATA) NATIVE FOREST ECOSYSTEM LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Monterey Pine (P. radiata) Native Forest Ecosystem loss.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Pinus Radiata (Monterey Pine) is a "Federal Species of Concern", and was listed as an Endangered species by the United Nations - Food and Agricultural Organization in 1986. Monterey County considers the tree species a "Sensitive Resource" when they list it first and ahead of the live Oak in the Slide show presentation which is now on their Web Site.

Monterey County contains the largest healthy forests of Monterey pine (pinus Radiata). It lies directly in the center of the natural range of the tree. The tree grows up to a few miles inland from the coast.

The Draft EIR for Pebble Beach Lot Program pg 3 states "Many of the impacts address the loss of up to 57,000 trees, and the resultant loss of wildlife habitat and ENDANGERMENT TO THE MONTEREY PINE SPECIES ITSELF."

32 acres of Monterey pine forest loss is "Substantial"

The California Coastal Commission wrote -
"The approximately 9 acres of native Monterey pine forest to be cleared for the [Spanish Bay] golf course represents a substantial long-term impact." - Spanish Bay Project Final approval 1984 pg 25.

SUBSTANTIAL ... LONG-TERM impact...

"a substantial area of Monterey pine forest is proposed for removal."
- Spanish Bay Project Final approval 1984 pg 23.

This last sentence referred to 32 acres of forest.

Animals supported by the Monterey pine forest include the Ringtail (Bassariscus astutus) - a fully protected species, Striped and spotted Skunk, Bobcat, Black Bear, Mountain Lion, Gray fox, Coyote, long-tailed Weasel, Badger, Merriam's Chipmunk, California Ground Squirrel and Western Gray Squirrel, Deer mouse, California mouse, Brush mouse, Pinion mouse California Vole, Dusky-footed wood-rat, Black-tailed Rabbit, Brush Rabbit, Desert Cottontail Mule deer, Botta's pocket gopher, Raccoon, Western Mastiff bat, Pallid Bat, Hoary bat, Big Brown Bat, Red Bat, California Myotis, Yuma Myotis, long-eared Myotis, long-legged Myotis, Small-footed Myotis, Ornate Shrew, Trowbridge's Shrew, shrew-Mole, Broad-footed Mole and Opossums.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Monterey Pine (P. radiata) Native Forest Ecosystem loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 746 - PRESCRIBED BURNING OF NATIVE MONTEREY PINE FOREST.

Prescribed Burning is often claimed as necessary to mimic natural

forest processes.

If this were valid case why stop at burning, we should be recreating volcanic eruptions as well.

MOST NATURAL FIRES "FIZZLE OUT"

"Scientists have learned that almost all lightning-induced fires simply fizzle out before burning even a single hectare of land." Environmental Science (textbook) ; Morgan, Moran & Weirsma; W.C. Brown, 1993, pp 206

What is the Environmental damage to Endangered Species from the smoke?

QUANTIFICATION OF BENEFITS

There is little or no factual evidence in the document showing how this benefit can be achieved.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this benefit's value.

A1. If no objective criteria are used please state that clearly.

B. Please state the name of the measurement units (numbers) used to determine the value for EACH criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in PERCENT, to which the benefit would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in ABSOLUTE AMOUNT, to which this benefit would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a benefit to a less-than-significant benefit and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this benefit is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. BENEFIT VALUE PROOF

Please cite and provide relevant studies that clearly show that this purpose could be achieved.

J1. Please discuss the limitations of those studies.

J2. Please clearly describe the maximum amount of benefit achieved in the studies.

K. BENEFIT DURATION

Please clearly describe the maximum length of time the purposes were achieved in the studies.

K1. Please graph the benefit achieved versus time in the studies. It is important to know how long the benefit lasts with some degree of certainty.

K2. Please graph the expected achieved versus time for this project.

L. COSTS

It is important to know the cost to benefit ratio. Please cite the total costs for the projects studied.

M. Please name each expert who prepared and reviewed this benefit analysis.

M1. Please cite each expert's training, competence and experience specific to this benefit analysis.

N. Please state to which criteria the Benefit predictions are most sensitive?

* 747 - PRESCRIBED BURNING OF NATIVE MONTEREY PINE FOREST.

There is absolutely ZERO evidence that fire is required for the health of, or common in, a native or natural Monterey pine forest.

It is sometimes asserted that Monterey pine forests depend on frequent fire to maintain health and that fire in radiata forests has been unnaturally suppressed. An examination of the cited and available sources showed no real evidence for such a conclusion.

Jones & Stokes (1994 Ecological Assessment and 1996 Conservation

Strategy Report) argues that fire has been suppressed in natural radiata forests. They then try to make a case for managing radiata forests using artificially induced fire. They state "we can speculate that [Monterey pine] evolved under a fire regime in which fire returned to any given patch of forest at intervals of less than 150 years." For evidence they cite "Greenlee and Langenheim 1990."

It is difficult to determine how they reached such a conclusion since the Greenlee and Langenheim 1990 paper does not mention -
 1) Monterey pine
 2) Monterey pine forest
 3) or even the Monterey Peninsula which contains the largest, healthiest and most important remaining natural Monterey pine forests.

On the other hand a credible source is the well researched "Monterey Bay Area: Natural History and Cultural Imprints" by Burton L. Gordon 1974, 1996 Boxwood Press. Gordon takes a more scientific assessment writing "Having searched written records covering some 125 years (and consulted local park rangers and city fire departments), the writer concludes that it is impossible to extrapolate a credible natural burn cycle of less than 500 years for the coastal half of the Monterey Bay area and for the inland half, less than 300 years."

WORLD'S LEAST OCCURENCE OF THUNDERSTORMS AND LIGHTNING
 The available evidence indicates Monterey pine habitat which is located in three tiny low altitude coastal areas with some of the world's lowest frequency of lightning (the only common cause of natural fires) (Scientific American August 1997 pg 52) thunderstorms. Many other key factors indicate a very low potential of frequent natural fire in native Monterey pine habitat.

Monterey Pine Forests at Low Elevation, Lightning at High Elevation -
 Monterey pine forest rarely grows naturally above 1000 feet (300 meters) in altitude or inland of the wet summer fog belt. While lightning strikes can occur at sea level in Monterey pine forest it is extremely rare.

In contrast, lightning strikes along the central coast occur mainly at high elevations, as unstable ocean air is forced over the dramatic mountains (called Orographic lifting) of Big Sur which often exceed 4000 feet (1200 meters). The higher the hill, the more frequent the lightning strikes. The lower the hill, the less frequent the lightning strikes.

A USFS study of 100,000 fires in California in the 1970's under jurisdiction of CDF and USFS (Keeley 1981) found less than one percent of lightning caused fires occurred below 250 meters (800 feet) in elevation.

Central California coast lightning at or near sea level is almost

unknown. According to "Physical Geography" 1990 by Tom Knight coastal central California has the lowest frequency of thunderstorms in the conterminous United States at less than 5 per year. Lightning requires thunderstorms. Lightning does not occur during the wet summer fog in Monterey pine habitat. When lightning does occur, it is almost always during a wet cold front. The rain accompanying the cold front makes the forest less flammable. "Undoubtedly, many of these fires would not spread very far even if they were not suppressed." (Keeley citing Snow & Kotok 1923)

This mirrors my research in 1995 where CDF (in King City and Monterey) asserted there were no reported fires in Monterey pine forest since 1959. I also interviewed former Sid Ormsbee fire lookout Beth Reddish who said she could not recall a single fire in Monterey pine forest in the decades she and her husband worked that Carmel Valley fire lookout.

"Distribution of Lightning and Man Caused Wildfires in California", Jon E. Keeley, Asst Prof of Biology, Occidental College, Los Angeles; General Technical Report. PSW-58. Berkeley, CA: Pacific SW Forest and Range Experiment Station, USFS, USDoA; 1982.

MOST NATURAL FIRES "FIZZLE OUT"
 "Scientists have learned that almost all lightning-induced fires simply fizzle out before burning even a single hectare of land." Environmental Science (textbook) ; Morgan, Moran & Weirsma; W.C. Brown, 1993, pp 206

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
 Prescribed Burning of Native Monterey Pine Forest.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
 Prescribed Burning of Native Monterey Pine Forest. using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
 Prescribed Burning of Native Monterey Pine Forest. using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: Prescribed Burning of Native Monterey Pine Forest.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
 Prescribed Burning of Native Monterey Pine Forest.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
 Prescribed Burning of Native Monterey Pine Forest.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 748 - MONTEREY PINE NATIVE FOREST SCENT.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Monterey Pine Native Forest Scent.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Sam Minturn Executive Director of the California Christmas Tree Association "thinks Monterey Pines make great christmas trees. They are full and bushy, he said 'and their fragrance is outstanding.'"; and
"Chong Kang, owner of Lighthouse Produce in Pacific Grove said [those who ask for Monterey pine christmas trees] have previously cut the trees themselves and know they smell good." Herald Dec 3 1999 front page

The Monterey Pine Forest Scent is distinct from other forests and changes depending on the weather and season.

The scent can be distinguished from that of a redwood forest or the nearby Monterey Cypress forest.

In summer they have the scent of dry pine needles plus the elusive scent aroma of Yerba Buena, a mint. Not surprisingly the winter brings a mustier wet fragrance.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Monterey Pine Native Forest Scent.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 749 - NATIVE MONTEREY PINE FOREST MILLION-YEAR-OLD-SOIL LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Native Monterey Pine Forest Million-Year-Old-Soil Loss.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Soil experts agree that the soils under the native Monterey pine on the

Monterey Peninsula are at least 750,000 years old and more likely one million years old.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on
Native Monterey Pine Forest Million-Year-Old-Soil Loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 750 - PRUNING PINUS RADIATA (MONTEREY PINE) ROOTS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pruning Pinus Radiata (Monterey Pine) Roots.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

According to Carmel City Forester Gary Kelley "Mature Monterey pines do not tolerate root pruning." Carmel Pine Cone, front page June 12 1998

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Pruning Pinus Radiata (Monterey Pine) Roots.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 751 - MONTEREY CYPRESS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Monterey Cypress.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Under natural conditions the Monterey Cypress verged on extinction.

When Europeans first arrived there were fewer than 11,000 of these trees, growing within a total area of some 50 acres, and all within several hundred meters of shoreline on the Monterey Peninsula and around Carmel Bay (Greene, 1929, p 197)." -Burton Gordon, Monterey Bay Area: Natural History and Cultural Imprints, 1996, Boxwood Press

The Monterey Cypress has one of the most restricted natural ranges of any California tree. The only natural stands of Monterey Cypress occur in the Point Lobos Reserve and along the coast between Pescadero Point and Point Cypress in Monterey County.

The Monterey Cypress is resistant to moisture high in salinity and high winds, enabling it to successfully compete with Monterey pines, the regional climax community along the Monterey coastline.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Monterey Cypress.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 752 - MONTEREY CYPRESS HABITAT.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Monterey Cypress Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Monterey Cypress Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 753 - BISHOP PINE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the project's potential impacts on Bishop Pine.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Bishop pine (pinus) occurs in Monterey County at Huckelberry Hill in Pebble Beach.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Bishop Pine.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 754 - LOSS AND HARM TO MYCORRHIZE FUNGI.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on Loss and Harm to Mycorrhize Fungi.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

There are 527 species of fungi closely associated with old-growth and mature forests in the Northwest US and 150 species of slugs and terrestrial snails. "The Status and Trends of Our Nation's Biological Resources" by USGS

Mycorrhize Fungi are a furry brown layer of millions of protective filaments which coat most tree roots (including Redwood, Monterey pine) and secrete antibiotics and stabilize the soil. Sierra Sept 1999 pg 22

Mycorrhize Fungi increase the uptake of phosphorus and nitrogen in trees, particularly in soils with low concentrations of P & N. -Fungi, Carlisle, Watkinson, Academic Press, 1994-1997

Most fungi, including mycorrhize, are harmed by oxygen deprivation, low water activity, low temperatures, heat, ionizing radiation and sulphur. -Fungi, Carlisle, Watkinson, Academic Press, 1994-1997

Mycorrhize Fungi are highly sensitive, easily harmed, by soil compaction. David Adams, California Department of Forestry Pathologist Personal Communication, May 31, 2000

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Loss and Harm to Mycorrhize Fungi.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal

laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 755 - LOSS AND HARM TO LICHENS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the project's potential impacts on
Loss and Harm to Lichens.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Lichens absorb substances from rainwater and are particularly susceptible to airborne toxic compounds. Thus the presence or absence of lichens is a sensitive indicator of air pollution."
-Biology (textbook 1984), H. Curtis pg 450

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance on Loss and Harm to Lichens.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 756 - INADEQUATE GENERAL PLAN.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Inadequate General Plan.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

This General Plan fails to provide any quantitative limits to growth. No
No recognition of the very real limits to water, traffic capacity, electrical supply, sewage disposal, and parking we must endure.

It is not long term in perspective. (Gov Code 65300)

Inconsistent with state policy on housing, open space, forest and timber resources, timberland preserve zone and environmental quality.

Failure to include standards of population density and building intensity.

No Connection between stated density to any of the classified types of areas and the tabulated land use categories, making it impossible to relate any tabulated density standard of population to any location in the county.

Circulation and Land Use Elements are neither correlated or internally consistent.

Does not identify areas subject to flooding.

Does not map all known seismic and other geologic hazards (known landslide areas re: 1995-1998 floods).

It does not spell out allowable uses for each land use district.

The density ranges are not specific to provide guidelines in making consistency findings for zoning, use permits, events and subdivisions.

Inclusion of a precedence clause. No Element of a General Plan can take precedence over another. This is facial evidence of an internal inconsistency.

Failure to quantify natural resources and their limits of sustainable use.
Erosion of natural resource values by cumulative projects needs to be compared to something objective.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate General Plan.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 757 - GENERAL PLAN INCONSISTENCY.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
General Plan InConsistency.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Monterey County prohibits ridgeline development. Yet Monterey County has approved ridgeline development at Carmel Valley Ranch and Canada Woods North.

The General Plan's Resource Conservation Element conflicts with its Land Use Element in that if the Land Use element is followed, the Resource Conservation Element is violated.

The County Local Coastal Plan (recommending widening Highway 1 to 4 lanes) conflicts with the Coastal Act sec. 30254 which says "it is the intent of the Legislature that State Highway Route 1 in rural areas of the coastal zone remain a scenic two-lane road." This conflict is so significant Cal-Trans wrote the Coastal Commission asking for it to be interpreted away. Cal-Trans letter June 12, 2000 to Tami Grove from Wendy Waldron of Cal-Trans SLO

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of General Plan InConsistency.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.	38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.	(non-subjective) criteria used to determine this Alternative's benefits.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.	39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.	A1. If no objective criteria are used please state that clearly.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.	40. Please state whether the margin of error is measured or assumed.	A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.	41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.	B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.
20a. Please state whether this MARGIN of ERROR is measured or assumed.	42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.	B1. If no measurement units are used please state that clearly.
20b. If no margin of error is used please state that clearly.	43. Please name each EXPERT who prepared and reviewed this impact.	C. Please state the method of measurement used to determine the value for each criteria.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.	44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.	C1. If no measurement units are used please state that clearly for each criteria.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.	45. Please provide AVOIDANCE MITIGATION for this impact.	C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	46. Please provide the reverse of this impact as Mitigation.	D. Please state the existing or current baseline measurement (level) for each criteria.
24. Please state whether the MARGIN of ERROR is measured or assumed.	47. Please provide an ALTERNATIVE which avoids this impact.	E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.	48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.	E1. If an average is used, please state which kind of average.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	-	E2. Please state the extreme conditions which will be encountered.
27. Please state whether the MARGIN of ERROR is measured or assumed.	* 758 - GENERAL PLAN WITH A COLOR-BLIND POPULATION LIMIT. The Document appears to have ignored this potentially feasible Alternative. Please carefully analyze and disclose the potential benefits of General Plan with a Color-Blind Population Limit.	F. Please provide a graph of historical measurement.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.	No one wants our Peninsula or our County to look like San Jose or Tokyo. But we can't avoid SanJosification - if we don't stop growing at some point. If we don't stop, no matter how slow (or "sustainably") you grow, someday our whole Peninsula will be paved over just like San Jose. Remember San Jose used to be covered in trees like our Peninsula is - so far.	G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.
29. Please list all potential CUMULATIVE impacts related to this one.	So we are all agreed we must stop at some point.	H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.
30. Please describe all potential CUMULATIVE impacts related to this one.	We disagree strongly about when to stop.	H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.
31. Please quantify all potential CUMULATIVE impacts related to this one.	Whatever that limit, or cap is one must be set to adequately measure and limit the cumulative significant environmental impacts from population growth.	H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;
32. Please list, describe and quantify all potential compound and synergetic impacts.	So create a numeric limit for population and make it color-blind as an alternative.	H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.
33. Please list, describe and quantify all Construction impacts related to this one.	ALTERNATIVE FACTUAL ANALYSIS	I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.
34. Please list, describe and quantify all Growth impacts related to this one.	There is little or no factual evidence in the document showing why this alternative is infeasible.	I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.
35. Please list, describe and quantify all Indirect impacts related to this one.	A. Please clearly identify by name and describe each of the objective	

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

* 759 - INADEQUATE WATER RIGHTS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Inadequate Water Rights.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

There is no evidence or finding that adequate legal water rights exist.

Two thirds of every gallon of water pumped from the Carmel River is illegal water.

The water rights could have been severed or subordinated. Legal water rights are wholly independent from water supply quantity and water quality. You can have adequate water supply quantity and quality without having any right to the water.

Monterey County Dept of Environmental Health does not determine whether adequate water rights exist.

Monterey County Water Resources Agency does not determine whether adequate water rights exist.

Monterey County Counsel's office does not determine whether adequate water rights exist.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate Water Rights.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 760 - HOUSING.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Housing.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Please state the number of existing Lots of Record. Please state what document, facts and what approval that is based on.

Lack of programs to conserve stock of affordable housing.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Housing.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 761 - INADEQUATE OR OUT OF DATE GENERAL PLAN NOISE ELEMENT.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Inadequate or Out of Date General Plan Noise Element.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Please include a map of areas of silence; lands where the sounds of human activities are not heard, or are only rarely heard. Use "topographic lines" to indicate 40 dBA, 35 dBA, 30 dBA, 25 dBA etc.

Noise exposure information is not included. Community noise exposure inventory is not included. There is no quantitative inventory of noise levels. There is no statement of policy to avoid excessive noise.

There is no map of expected future noise growth in area and volume.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of Date General Plan Noise Element.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 762 - INADEQUATE OR OUT OF DATE GENERAL PLAN OPEN SPACE ELEMENT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Inadequate or Out of Date General Plan Open Space Element.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Gov Code Section 65560. (b) "Open-space land" is any parcel or area of land or water which is ESSENTIALLY UNIMPROVED and devoted to an open-space use...

There is No Open Space Inventory or Map. Please prepare both.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of Date General Plan Open Space Element.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.	28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.	this impact please explicitly state the page number and paragraph.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.	29. Please list all potential CUMULATIVE impacts related to this one.	The Monterey Bay National Marine Sanctuary was created since the General Plan was adopted and it makes no mention of the Sanctuary.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.	30 Please describe all potential CUMULATIVE impacts related to this one.	Many wildlife species have been formally listed under the Federal and State Endangered Species acts since the General Plan was approved. Although the General Plan has been amended regularly to allow development, none of the newly listed species or their habitat have been acknowledged. The General Plan is out of date because it does not recognize the potential impacts to those species, their thousands of acres of habitat and the protection they need.
9. Please state the variance's MARGINS of ERROR or confidence level.	31. Please quantify all potential CUMULATIVE impacts related to this one.	Just a few of the species listed since the General Plan was adopted include: West Coast Steelhead (<i>Oncorhynchus mykiss</i> , or <i>O. mykiss</i>) 1997, the California Red-Legged Frog (<i>Rana aurora draytonii</i>) 1996, the Snowy plover, Gowen Cypress, Yadon's Piperia, Condors have been reintroduced, Marbled Murrelets have been found nesting, Northern Spotted Owls, Great gray owl, Elf Owls, Smith's Blue Butterfly.
10. Please state whether this MARGIN of ERROR is measured or assumed.	32. Please list, describe and quantify all potential compound and synergetic impacts.	The California Red-Legged Frog and the West Coast Steelhead (<i>Oncorhynchus mykiss</i>) are both significantly harmed by overpumping of the Carmel River causing its dewatering. The US-Fish & Wildlife Service (FWS) has warned that dewatering the Carmel River is potentially a take of the Frog (CRLF) under the Endangered Species Act. The US-National Marine Fisheries Service has concluded "steelhead are continuing to be taken every year due to the overpumping."
11. If an average is used, please state which kind of average.	33. Please list, describe and quantify all Construction impacts related to this one.	Pinus Radiata (Monterey pine) was listed by the United Nations FAO in 1986 as an Endangered tree; after that the species and its habitat became threatened dramatically threatened by Pine Pitch Canker (<i>Fusarium subglutinans</i>). At the same time the Pebble Beach Company proposes to destroy hundreds of acres (more than a square mile) of the healthiest native Pinus Radiata forest remaining. The General Plan does not acknowledge this or provide any protection for the tree or its habitat - in fact the County takes pains to avoid any protection for the tree.
12. Please state the most extreme values which could be encountered.	34. Please list, describe and quantify all Growth impacts related to this one.	Five (5) plants are newly listed under the Endangered Species Act in 1999, three more plants were listed in Marc 2000.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.	35. Please list, describe and quantify all Indirect impacts related to this one.	There is No Open Space Inventory or Map. Please prepare both.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.	36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.	Conservation Easements have been lifted by the County with abandon. Canada Woods East is now a housing development, when it was willed to the Big Sur Land Trust to be kept in a permanent conservation easement.
15. Please provide a graph of HISTORICAL measurements.	37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.	
16. Please quantify the length of time this impact would last.	38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.	
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.	39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.	
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.	40. Please state whether the margin of error is measured or assumed.	
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.	41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.	
20a. Please state whether this MARGIN of ERROR is measured or assumed.	42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.	
20b. If no margin of error is used please state that clearly.	43. Please name each EXPERT who prepared and reviewed this impact.	
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.	44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.	
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.	45. Please provide AVOIDANCE MITIGATION for this impact.	
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	46. Please provide the reverse of this impact as Mitigation.	
24. Please state whether the MARGIN of ERROR is measured or assumed.	47. Please provide an ALTERNATIVE which avoids this impact.	
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.	48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.	
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	-	
27. Please state whether the MARGIN of ERROR is measured or assumed.	* 763 - INADEQUATE OR OUT OF DATE GENERAL PLAN CONSERVATION ELEMENT. The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the potential impacts of Inadequate or Out of Date General Plan Conservation Element. If you claim the document contains proof of no-significant-impact for	

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of Date General Plan Conservation Element.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 764 - PERMANENT WILDLAND LAND USE CATEGORY.

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of Permanent Wildland Land Use Category.

The use of Permanent Wildland Land Use Category would allow lands to be placed in this designation and not changed for development unless approved by a public vote.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

* 765 - INADEQUATE OR OUT OF DATE GENERAL PLAN CIRCULATION ELEMENT.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of

Inadequate or Out of Date General Plan Circulation Element.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of Date General Plan Circulation Element.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 766 - LOCAL LAND USE PLAN IN-CONSISTENCY.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Local Land Use Plan In-Consistency.
- If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.
- QUANTIFICATION OF BASELINES AND IMPACTS:
- This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Local Land Use Plan In-Consistency.
- 1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
- 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
- 3b. Please quote the definition used.
4. If no measurement units are used please state that clearly.
- 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
- 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.
6. Please quantify the existing or current BASELINE measurement (level) for each criteria.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
9. Please state the variance's MARGINS of ERROR or confidence level.
10. Please state whether this MARGIN of ERROR is measured or assumed.
11. If an average is used, please state which kind of average.
12. Please state the most extreme values which could be encountered.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
15. Please provide a graph of HISTORICAL measurements.
16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20s. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
24. Please state whether the MARGIN of ERROR is measured or assumed.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
27. Please state whether the MARGIN of ERROR is measured or assumed.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
29. Please list all potential CUMULATIVE impacts related to this one.
30. Please describe all potential CUMULATIVE impacts related to this one.
31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergistic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 767 - CONFLICT WITH EXISTING OPEN SPACE LAND USE.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Conflict with Existing Open Space Land Use.
- If you claim the document contains proof of no-significant-impact for

this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Conflict with Existing Open Space Land Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 768 - CONFLICT WITH EXISTING CONSERVATION LAND USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Conflict with Existing Conservation Land Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Conflict with Existing Conservation Land Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 769 - CONFLICT WITH EXISTING AGRICULTURAL LAND USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Conflict with Existing Agricultural Land Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Schools downwind of, adjacent to, or near agricultural lands where
pesticides are used are a conflict of land uses.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Conflict with Existing Agricultural Land Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal

laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 770 - CONFLICT WITH EXISTING RESIDENTIAL LAND USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Conflict with Existing Residential Land Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Any increase in pesticide use near residential areas is a land use
conflict.

Please require full pesticide use disclosure to all residents at least
two (2) months prior to any pesticide application.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Conflict with Existing Residential Land Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 771 - INCOMPATIBILITY WITH COUNTY GROWTH MANAGEMENT POLICY.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Incompatibility with County Growth Management Policy.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Incompatibility with County Growth Management Policy.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 772 - COASTAL ACT IN-CONSISTENCY.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Coastal Act In-Consistency.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"Wetlands, estuaries, streams, riparian habitats, lakes and portions of open coastal waters" in the Coastal Zone are Environmentally Sensitive Habitat Area (ESHA) according to California Coastal Commission
"Statewide Interpretive Guideline for Wetlands and other Wet Environmentally Sensitive Habitat Areas (adopted 2/4/81)" and cannot be altered or destroyed unless the project is dependent on the resources.

The Coastal Act definition of wetlands would include the wetland areas of Estuarine, Palustrine, and Lacustrine ecological systems defined by the US-Fish & Wildlife Service classification system.

Habitat for listed plant species is ESHA and can not be altered or destroyed unless the project is dependent on the resources.

Habitat for listed animal species is ESHA and can not be altered or destroyed unless the project is dependent on the resources.

For all listed species potential habitat and wetlands this project could affect - please explain how this project is dependent on each of the natural resources it would diminish.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Coastal Act In-Consistency.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 773 - INADEQUATE OR OUT OF DATE COASTAL PLAN.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Inadequate or Out of date Coastal Plan.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Since the Coastal Plan was adopted many significant environmental circumstances have changed for the worse.

WATER:

LUP states "there will be some increase in water supply."; yet, water supply has decreased.
Water supply for the Monterey Peninsula area became legally constrained with (SWRCB order 95-10).

Carmel River Dam approval voided by the court.
Saltwater Intrusion has Increased in the Salinas River Aquifer.

TRAFFIC:

LOS "F" on Hwy 1 @ CVR
LOS "F" on Hwy 1 @ Hwy 68
LOS "F" on Hwy 68 to PG
LUP states HCF "will be constructed";
HCF approval was voided by court in 1998

BIOTA:

LUP states "there will be no major change in environmental regulations";
yet The Monterey Bay National Marine Sanctuary was created since the General Plan was adopted and it makes no mention of the Sanctuary.

Many wildlife species have been formally listed under the Federal and State Endangered Species acts since the General Plan was approved.
Although the General Plan has been amended regularly to allow development, none of the newly listed species or their habitat have been acknowledged. The General Plan is out of date because it does not recognize the potential impacts to those species, their thousands of acres of habitat and the protection they need.

Just a few of the species listed since the General Plan was adopted include: West Coast Steelhead (*Oncorhynchus mykiss*, or O. mykiss) 1997, the California Red-Legged Frog (*Rana aurora draytonii*) 1996, the Snowy plover, Gowen Cypress, Yaden's Piperia, Condors have been reintroduced, Marbled Murrelets have been found nesting, Northern Spotted Owls, Great gray owl, Elf Owls, Smith's Blue Butterfly.

The California Red-Legged Frog and the West Coast Steelhead (*Oncorhynchus mykiss*) are both significantly harmed by overpumping of the Carmel River causing its dewatering. The US-Fish & Wildlife Service (FWS) has warned that dewatering the Carmel River is potentially a take of the Frog (CRLF) under the Endangered Species Act. The US-National Marine Fisheries Service has concluded "steelhead are continuing to be taken every year due to the overpumping."

Pinus Radiata (Monterey pine) was listed by the United Nations FAO in 1986 as an Endangered tree; after that the species and its habitat became threatened dramatically threatened by Pine Pitch Canker (*Fusarium*

subglutinans). At the same time the Pebble Beach Company proposes to destroy hundreds of acres (more than a square mile) of the healthiest native *Pinus Radiata* forest remaining. The General Plan does not acknowledge this or provide any protection for the tree or its habitat - in fact the County takes pains to avoid any protection for the tree.

Five (5) plants are newly listed under the Endangered Species Act.

The Bolsa Chica case has increased Coastal Zone protection for ESHA.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of date Coastal Plan.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 774 - INADEQUATE OR OUT OF DATE COASTAL PROGRAM.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Inadequate or Out of Date Coastal Program.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"The [Coastal] Commission observed that an update of the Del Monte Forest Area LCP segment probably is warranted." Sept 9, 1998 letter from Coastal Commission to Monterey County Board of Supervisors
The Bolsa Chica case has increased Coastal Zone protection for ESHA.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Inadequate or Out of Date Coastal Program.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 775 - INCOMPATIBLE LAND USES.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Incompatible Land Uses.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Incompatible Land Uses.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 776 - LOW INCOME HOUSING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Low Income Housing.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

California Gov Code Section 65590 requires that housing units in the coastal zone for low- and moderate-income residents be provided whenever possible, be protected where they currently exist, and be replaced when demolished.

There is a large demand for, and large shortage of, Low Income Housing throughout Monterey County as of 2004.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Low Income Housing.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.	26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	If you do not adopt this mitigation measure, please explain fully why it is not feasible.
5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.	27. Please state whether the MARGIN of ERROR is measured or assumed.	Please carefully analyze and disclose the potential benefits of Low-Income Housing Deed Restriction.
6. Please quantify the existing or current BASELINE measurement (level) for each criteria.	28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.	To provide permanent low-cost housing Monterey County can buy housing, put a permanent deed restriction on the property and sell it on the open market. The difference in the price the city pays and the cost they sell the land at is the cost of the program. In inflationary times the city may even realize a profit from this program. It is vital to put a reversionary clause in so that if anyone tries to remove a deed restriction that land reverts back to a responsible party (e.g. Park District, No-profit housing agency, District Attorney's office) who will enforce such a deed restriction.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.	29. Please list all potential CUMULATIVE impacts related to this one.	-
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.	30. Please describe all potential CUMULATIVE impacts related to this one.	* 778 - AUXILIARY HOUSING.
9. Please state the variance's MARGINS of ERROR or confidence level.	31. Please quantify all potential CUMULATIVE impacts related to this one.	The Document appears to have ignored this potentially significant Impact. Please carefully analyze and disclose the potential impacts of Auxiliary Housing.
10. Please state whether this MARGIN of ERROR is measured or assumed.	32. Please list, describe and quantify all potential compound and synergetic impacts.	If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.
11. If an average is used, please state which kind of average.	33. Please list, describe and quantify all Construction impacts related to this one.	Please state the maximum number and maximum total square footage of all auxiliary housing units and other buildings which could potentially be built if this application is approved. (i.e. Granny Unit, Caretaker's unit, Guest house)
12. Please state the most extreme values which could be encountered.	34. Please list, describe and quantify all Growth impacts related to this one.	QUANTIFICATION OF BASELINES AND IMPACTS:
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.	35. Please list, describe and quantify all Indirect impacts related to this one.	This impact appears to be potentially significant.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.	36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.	1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Auxiliary Housing.
15. Please provide a graph of HISTORICAL measurements.	37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.	1b. If no objective criteria are used please state that clearly.
16. Please quantify the length of time this impact would last.	38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.	2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.	39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.	3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.	40. Please state whether the margin of error is measured or assumed.	3b. Please quote the definition used.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.	41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.	4. If no measurement units are used please state that clearly.
20a. Please state whether this MARGIN of ERROR is measured or assumed.	42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.	5a. Please state the METHOD of measurement used to determine the significance for each criteria.
20b. If no margin of error is used please state that clearly.	43. Please name each EXPERT who prepared and reviewed this impact.	5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.	44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.	
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.	45. Please provide AVOIDANCE MITIGATION for this impact.	
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	46. Please provide the reverse of this impact as Mitigation.	
24. Please state whether the MARGIN of ERROR is measured or assumed.	47. Please provide an ALTERNATIVE which avoids this impact.	
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.	48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.	
	* 777 - LOW-INCOME HOUSING DEED RESTRICTION.	
	The Document appears to have ignored this potentially feasible Mitigation.	

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 779 - CONFLICTS WITH PROTECTIVE ORDINANCES AND POLICIES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

Conflicts with Protective Ordinances and Policies.

If you claim the document contains proof of no-significant-impact for

this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Conflicts with Protective Ordinances and Policies.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 780 - CONFLICTS WITH HABITAT CONSERVATION PLANS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Conflicts with Habitat Conservation Plans.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Conflicts with Habitat Conservation Plans.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 781 - OUT OF COUNTY HOUSING DEMAND INCREASE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Out of County Housing Demand Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

When additional jobs are created in Monterey County (that cannot be wholly served by Monterey County residents) without a similar increase in affordable housing it causes an Increase in housing demand in counties outside Monterey County.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Out of County Housing Demand Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 782 - OUT OF COUNTY TRAFFIC INCREASE.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

Out of County Traffic Increase.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

When additional jobs are created in Monterey County (that cannot be wholly served by Monterey County residents) without a similar increase in affordable housing it causes an Increase in housing demand in counties outside Monterey County.
This increase in housing demand in counties outside Monterey County causes an increase in commuting traffic outside Monterey County.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Out of County Traffic Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 783 - OUT OF COUNTY WATER DEMAND INCREASE.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Out of County Water Demand Increase.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

When additional jobs are created in Monterey County (that cannot be wholly served by Monterey County residents) without a similar increase in affordable housing it causes an Increase in housing demand in counties

outside Monterey County.
This increase in housing demand in counties outside Monterey County causes an increase in water supply demand outside Monterey County.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Out of County Water Demand Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 785 - REGIONAL TRANSPORTATION PLAN POLICIES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Regional Transportation Plan Policies.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Please explain how this project is consistent with the Regional Transportation Plan

Policy 1.1.2

"Public Transit, ridesharing, carpooling, bicycle and pedestrian access, park and ride facilities, and other transportation demand management strategies SHALL be pursued as preferred alternatives over transportation construction projects where feasible."

Policy 1.1.3

"Pedestrian and Bicycle access, and transit access shall be incorporated into the design of new residential and commercial developments by amending development standards, zoning ordinances, and applicable subdivision ordinances."

Policy 1.2.3

"Three strategies should be employed ...
3) reconsideration of land use plans and project size to alleviate further congestion and degradation in LOS."

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Regional Transportation Plan Policies.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.
 12. Please state the most extreme values which could be encountered.
 13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
 14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
 15. Please provide a graph of HISTORICAL measurements.
 16. Please quantify the length of time this impact would last.
 17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
 18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
 19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
 - 20a. Please state whether this MARGIN of ERROR is measured or assumed.
 - 20b. If no margin of error is used please state that clearly.
 21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
 22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
 23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
 24. Please state whether the MARGIN of ERROR is measured or assumed.
 25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
 26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
 27. Please state whether the MARGIN of ERROR is measured or assumed.
 28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
 29. Please list all potential CUMULATIVE impacts related to this one.
 30. Please describe all potential CUMULATIVE impacts related to this one.
 31. Please quantify all potential CUMULATIVE impacts related to this one.
 32. Please list, describe and quantify all potential compound and synergetic impacts.
 33. Please list, describe and quantify all Construction impacts related to this one.
 34. Please list, describe and quantify all Growth impacts related to this one.
 35. Please list, describe and quantify all Indirect impacts related to this one.
 36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
 37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
 38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
 39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
 40. Please state whether the margin of error is measured or assumed.
 41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
 42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
 43. Please name each EXPERT who prepared and reviewed this impact.
 44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
 45. Please provide AVOIDANCE MITIGATION for this impact.
 46. Please provide the reverse of this impact as Mitigation.
 47. Please provide an ALTERNATIVE which avoids this impact.
 48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 786 - PEDESTRIAN ACTIVITY.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Pedestrian Activity.
- If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.
- Pedestrian Activity is discouraged by noise (Southworth 1967) and vehicle speeds increasing accident hazards.
- QUANTIFICATION OF BASELINES AND IMPACTS:
- This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pedestrian Activity.
 - 1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
 - 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
 - 3b. Please quote the definition used.
 4. If no measurement units are used please state that clearly.
 - 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
 - 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.
 6. Please quantify the existing or current BASELINE measurement (level) for each criteria.
 7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.
 8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
 9. Please state the variance's MARGINS of ERROR or confidence level.
 10. Please state whether this MARGIN of ERROR is measured or assumed.
 11. If an average is used, please state which kind of average.
 12. Please state the most extreme values which could be encountered.
 13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
 14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
 15. Please provide a graph of HISTORICAL measurements.
 16. Please quantify the length of time this impact would last.
 17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
 18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
 19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
 - 20a. Please state whether this MARGIN of ERROR is measured or assumed.
 - 20b. If no margin of error is used please state that clearly.
 21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
 22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 787 - OVERPUMPING A WATER SUPPLY SYSTEM.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Overpumping a Water Supply System.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

A clear measure that a watershed or a water supply system is at or over capacity is the presence of a waiting list for those wanting water. In the Monterey Peninsula area Pacific Grove, Carmel, Seaside, Monterey and Monterey County all require those wanting water to sign up on a water waiting list.

Water Tables around the world are falling at an average rate of three meters (9.8 feet) a year. The Earth's annual water deficit is at 160 billion cubic meters.
-Worldwatch book: Pillar of Sand: Can the Irrigation Miracle last?

CALIFORNIA HAS STAGGERING WATER SHORTAGES - NOW!
The California Water Plan (Bulletin 160-98 pg 1-2) states that California used 78 million acre feet of water in 1995.

CALIFORNIA USES 5 TIMES AS MUCH WATER AS IT GOT IN 1977
Comparing that figure with the 1977 statewide runoff total of only 15 million acre feet of water (pg 3-6 Bulletin 160-98. This means we needed and used five times (5) as much water in 1995 as the state physically received in runoff in 1977. We used Five Times more water than we get!

This means that taking water from some other area of California is a cumulative impact on the total water of the state.

MONTEREY COUNTY IN WATER CRISIS - NOW!

MONTEREY COUNTY HAS A DESERT CLIMATE
The Salinas Valley was designated on early maps as the "Salinas Desert."
The Monterey Peninsula is not in a rainforest, nor is it in the American Midwest or Deep South where rain often occurs daily - Our Monterey Peninsula is in a semi-DESERT climate. Data collected by the National Weather Service over the past 39 years show that Carmel Valley, the primary water source for the Peninsula, only gets an average of 18 inches of rain a year.

According to Monterey County Water Resources Agency, the Salinas River groundwater basin is overpumped by some 40,000 to 50,000 acre feet more

per year than is replaced by groundwater recharge.

This means that taking water from some other area of Monterey County is a cumulative impact on the total water of the County.

TWO-THIRDS OF ALL MONTEREY PENINSULA IS ILLEGAL - IN TWO DIFFERENT WAYS!
Two-Thirds of all water we get from our kitchen sinks on Monterey Peninsula is ILLEGAL. The primary water supplier for the 105,000 residents of our Monterey Peninsula, Cal-Am, has NO LEGAL RIGHT to pump 70 percent of the water it is taking from the Carmel River.

Any new water connection will worsen an existing illegal situation and worsen a critical health and safety issue for our Monterey Peninsula.

Any new water connection will be pumping illegal water as well.

In addition there is abundant evidence that existing levels of water pumped from the Carmel River is killing US-Endangered Species Act (ESA) listed species! - the West Coast Steelhead (*Oncorhynchus mykiss*) and the California Red-Legged Frog (*Rana aurora draytonii* or "CRLF").

MONTEREY PENINSULA WATER EMERGENCY
The Monterey Peninsula Water Management District declared a "Water Supply Emergency" in 1998 which is still in effect in Nov 2000. A previous Water Supply Emergency was declared in 1990 and was temporarily rescinded prior to 1998 when an additional 150 acre feet of water was added to the Cal-Am system.

WATER WAITING LISTS
Water supply is so constrained, jurisdictions in the Monterey Peninsula Water Management District have Water Waiting Lists (e.g. Monterey County, Pacific Grove, Monterey, Carmel).

CARMEL RIVER IS A FULLY APPROPRIATED STREAM (FAS)
"The Carmel River watershed was added to to the SWRCB's List of Fully Appropriated Streams (FAS) for the period May 1 to Dec 31 (pursuant to SWRCB decision 1632 in 1995)." This means no additional water rights from that source can be had. The Carmel River supplies over 70 percent of the water for Cal-Am to provide to the Monterey Peninsula.

THE MONTEREY PENINSULA HAS A HUGE WATER OVERPUMPING SHORTAGE - NOW!

Physical Water Limit
The Monterey Peninsula is in a permanent state of drought. Its primary water source, the Carmel River runs dry even during wet years.

In 1977 only 3,500 acre feet of water rained into and ran down the Carmel River, yet with the Peninsula used over 18,000 acre feet of water in 1987. More than five times as much water!

More than two-thirds (71 percent) of the water for the Monterey

Peninsula is pumped from the Carmel River watershed. The remainder is pumped from the Seaside basin. Both have been officially declared as overdrafted.

In 1990 the total water allocation (maximum amount of water for human use) for our Monterey Peninsula was reduced from 20,000 af / year to some 17,300 af / year.

In 1977 Monterey Peninsula residents were forced into 50% rationing by the Public Utilities Commission. At that time (1977) humans were endangering the Carmel River by overpumping. In spite of that stern warning, local government officials have repeatedly refused to stop approving new water hookups.

In 1977-78 the State Legislature created the Monterey Peninsula Water Management District which removed the rationing and moratorium. This resulted in a rapid increase in the number of hookups. Since the 1978 rationing and moratorium, the Monterey Peninsula Water Management District has allowed more than seven thousand (~7,800) new water connections and their attendant pumping and river dewatering. This includes three (3) finished golf courses. It does not include three (3) more approved golf courses or three further with approvals that haven't been finished or the three further proposed golf courses which the Water District is expected to allow.

This increase in hookups caused a decrease in the amount of water available for everyone and an increase in dewatering of the Carmel River from overpumping, leading to habitat harm for many animals and plants including "continuing take" of the FESA listed West Coast Steelhead (*Oncorhynchus mykiss*) Steelhead trout and the FESA listed California Red-legged frog.

The increased pumping also increases the risk of harm to physical health and safety to Peninsula residents from losses of water quantity and quality.

CARMEL RIVER PUMPED FAR BEYOND SUSTAINABILITY

Most of the Monterey Peninsula's water is pumped from the Carmel River by Cal-Am, owned by American WaterWorks of New Jersey. Smaller amounts are pumped by Cal-Am from a Seaside aquifer and by some 200 private wells on the Carmel River.

In turning down the September Ranch Project in Sept. 1999 Judge Silver cited how in 1988 Monterey County "as an urgency ordinance, adopted Ordinance 3310. (AR 1209) The findings in support of the Ordinance stated '(A)s a result of such excessive and expanded water usage in the areas defined herein, the potential exists that Monterey County's allocation of water will be exhausted so as to pose an immediate threat

to the public health, safety, or welfare.' Because of this perceived crisis the Ordinance prohibited new development, with certain defined exceptions, which resulted in an increase in the use of water over that level of use existing at the time the Ordinance was applied to the property."

Even pro-Dam advocates admit the Peninsula is out of water - former Water Board member Jim Hughes stated in his (losing) 1999 campaign "I tell cities - We're out of water. So don't come asking me for any." Monterey County Association of Realtors spokesperson Sheryl McKenzie said "There's no water out there." at Water Transfer hearing May 15,00

SEASIDE BASIN OVERPUMPED TOO

All remaining Cal-Am water which does not come from the Carmel River is pumped from the Seaside Basin. "The Seaside Basin is already in an overdraft status. See the Final EIR on this project (e.g. pp. 155, 157, 158) and the Report of California Coastal Commission Staff dated April 22, 1998 (e.g. pp. 4 and 25-28). That same conclusion has been reached by the [Water] District's own consultant. Any further users of the Seaside Basin will only exacerbate the present overdraft condition, invite sea water intrusion thereby potentially destroying the resource for all users, and place greater pressure on the Carmel River basin in direct contravention of the orders of the California State Water Resources Control Board (SWRCB). SWRCB has ordered Cal-Am to reduce its production from the Carmel River Basin (or suffer fines, which fines may be passed on to Cal-Am's ratepayers) and has directed Cal-Am to maximize its use of the Seaside Basin. Under the District's Rule 22 D the District should not grant a permit 'if the Board finds and determines that the permit: 1. Will create an overdraft or increase an existing overdraft; or 2. Will adversely affect that ability of existing systems to provide water to users.'" (Letter to MPWMD from Cal-Am's Counsel September 7, 1999)

ENDANGERED SPECIES TAKEN AND THREATENED

"The Carmel River goes dry - even in good years. It is killing steelhead." US-National Marine Fisheries Service, Senior Advisor Joseph Blum in formal comments to the California Department of Fish and Game Commission Apr 6, 2001 singling out the Carmel river of all rivers in the state because of the dewatering impacts to the ESA listed steelhead and California Red-Legged Frog.

During the 1987 to 1995 time period the steelhead trout run in the Carmel River dropped. It fell to ZERO for four years at the beginning of this decade. Only single digit numbers of the species showed up for 6 of the last 10 years. This, among other things, caused the steelhead to be federally listed and protected under the Endangered

Species Act in 1997.

The California Red-legged Frog was also recently listed (1996) by the US-Fish & Wildlife Service. The headwaters of the Carmel River host one of the three "largest" (really meaning non-tiny) remaining populations of the frog.

In 1997 there was a serious "take" of the steelhead AND the frog, which experts find almost certainly due to overpumping of the Carmel River.

Frog Take - US-FWS letter Dec 10 1997
"Existing water diversions along the Carmel River may be resulting in the take of the threatened The California Red-Legged Frog (*Rana aurora draytonii*)."

"The Service is concerned that water diversions along the Carmel River may be resulting in the take of the threatened California Red-Legged Frog."

Frog Take - US-FWS letter July 20 1997 to the SWRCB Chairman
Titled "Potential Endangered Species Act Violation for the California Red-Legged Frog from Water Diversions on the Carmel River, Monterey County, California."

Watershed Drawdown Impacting Fisheries:
"WR 95-10 Conditions are inadequate in light of the subsequent ESA listing for steelhead and designation of critical habitat and because steelhead are continuing to be taken every year due to the overpumping."
- Comments by Steve Edmondson, Team Leader, Fishery Biologist in the Northern California Habitat Conservation Division of the United States Department of Commerce, National Marine Fisheries Service (NMFS) in testimony to California Water Resources Control Board May 30, 2000 in Monterey, CA.

US-National Marine Fisheries Service, SW Region letter Nov 6 1991
Draft EIR comments:
"Excessive drawdown of [the Carmel Valley and Seaside] aquifers results in a dry lower Carmel River, such that river flow does not reach the sea, preventing steelhead migration." "As the populations and water demand grow, mandatory water rationing and water shortages during droughts will be more severe, and fisheries impacts could worsen."

"We are not sure whether either the CDFG instream flow recommendations or the MPWMD flow recommendations are appropriate to adequately restore the steelhead run."

Steelhead Take - US-Nat. Marine Fisheries Svc, SW Region letter Oct 10,97
"...Water District Senior Fisheries Biologist Dave Dettman counted 289 dead juvenile steelhead in the Robinson Canyon to Shulte Road reach of the Carmel River. Mr. Dettman observed that the cause of the fish kill was due to no, or minimal flows, and high water temperatures. The fish kill was attributed to pumping rates at

Cal-Am wells in excess of Stream flows, and recharge capacity. If these allegations are true, Cal-Am's practices could be significantly affecting a fish species that NMFS has listed for protection under the ESA."

Overpumping a stream reduces it to pools connected only by dry riverbed.
SWRCB Memorandum Nov 1999 in File 262.0(27-08-01) - "[W]hen the fish are confined to pools such as this, the opportunity for predation is significantly higher than during periods of continuous flow..." (pg 7)

"[L]ow [streamflow] flow periods are times when aquatic organisms are most susceptible to predation. Although the stream habitat may exhibit the capability to support large numbers of fish at a relatively low flow, there are significant population declines among aquatic organisms during these periods because the aquatic habitat is more accessible to land and avian predators." (pg 10)

Carmel River Steelhead Population Importance:
US-National Marine Fisheries Service, SW Region letter May 20 1996
"...given the importance of the Carmel River Steelhead population for recovery of steelhead coastwide,..."

This adverse physical environmental impact of dewatering a river is distinct from a legal right to pump water. Monterey County agencies are uniformly ignoring this distinction as of May 1999 and asserting that if a party has a legal right to water - no physical environmental impact exists. Agencies blatantly ignoring this include: The Monterey Water Management District, Monterey County (Pebble Beach Lot Program EIR), Pacific Grove (dozens of building permits per month), Seaside (Mariott Hotel) and Sand City (Dunes Hotel).

Also during this 1978 to 1995 period California-American Water Company (the Peninsula's main water provider) was pumping a significant amount of water without legal water rights. In 1995, after dragging their feet for eight (8) years since the first complaint, the CWRCB ordered Cal-Am to cut back their water pumping to the amount of legal rights they owned. This cut some 11,000 af out of a normal 16,000 af of water pumped yearly. Failing to comply with the 1995 order Cal-Am was fined \$168,000 in 1997 by the CWRCB.

NEW FIRE PROTECTION NEEDS AS OF MARCH 1999
The PUC Requires Cal-Am to provide fire service water connections to any property within the Cal-Am service area regardless of where the property's water supply originates.
"This ... has the potential to make it more difficult for Cal-Am to achieve the water production goal set by the State Water Resources Control Board (SWRCB) in its Order No. 95-10. Fire services require periodic flushing and testing, and fire hydrant testing contributes to the amount of unaccounted water use within the Cal-Am system."

-MPWMD Staff Agenda Report pg 53, March 15 1999

NEW CONNECTIONS CONTINUE

In the meantime, in the very face of "severe" rationing, Cal-Am and the District continue to allow new users to hook up to their water system. Among other projects Cal-Am recently hooked up a Car Wash at the mouth of Carmel Valley. Pacific Grove approved a 50,000 square foot expansion of a Supermarket on May 6 1998. Pebble Beach Company proposes another golf course and 350 houses. Carmel Valley's September Ranch was approved in December 1998 to build 100 houses and an Equestrian center. Although a judge turned the project down in Sept. 1999 in part because of a lack of water, the developer intends to try again.

Monterey Peninsula Water Problem Definition

Our Peninsula needs enough water during drought years to fully protect the public trust resources of the Seaside Basin, the Carmel River and its fish, vegetation and animals and to supply current users. Currently the Carmel River is overpumped in excess of legal rights and to the detriment of the public trust resources. The problem is increasing because new water hookups are approved regularly.

The cause of the problem is that Peninsula government has been unwilling to live within its water resource limits. No "Carrying Capacity" population number has ever been established for the existing water available.
In Cadiz, Spain the water was literally turned off at night (9pm to 7am) from March 1992 to June 1995 due to "the worst drought of the century". We can look forward to Cadiz's problem here if we continue to avoid responsibility for staying within the limits of our existing water resources.

(1) Cal-Am Water Production (1940 - 1993) Final EIR March 1994. (and MPWMD Manager Darby Feurst phone call Aug 1, 1997.)

(2) Non-Cal-Am pumping in Carmel River Watershed (MPWMD Manager Darby Feurst phone call Aug 1, 1997.)
Alluvial Aquifer wells 1862 af (July 95 - June 96)
Upland wells 201 af (July 95 - June 96)
Total 2063 af

Seaside 4429

(3) Estimate from historical pumping of Carmel River and its effects on Steelhead. There is some concern that no water can be drawn from the river in severe drought years without harming the endangered Steelhead and other river dependent life. To insure the recovery of the Steelhead we must use conservative caution with a reasonable margin for error.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Overpumping a Water Supply System.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 788 - PUBLIC TRUST WATER QUANTITY LOSS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Public Trust Water Quantity loss.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Public Trust water needs often come BEFORE additional water demands.
The Federal Endangered Species Act compliance supersedes ALL state water rights law. Several species (Coho Salmon, Steelhead Trout, California Red-legged Frog) are seriously endangered and federally listed and require substantial amounts of water from streams, groundwater and surface water in California that is also used by people and agriculture. Water for them takes precedence to pumping drinking water.

Under CEQA alone, economic factors can override or outweigh, environmental impacts on any species. However, under the US-ESA, economic factors cannot override or outweigh, environmental impacts on a listed species. The US-ESA mandates that listed species must be protected "whatever the cost."

The Supreme Court wrote in *Sweethome v Babbitt*: "The plain intent of Congress in enacting this statute," we recognized, "was to halt and reverse the trend toward species extinction, WHATEVER THE COST.
(emphasis added) This is reflected not only in the stated policies of the Act, but in literally every section of the statute."
Sweethome v Babbitt 98 S.Ct., at 2297.

Water: Legal vs Physical Water impacts
The Physical Impact from an Increase of current pumping is different from a Legal water rights analysis.

The Carmel River is currently overpumped at a certain level. At the current level the overpumping threatens two officially federally listed species by further dewatering the Carmel River.

"WR 95-10 Conditions are inadequate in light of the subsequent

Endangered Species Act listing for steelhead and designation of critical habitat and because steelhead are continuing to be taken every year due to the overpumping."

Comments by Steve Edmondson, Team Leader, Fishery Biologist in the Northern California Habitat Conservation Division of the United States Department of Commerce, National Marine Fisheries Service (NMFS) in testimony to California Water Resources Control Board May 30, 2000 in Monterey, CA.

This project will increase that pumping by a large amount, by some number of acre feet of water per year. The project's increase in pumping will further significantly threaten at least two species including the California Red-Legged Frog (*Rana aurora draytonii*), and the West Coast Steelhead (*Oncorhynchus mykiss*) and their habitat. The project's increase in pumping will further significantly impact the quantity and quality of the Peninsula drinking water supply.

"CEQA Guideline 15151. Standards for Adequacy of an EIR Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts."

It is not any favor to the applicant to allow the EIR to proceed without this subject discussion. To be legally adequate this must be described, even if you find it unpersuasive.

We recommend that an absolute threshold of significance is reached when more water is physically pumped than is refilled by direct and indirect recharge. Any additional water pumping, no matter how small, causes a significant dewatering impact when the Water table is permanently descending.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Public Trust Water Quantity loss.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 789 - OZONE AS A SOIL FUMIGANT ALTERNATIVE.

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of
Ozone as a Soil Fumigant Alternative.

SoilZone Inc of Sunnyvale, CA has patented a Methyl Bromide Alternative consisting of using Ozone instead of Methyl Bromide (MB). The method kills pests and then within minutes converts into regular oxygen. It is far safer for humans to handle and for those who live and work in the area it is applied. The costs per acre are roughly equivalent to MB. US-EPA's Bill Thomas said "The preliminary research results with ozone look very promising. I think it is worth pursuing." Mar 8 1998 West Magazine (San Jose Mercury)

For more info: ozone21@worldnet.att.net; and
www.epa.gov/ozone/mbr/mbrqa.html

This Alternative does not require any non-off-the shelf technology.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or

assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

-

* 790 - STEAM AS A SOIL FUMIGANT (E.G. METHYL BROMIDE) ALTERNATIVE.

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of Steam as a Soil Fumigant (e.g. Methyl Bromide) Alternative.

"Steaming can be a viable alternative to methyl bromide for soil and

growth media greenhouses and some small-scale field nurseries."

The advantages of steam sterilization are that it can be a highly efficient, cost effective technology for the control of soil-borne pathogens, pests and weeds; it eliminates the need for tarps and fumigants; it can be a neat, clean, and easy to use control technology, leaving no toxic residues or fumes and therefore less harmful to other greenhouse crops and growers (with no toxic fumes, workers can harvest or plant new cuttings in adjacent fields). In addition it is non-selective (lethal to all pests). Steam requires little aeration time steamed soils can be planted as soon as they cool, whereas chemically treated soils can have a relatively long treatment and aeration period) and it can be combined with other pest management practices.

"The steam rake and the steam blade have been used extensively in nursery fields."

US-Environmental Protection Agency "Alternatives to Methyl Bromide, Vol 3"

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

*** 791 - ELECTRICAL STERILIZATION OF FIELDS SOIL FUMIGANT ALTERNATIVE.**

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of
Electrical Sterilization of Fields Soil Fumigant Alternative.

High voltage (20,000 to 50,000 volt), low amperage electrical charges applied to soils can sterilize fields quickly, without toxic residue or fumes, especially in wet soils. It eliminates the need for tarps and fumigants; it can be a neat, clean, and easy to use control technology, leaving no toxic residues or fumes and therefore less harmful to other greenhouse crops and growers (with no toxic fumes, workers can harvest or plant new cuttings in adjacent fields). In addition it is non-selective (lethal to all pests). Electrical charges require little aeration time. Soils can be planted immediately, whereas chemically treated soils can have a relatively long treatment and aeration period) and it can be combined with other pest management practices. It works well in wet soils where steam is less effective.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

*** 792 - AIR POLLUTION-PAVING (HOT OIL SMOKE).**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Air Pollution-Paving (hot oil smoke).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

The Paving process creates toxic concentrated hydrocarbon air pollution.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Air Pollution-Paving (hot oil smoke).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 793 - FIREWORKS EVENTS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Fireworks Events.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Fireworks Events can cause large concentrated toxic and radioactive air pollution and hazardous waste.

Green fireworks explosions are caused by barium, bright reds or crimson colors are caused with strontium.

All of barium's water and acid soluble compounds are poisonous. Barium carbonate is used as a rat poison.

Strontium is a radioactive metal, one isotope having a half-life of 28 years.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Fireworks Events.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 794 - AIR POLLUTION-FOREST FIRES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Air Pollution-Forest Fires.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Forest Fires increase the baseline of a region's air pollution. Even though natural, the millions of pounds of particulates need to be included in air pollution limits for an air quality management plan.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Air Pollution-Forest Fires.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 795 - ACTIVITY INCREASING FIRE DANGER.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Activity increasing Fire Danger.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Large area tire storage increases fire danger as tire fires are often
ignited by natural lightning.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Activity increasing Fire Danger.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 796 - FIRE FIGHTING IMPACTS.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Fire Fighting Impacts.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Fire fighting can cause many environmental impacts. Bulldozing for fire breaks and access can leave geological scars which never heal and cause increased erosion. The 1998? fire fighting operation in Monterey County's Ventana Wilderness some 92 miles of bulldozer roads were cut.

Backfires can trap animals between the two fire lines.

Fire fighting aircraft cause noise affecting humans living nearby and wild animals.

Fire fighting helicopters can use millions of gallons (many acre feet) of water in an area under water use restrictions.

Fire retardant can change the soil composition and cause water and air pollution both before and after it is burned.

Please list all chemicals used in fire retarding.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Fire Fighting Impacts.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 797 - PRESCRIBED TREE OR VEGETATION BURNING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Prescribed Tree or Vegetation Burning.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Deliberate fires, or Prescribed Tree or Vegetation Burning can cause a number of significant environmental impacts including: human death, animal death, vegetation death, both leading to species extinction, human health harm, animal health harm, home and building structure loss, structure damage, wildlife habitat loss, explosions, release or creation of toxic air pollutants, increased waterbody pollution, from toxics, increased erosion from vegetation denuded soils, soil death and

impairment, aircraft range limits, visual aesthetic loss (ugly smokey skies and orange shadows), and repugnant smells.

NO CONTROL

Prescribed burns often get out of control and damage property. They would more accurately be called "Prescribed Arson." As Stephen J. Pyne of Arizona State University points out, some of the most deadly fires of the past 20 years were prescribed burns gone awry." - Scientific American, Aug 2000

According to the National Interagency Fire Center 257 Prescribed Burn fires got "out of hand." Ibid

"A blaze that was set to clear [900 acres of] brush, raged out of control over the weekend and spread into Los Alamos, burned homes Wednesday, forcing the evacuation of al 11,000 residents in the town, site of America's most storied nuclear laboratory." AP May 11, 2000

The [Cerro Grande] fire had burned at least 1,950 acres as of May 9, 2000

A further 14,000 people from surrounding communities were also ordered out of their homes. Some 405 families were left homeless. The fire had burned 46,000 acres as of May 17, 00. Preliminary estimates put the damage at 1 Billion dollars.

The Cerro Grande fire "raged for more than two weeks, consuming some 50,000 acres of National Forest and land on ad around Los Alamos National Laboratory. It destroyed 230 or so homes, displaced thousands of people, came perilously close to a hazardous-materials sites on the nuclear weapons research facility, scorched percious habitat for the threatened Jemez Mountains salamander..." -Scientific American, Aug 2000

"The US Forest service said it did the right thing in igniting a controlled fire that leaped out of control and scorched more than 700 acres this week." The "Hemlock Burn" fire near Running Springs, California destroyed an unoccupied homestead with a cabin, barn and shed and prompted the evacuation of a campground. AP June 17, 2001

AIR POLLUTION

Prescribed burns always cause particulate air pollution.

Since 1996 the federal government has burned almost 8 million acres of "national forest, park land, and public ranges" - an area equal to New Jersey and Connecticut combined. Fourteen percent (14%) of the fires burned out of control.

* "There are very few long-term studies on the effects of fire applied to ecosystems, says Ronald Myers, director of fire management at the nature Conservancy." There are virtually no data on how various treatments mimic the ecological functions of fire." -Scientific American, Aug 2000

When the Fort Ord, California military base closed, the US-Army left some 15 square miles contaminated with explosives, ammunition, rockets, bombs and chemical weapons.

Rather than allow public review of their burning plans and good faith response to public concerns, the ARMY planned to burn 18,000 acres in secret and refused to involve the public in the decision.

100 acre fire conveniently expands to 700 acres On August 25th 1997, the Army began burning what they claimed would only be some 100 acres. With explosives "crackling like popcorn" some burning ammunition flew great distances and started wildfires that got out of control. They tried to put it out but "there was too much ordnance detonating." Before the ARMY could contain the fire it had burned some 700 acres. By an astounding coincidence they Army had hoped to burn all of those 700 acres, but had been prevented from it by residents persistent complaints about smoke in their homes and school children being choked in classrooms.

The Army admits knowing that exploding ordnance can, with 100 percent certainty, fly 4000 feet in any direction (one and a half mile diameter) and begin secondary fires. Ft Ord EE/CA 1994

The Air Pollution Control District was so angry they sued the ARMY. The smoke plume is described in court documents as extending some thirteen miles down the Salinas Valley. Air District experts describe the burn as "gross disregard for not only the law but for the health and safety of the community."

Twenty-three (23) homes in Lewiston, near Redding, California were destroyed by a prescribed burn set by the Bureau of Land Management in July 1999. As of May, 2000 225 claims were filed, but the government has settled only 75 paying out a mere \$270,000 total.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Prescribed Tree or Vegetation Burning.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 798 - POISON OAK BURNING.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Poison Oak Burning.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

In California, the poison oak shrub or vine is everywhere except the "inner city", the hotter deserts, and above 4,000 feet elevation. Shrubs are usually 12" to 30" high, or a tree-climbing vine, with triple leaflets and short, smooth hair -Boy Scouts of America website

"Never burn the plants. The urushiol can spread in the smoke and cause serious lung irritation." - FDA Consumer magazine (September 1996)

"Urushiol can be vaporized when exposed to a fire. If you have a neighbor who is burning poison ivy, the resin will rise with the smoke. If you are downwind when the resin cools off and rains back down to earth, you could receive a coat of urushiol on any uncovered areas resulting in a surprise case of poison ivy." "Under no circumstances should you burn the plant; the smoke is as potent as the plant itself. Inhaling the smoke can produce a systemic reaction, including potentially serious, and life-threatening, lung inflammation." Charles H. Booras, M.D. Board certified Family Physician since 1984. Listed in "The Best Doctors in America", 2000. Listed in "How to Find the Best Doctors: Florida - 1st Edition".

Caution: Burning poison oak can result in a dangerous smoke that can cause severe symptoms to the eyes, nose, throat and lungs. -UC Davis Health System Website

Burning poison oak results in an extremely dangerous smoke that can cause severe symptoms to the eyes, nose, throat and lungs. A severe allergic reaction from inhaling the smoke, "anaphylaxis", is life-threatening.

Burning is not recommended as inhaling dust and ash from the smoke can result in poisoning of the lungs that can require hospitalization.

"Never burn the plants. The urushiol carried in smoke from burning poison ivy is extremely toxic. It can cause lung infections and a rash all over one's body." -The Cooperative Extension Service includes The University of Georgia and Ft. Valley State University, the U.S. Department of Agriculture and counties of the state of Georgia.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of

Poison Oak Burning.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 799 - CREOSOTE SMOKE FROM BURNING BRUSH.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Creosote Smoke From Burning Brush.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

CREOSOTE is on California's Prop 65 List of Known Carcinogens.
Creosote is a wood preservative on EPA's list of materials classified as restricted use in 1985. It is in the Group B1 Pesticides "Probable Human Carcinogens with Limited Human Evidence"

"Restricted Use" means:
"A pesticide that is available for purchase and use only by certified pesticide applicators or persons under their direct supervision. This designation is assigned to a pesticide product because of its relatively high degree of potential human and/or environmental hazard."
Source: www.epa.gov/pesticides/carlist/table.htm updated June 11, 1998
Creosote also has a powerfully repugnant smell that lasts years and on hot days can be detected dozens of meters from the source.

Please discuss all uses and especially distances from water, wetlands or other wild habitat and the potential impacts on threatened and endangered species.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Creosote Smoke From Burning Brush.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 800 - SMOKE HARM TO ENDANGERED SPECIES.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Smoke Harm to Endangered Species.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Smoke Harm to Endangered Species.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 801 - BURNING PLANTS WITH ABSORBED TOXICS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Burning Plants with Absorbed Toxics.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Burning Plants with Absorbed Toxics.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 802 - SCHOOL ABSENTEEISM.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
School Absenteeism.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

School Absenteeism Rises When Air Pollution Rises
"Effects of ambient air pollution on School Absenteeism Due to Respiratory Illnesses", Report sponsored in part by US-EPA & CARB.
www.epidemiology.com

Ozone increases in the air were found to be associated with a 63% increase in illness related absence rates and an 83% increase in respiratory illnesses.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of School Absenteeism.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 803 - GLASSWOOL FIBERS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Glasswool fibers.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Glasswool fibers, used in household insulation, are known carcinogens on the California Proposition 65 list.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Glasswool fibers.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 804 - SPECTROMETER ASSAY.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Spectrometer Assay.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Spectrometry can reliably identify specific molecules, but requires

knowing exactly which molecule to detect. The spectrographic signature of some chemicals can mask and hide others. Sample must be prepared for a specific chemical.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Spectrometer Assay.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 805 - BIO-ASSAY.

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of Bio-Assay.

Detection of pesticides and toxics can be widened by magnitudes over spectroscopy using a bioassay such as Ah-Immuno-Assay(tm) or CALUX (tm). They are used widely to detect dioxins and PCBs. They can detect in range of parts per trillion with sample of only a few grams. One sample test cost is around \$200 in 2001.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

* 806 - USE OF THE TOP 20 HAZARDOUS SUBSTANCES ATSDR/EPA PRIORITY LIST.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of

Use of the Top 20 Hazardous Substances ATSDR/EPA Priority List.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

ATSDR - ATSDR/EPA Top 20 Hazardous Substances 1995 Agency for Toxic Substances and Disease Registry (Under the U.S. Public Health Service)

This annual evaluation activity fulfills the conditions of CERCLA section 104 (i), as amended, which requires ATSDR and EPA to revise the priority list of hazardous substances (N=275) periodically to include additional hazardous substances.

Each chemical is identified with a Rank Number and includes an ATSDR Public Health Statement.

The Public Health Statements were prepared by the ATSDR Division of Toxicology. They provide general information on the properties of the chemical and answer many health concerns that are voiced by community groups. A full list of the ATSDR Toxicologic Profiles and Public Health Statements can be accessed through the ATSDR HazDat.

The full priority list of hazardous substances (N=275) for 1995 can be accessed HERE!
Top 20 Substances:

Lead
Arsenic
Mercury, Metallic
Vinyl Chloride
Benzene
Polychlorinated Biphenyls (PCBs)
Cadmium

Benzo(a)pyrene
Chloroform
Benzo(b)fluoranthene
DDT, P'P'-
Aroclor 1260
Trichloroethylene

Aroclor 1254
Chromium(+6)
Chlordane
Dibenz[a,h]anthracene

Hexachlorobutadiene
DDD,P'P'-
Dieldrin

U.S. Department of Health and Human Services Public Health Service
Charlie Xintaras / chx1@cdc.gov;
http://atsdr1.atsdr.cdc.gov:8080/cxcx3.html

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Use of the Top 20 Hazardous Substances ATSDR/EPA Priority List.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that

number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 807 - CHEMICAL AND PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Chemical and Pesticide Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Pesticides are deadly to humans and animals. They are intended and designed to kill animal and plant life. Almost all pesticides kill unintended victims. In the words of the US-EPA "Pesticides are not 'safe.' They are produced and used specifically because they are toxic to something."

HUMAN PESTICIDE POISONINGS

"As many as 67,000 cases of human pesticide poisoning occur worldwide each year, some of which are fatal." Environmental Science; Morgan, Moran & Weirsma; W.C. Brown Pub. 1993, p 178

"Somewhere between 400,000 and 2 million people suffer from acute pesticide poisoning every year: between 10,000 and 40,000 of them die." WWF, 1990

! Pesticides are designed and applied to kill. Some 428 cases of human pesticide poisoning were reported to public officials in Monterey County during a six year period. Fifty 50 cases of human pesticide poisoning were reported in Monterey County in 1996.

U.S. industry currently uses roughly 70,000 different chemicals.
According to U.S. Environmental Protection Agency (EPA), as of October, 1996, there were 75,857 chemical substances in commercial use. The US produced some 435 Billion pounds of synthetic chemicals in 1992 which

is about 1600 pounds per American.

There are about 630 different "active ingredients" in pesticides worldwide. In real-world use, these main ingredients are combined with other chemicals (some are called "inert ingredients") to make several thousand toxic formulations -- but the basic active ingredients number about 630. In 1992 4.5 Billion pounds of pesticides were used in the U.S. which is about 18 pounds per person.

The purpose of a pesticide is to kill living things, so it is no surprise that these 630 chemicals are all toxic. In many cases -- especially the newer pesticides -- they are very toxic. For example, the most commonly-used insecticide is called chlorpyrifos (trade name: Dursban). Dursban attacks the central nervous system so effectively that one-fifth of an ounce is sufficient to kill an adult human. A fraction of that amount could kill a child.

According to the 1999 book "Our Stolen Future" - virtually anyone willing to put up the \$2000 for tests will find at least 250 chemical contaminants in their own body fat.

In addition to the original chemicals, unique metabolites and degradation products can develop during use and disposal. To give but one example: trimethylamine can be converted to the powerful carcinogen, dimethylnitrosamine.

The Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, Emergency Planning and Community Right-to-Know Act (Sec 313), and Occupational Safety and Health Act each regulate a set of pollutants as toxic or hazardous. Each set of pollutants is significantly different from the others.

! 1,134 pollutants or classes of pollutants are regulated under at least one of these five statutes.

! Almost 800 are regulated under only one health protection law.

! A total of 579 pollutants are regulated under at least one of three statutes--the Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act.

! Only 63 chemicals are regulated under all three laws.

! Only 49 chemicals are regulated under all five health protection laws.

According to Yale University professor John Wargo in his new book "OUR CHILDREN'S TOXIC LEGACY" -

! Nearly one-third of the pesticides now in use are suspected of causing cancer in laboratory animals.[pg.5]

! Another third of the pesticides in use are thought capable of disrupting the human nervous system;

! Many others are suspected of disrupting the endocrine (hormone)

system that regulates growth, development and healthy functioning in fetuses, children, and adults.

Monterey County industry generated 572 tons of pesticide waste in 1986 and was projected to generate 540 tons in 2000. Monterey County Hazardous Waste management Plan 1989 p 5-22

1. LIST OF POTENTIAL POISONS

For each potentially chemically hazardous Product proposed for use or normally used (e.g. pesticides, products with heavy metals, fuels, or air polluting activities such as diesel vehicles and asphalt roofing, etc.) please clearly describe:

A. all potentially hazardous Chemical components including:
Proposition 65 Chemicals
Fertilizers
Commercial Pesticides
Home Pesticides
Petrochemicals

Fertilizer Nitrate
Fertilizer Flourine
Chlorinated hydrocarbon pesticides (e.g. DDT, aldrin, chlordane)
Swimming pool chlorine

Chlorocycloclodiene pesticides (e.g. Aldrin)
Carbamate pesticides (e.g. Carbaryl)
Inorganic pesticide compounds (e.g. Arsenic, NaF)
Chlorocycloclodiene pesticides (e.g. Aldrin)
Carbamate pesticides (e.g. Carbaryl)

Organophosphorus pesticide compounds (e.g. Diazinon and Malathion)
Glyphosate and its metabolites aminomethylphosphonic acid and formaldehyde (a prop 65 carcinogen)
PCBs
Dioxins
Flourine in Fertilizers
Pentachlorophenol in Telephone poles (Prop 65 known carcinogen)

B. All chemicals EPA lists as "inerts." "Inerts" are sometimes more deadly than the active chemicals.

Commercial formulations of pesticides are normally different than the pure chemical formulations used for EPA registration toxicity testing.

This can make the toxicity testing underestimate, sometimes severely, the toxic impacts of the product as applied.

There are three types of chemical additives that are missing from most testing: contaminants of manufacturing processes, toxic waste deliberately added from chemical reactor cleaning processes and "inert" ingredients. Source: Warren Porter, et al., "Endocrine, immune and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations," Toxicology and Industrial Health (1999) 15, 133-150.
University of Wisconsin-Madison.

A Federal Court wrote:
"EPA has found approximately 40 "inert ingredients" to be of toxicological concern after testing them and has determined that approximately 65 others are potentially toxic." "More than two

thousand inert ingredients are used in pesticides however, and most of them have not been tested by EPA or evaluated for toxicity." NCAMP v. EPA 941 F.Supp 197, 198 (1996)

Inerts can be solvents, organic soaps or surfactants that hasten pesticide penetration through the cuticle and the stomata of leaves. The analogous surfaces in animals are the skin and the respiratory system.

Standard toxicological tests are typically performed without testing the inerts used in commercial preparations that can alter the properties of pesticides and influence the route of exposure. Source: Warren Porter, et al., "Endocrine, immune and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations," Toxicology and Industrial Health (1999) 15, 133-150. University of Wisconsin-Madison.

In 1984, the U.S. Environmental Protection Agency (EPA) began to take its first, crude look at the approximately 1,450 "inert" ingredients it has registered for unlabeled use in U.S. pesticide formulations. EPA subsequently released a list of the ingredients and made a number of startling admissions:

1. Approximately 40 of the "inert" ingredients are known to cause cancer, nerve damage, other chronic effects, or adverse reproductive effects. These "inerts" include asbestos, carbon tetrachloride (banned as an active pesticide ingredient), and trichloroethylene. In 1987, EPA indicated these inerts must be listed on the pesticide label, but there is no evidence that EPA enforces this policy. All the other 1,400 or so inert ingredients do not have to be listed on pesticide labels.

2. Approximately 65 of the secret ingredients are classified "potentially toxic inerts/high priority for testing" because their chemical structure or existing data suggest toxicity. These "inerts" include xylene, cresols, and methyl bromide (a highly toxic fumigant and neurotoxin). Yet U.S. EPA decided not to require testing for these ingredients.

3. Approximately 1,050 of the secret ingredients are considered "inerts of unknown toxicity." EPA does not require testing to determine their toxicity. These ingredients include:

(a) Chemicals known to be toxic (e.g., POEA or polyoxyethyleneamine, naphthalene, and zinc). POEA is present in Monsanto's glyphosate formulations Roundup and Vision. The POEA is 400 times more toxic to immature salmon than a glyphosate formulation, Rodeo, that contains no POEA. It belongs to a class of surfactants that have been reported to cause adverse gastrointestinal and central nervous system effects and damage to red blood cells. POEA is contaminated with 1,4-dioxane, a chemical that causes toxic effects in the liver and kidneys of

humans and various cancers in numerous animal species and is listed as a Prop 65 human carcinogen.

(b) Mixtures of toxic chemicals (e.g., chlorinated rubber, "Chicago sludge," and tall oil, byproducts of paper manufacturing).

(c) Compounds that would appear to be problematic because they belong to chemical groups of concern (e.g., toluene in toluene sulfonate, benzene in strontium dodecylbenzene sulfonate, and cresol in 2,6-di-tert-butyl-4-cresol).

(d) "Blacked-out" chemicals. Approximately 295 inerts have been "blacked-out" since 1985 while EPA supposedly considers whether to release their names (they still would not be listed on the pesticide label). EPA currently is being sued by a citizens' group to reveal the names of these ingredients.

(e) Known endocrine disruptors including nonylphenols and bisphenol-A.

4. Approximately 300 "inerts of minimal concern" include ingredients considered innocuous - chemicals that may be toxic but whose current use patterns supposedly "will not adversely affect public health and the environment."

5. Petroleum distillates pose a particular problem. According to EPA, they "...occur in about 80% of all pesticide formulations as inerts or actives and pose significant regulatory problems." Certain components of these distillates (the polynuclear aromatic hydrocarbons) have a "high potential" for causing cancer "and the aliphatic content may pose problems as well."

Toxic Ingredients Hide as "Inerts" in Pesticides
A January 16, 1998 report "Worst Kept Secrets: Toxic Inert Ingredients in Pesticides," released by the Northwest Coalition for Alternatives to Pesticides (NCAP) documents the hazards of so-called "inert" ingredients, over 2,500 substances that are added to pesticides but are not named on product labels. Over 650 chemicals that have been identified as hazardous by federal, state, or international agencies are hiding behind the misleading word "inert" in pesticide products, according to the report.

The report lists the following examples of what it calls "active inerts"--ingredients that are or have been registered in the U.S. for use as active ingredients in some pesticide products, but have been cleared for use as inerts in other products and are listed as inerts of unknown toxicity:

-- Chlorothalonil has been classified as a probable human carcinogen by a U.S. EPA Scientific Advisory Panel.

-- Coal tar has been listed as a known human carcinogen by the International Agency for Research on Cancer.

-- Chloropicrin is a severe respiratory tract irritant and listed by U.S. EPA as a Restricted Use Pesticide.

In 1997, IARC classified two commonly used inerts as known carcinogens: crystalline quartz silica and cristobalite. Neither is required to be listed on pesticide product labels, and, based on information obtained by NCAP from a Freedom of Information Act request to EPA, crystalline quartz silica can be found as an inert ingredient in at least 1,560 pesticide products. Cristobalite, a known carcinogen (according to the International Agency for Research on Cancer), is an inert ingredient in over 1,500 pesticide products.

Butylated hydroxyanisole (BHA) is also among the 1,981 pesticide inerts included on List 3, "Inerts of Unknown Toxicity." However, in 1987 the International Agency for Research on Cancer (IARC) classified BHA as a possible carcinogen, and according to EPA's own criteria, chemicals that have been assessed as known, probable or possible carcinogens by IARC qualify for List 1. This discrepancy is particularly troubling because BHA is a commonly used antioxidant in butter, vegetable oils, cereals, baked goods, potato chips, meat products and many other foods.

C. Toxic Waste Deliberately Added From Chemical Reactor Cleaning Processes
There are three types of chemical additives that are missing from most testing: contaminants of manufacturing processes, toxic waste deliberately added from chemical reactor cleaning processes and "inert" ingredients. Source: Warren Porter, et al., "Endocrine, immune and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations," Toxicology and Industrial Health (1999) 15, 133-150. University of Wisconsin-Madison.

D. Contaminants of Pesticide Manufacturing Processes
There are three types of chemical additives that are missing from most testing: contaminants of manufacturing processes, toxic waste deliberately added from chemical reactor cleaning processes and "inert" ingredients. Source: Warren Porter, et al., "Endocrine, immune and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations," Toxicology and Industrial Health (1999) 15, 133-150. University of Wisconsin-Madison.

E. All degradation byproducts and metabolites of -
1) Each active component, and
2) Each "inert", and
3) Each Permitted Contaminant of Pesticide Manufacturing Process
(e.g. Up to 15% of a pesticide can be DDT which is still allowed by EPA and FIFRA as an "impurity" in insecticides including chlorobenilate and dicofol. (Living in the Environment pg 627)
DDE is a degradate of DDT. As little as 1.0 ppm of DDE causes higher rates of ambiguous development of sex organs of alligators.
OSF p 153

2. USE

For each of the products, chemicals, inert components and degradation byproducts identified in Section 1 which could be potentially used in this project, its construction or its operations and maintenance -

A. the maximum total pounds, kilograms or gallons of use during construction.

B. the maximum total pounds, kilograms or gallons used per year in operations.

C. how often it will be specifically tested for during construction.

D. how often it will be specifically tested for during operations.

E. Maximum Dose concentration during construction.

F. Maximum Dose concentration during operations.

3. TOXICITY

For each of the products, chemicals, inert components and degradation byproducts identified in Section 1 which could be potentially used in this project, its construction or its operations and maintenance, please:

A. WILDLIFE

1) Identify their wildlife toxicity levels (the LD50 and LC50) and the source of the data.

1a) Identify their wildlife toxicity levels (the LD-10 and LC-10) If the LD 50 & 10 values are not known please state this clearly. If the LC 50 & 10 values are not known please state this clearly.

2) identify, describe and quantify their bioaccumulative effects.

3) identify and quantify their individual and combined effects on Each US and State listed species which could potentially come in contact with the toxic materials used for this activity.

4) identify whether US-FWS or NMFS has ever completed a Biological Opinion for the chemical and the name and date of the BO if they have.

5) identify and quantify their individual and combined effects on the Habitat of EACH US and State listed species which could potentially come in contact with the toxic materials used for this activity.

6) identify and quantify their individual and combined effects on the food chain of all species listed on all US and State endangered species lists.

B. HUMANS

For each of the products, chemicals, inert components and degradation byproducts identified in Section 1 which could be potentially used in this project, its construction or its operations and maintenance - please identify and quantify the acute and chronic and subchronic impacts in each of the following areas -

1) identify and quantify their Human Carcinogenic effects

2) identify and quantify their Gender specific effects
3) identify and quantify their Birth Defect effects
4) identify and quantify their Mutagenicity effects
5) identify and quantify their Teratogenicity effects

6) identify and quantify their Central Nervous System effects
7) identify and quantify their Cardiovascular effects
8) identify and quantify their Kidney damage
9) identify and quantify their Liver damage
10) identify and quantify their Periphral Nervous System effects

11) identify and quantify their Immunological effects
12) identify and quantify their Gastrointestinal effects
13) identify and quantify their Reproductive effects
14) identify and quantify their Embryotoxicity effects
15) identify and quantify their Lung and respiratory effects

16) identify and quantify their Endocrine effects
17) identify and quantify their Blood cell disorder effects
18) identify and quantify their Skin damage
19) identify and quantify their Visual damage
20) identify and quantify their Allergic sensitization

If any of the above tests has not been conducted, please state clearly which tests those are.

In 1984 the National Research Council (NRC) of the National Academy of Sciences studied a random sample of 100 chemicals chosen to fairly represent the roughly 3000 chemicals produced each year in quantities exceeding one million pounds. The NRC concluded in 1984 that 78% of these chemicals lacked even "minimal toxicity information." [1] In 1997, Environmental Defense Fund (EDF) asked the same question to see if the chemical industry and EPA have made progress since 1984. EDF reports that, [as of 1997], 71% of the chemicals examined lack minimal toxicity information. [1] National Research Council, TOXICITY TESTING (Washington, D.C.: National Academy Press, 1984).

A Potential Resource for your Data The Registry of Toxic Effects of Chemical Substances (RTECS) is a non-bibliographic database of toxicological information on some 130,000 chemicals maintained by the National Institute for Occupational Safety and Health (NIOSH). In addition to regulatory standards and updates on governmental agency activities, RTECS contains information on six main toxicity areas: primary irritation, mutagenic effects, reproductive effects, tumorigenic effects, acute toxicity, and other multiple dose toxicity.

C. For EACH of the products, chemicals, inert components and degradation byproducts identified in Section 1 which could be potentially used in this project, its construction or its operations and maintenance - please identify and quantify their half lives.

C1. For EACH Define and quantify "Benign."

C2. For EACH Identify and quantify their degradation time to Benign.

D. For EACH identify and quantify their ability to migrate throughout the varying aquifer and river environments.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Chemical and Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 808 - UNREPORTED PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Unreported Pesticide Use.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

According to the Calif Dept of Pesticide Regulation (1995 Annual Report dated 1997 titled "Pesticides Sold in California by pounds of Active Ingredients"), unreported pesticide use is about 20 percent of total pesticide use. Obviously for some specific chemicals that percentage is higher. In the case of Diazanone it is a lot higher at about 45% of all Diazanone use. Which helps explain why Diazanone is the second most commonly detected pesticide detected in California surface waters. ("Disrupting the Balance", 1999 CPR)

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Unreported Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 809 - HOUSEHOLD PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Household Pesticide Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

*** INCLUDE "RISE.TXT"

"Households account for 12 percent of all pesticide usage." and "they often apply four to eight times more synthetic pesticides per hectare than do farmers." Environmental Science; Morgan, Moran & Weirsma; W.C. Brown Pub. 1993, pg 177

The Rising Tide of Toxins: Pesticide Use in California by James Liebman
Global Pesticide Campaigner, Volume 7, Number 3, September 1997.
Pesticide Action Network North America, San Francisco, CA.

"The largest percentage increase in reported pesticide use (in California Counties) during this period took place in Monterey County, which saw an increase from 7 million to almost 13 million pounds, representing an 85% increase.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Household Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 810 - PESTICIDE RESISTANT WEEDS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pesticide Resistant Weeds.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"A 1990 American Chemical Society Report disclosed that genetic strains of 504 species of insects and mites, 273 species of weeds, and 150 species of plant pathogens (mainly fungi) are resistant to one or more pesticides." Environmental Science; Morgan, Moran & Weirsm; W.C. Brown
Pub. 1993 citing: (Green, M.B., H.M. LeBaron, and W.K. Moberg. American Chemical Society, 1990 "Managing Resistance to Agrochemicals.")

The number of Pesticide Resistant Weeds has increased from none to some 220 from 1970 to 1998. In the same time period World Pesticide use amounts has more than doubled from 1.2 million kilograms to 2.6 million kilograms. WorldWatch Mar/Apr 2000

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pesticide Resistant Weeds.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 811 - PESTICIDE RESISTANT PLANT PATHOGENS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of

Pesticide Resistant Plant Pathogens.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"A 1990 American Chemical Society Report disclosed that genetic strains of 504 species of insects and mites, 273 species of weeds, and 150 species of plant pathogens (mainly fungi) are resistant to one or more pesticides." Environmental Science; Morgan, Moran & Weirsma; W.C. Brown Pub. 1993 citing: (Green, M.B., H.M. LeBaron, and W.K. Moberg. American Chemical Society, 1990 "Managing Resistance to Agrochemicals.")

A broad mix of drugs are now found worldwide in groundwater, including anticancer agents, psychiatric drugs, and anti-inflammatory compounds. An estimated 40% of antibiotics produced in the US are fed to livestock as growth enhancers. Science News, Vol 157 (2000)

Every year U.S. farmers give some 25 million pounds of antibiotics to hogs, poultry and cattle. Scientific American, April 2001

American people only use 4.5 million pounds of antibiotics per year. Id.

This increase in antibiotics can cause resistant strains of bacteria, fungi and microbes.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pesticide Resistant Plant Pathogens.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 812 - PESTICIDE USE REDUCTION.**

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of
Pesticide Use Reduction.

Orvin Burnside, the past president of the Weed Science Society (herbicide justification mission) "believes that herbicide use could be reduced by 50 to 75 percent without affecting crop yields." Toxic Deception, Fagin & Lavelle, 1999 p 53

Burnside also wrote a scathing article for a weed science journal in which he called to discipline a "stepchild" of agricultural research and said that public weed scientists must redirect their activities after four decades of largely herbicide-focused research." Id.

"Despite both natural and human controls, pests and spoilage still destroy about 25 to 50 percent of crops before and after harvest."

"Overall, pesticide use in the United States could be reduced by an estimated 50 percent for a negligible increase (less than one percent) in food prices." "Farmer's costs are only a very small fraction of food costs in the U.S."

From D. Pimentel, L. McLaughlin, A. Zepp. et al., 1991 Environmental and Economic Impacts of Reducing U.S. Agricultural Pesticide Use, in D. Pimentel (ed.), 1991, Handbok of Pest Management in Agriculture, 2nd ed., CRC Press, Boca Raton, FL, pp.679-718

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

*** 813 - MALARIA REDUCTION.**

The Document appears to have ignored this potentially feasible Alternative.
Please carefully analyze and disclose the potential benefits of
Malaria Reduction.

The World Health Organization is using insecticide-treated bed nets and combinations of existing drugs for their goal to halve the incidence of Malaria. Scientific American, June 2002

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

-

* 814 - SPIDERS AS AN INSECTICIDE ALTERNATIVE.

The Document appears to have ignored this potentially feasible Alternative.

Please carefully analyze and disclose the potential benefits of Spiders as an Insecticide Alternative.

Spiders are an excellent alternative to pesticides for agriculture, home use and golf courses. There are some 30,000 species of spiders worldwide who kill far more insects every year than insecticides do.

"According to the US Dept of Agriculture no more than 2% (and often less than 0.1%) of the insecticides applied to crops by aerial spraying or by ground spraying actually reaches the target pests; less than 5% of herbicides applied to crops reaches the target weeds."

"No more than 2% of all the insecticide sprayed on a field finds its target, but every spider gets insect meals-or it does not live to reproduce. A typical acre of meadow or woods contains an estimated 50,000 to 2 million spiders, each devouring hundreds of insects per year."

Chinese farmers build little straw huts around their field in the fall which protect hibernating spiders from the worst of the cold. American farmers have found that leaving strips of weeds around cotton and soybean fields provides habitat for insect eating Wolf spiders. In Maine the US-Deforest Service uses spiders to help control the spruce budworm. Spiders also attack the gypsy moth. G Tyler Miller, Living in the Environment, 1998 pg 618,619,624

This Alternative does not require any non-off-the shelf technology.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

* 815 - INTEGRATED PEST MANAGEMENT (IPM).

"IPM arose when cotton growers in the Rio Grande valley were no longer able to control insect pests with pesticides." Environmental Science; Morgan, Moran & Weirsma; W.C. Brown Pub. 1993 p 186

A 2001 General Accounting Office report found IPM failed to reduce pesticide use. While IPM is now used on more than two-thirds of U.S. crop lands, chemical pesticide use has increased.

While Integrated Pest Management can reduce pesticide use - in the US there is no example where it has lowered pesticide use by weight by more than 50% and even then it has not stopped pesticide water contamination.

"[Integrated Pest Management] alone will not eliminate the potential for contamination of ground and surface waters with pesticides." -Handbook of Integrated Pest Management for Turf and Ornamentals, edited by Anne R. Leslie, US-EPA Washington DC pg 168

"At best IPM may reduce pesticide use on a golf course by 50%, which would still result in pesticide applications 3 to 4 times greater than those made on cropfields." -Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. 1990, (updated Oct 1993) p 22, cited in USGA's 951 page "Golf Course Management and Construction"

IPM NEEDS EXTENSIVE DATA TO BE MEANINGFUL

"Integrated Pest Management" is a quantitatively meaningless term. Unless the specific pesticides to be used are disclosed; and the potential amounts of pesticides use without the proposed IPM is disclosed and the amounts used under IPM are disclosed there is no factual basis for any claim of a pesticide use reduction under IPM.

Used merely to justify itself without all needed data, IPM is as meaningless as if the Mafia claimed they will use "Integrated Robbery Management" so that only absolutely necessary robberies would occur. But if they don't tell you how many robberies they are doing now and won't let you independently monitor all the robberies they do in the future - you cannot determine whether there is any change in the number or severity of robberies.

Same thing here - if they don't tell you how much pesticide is used now and won't let you independently monitor all the pesticide use in the

future - you cannot determine whether there is any change in the number or severity of pesticide use or harm.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
Integrated Pest Management (IPM).

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure: Integrated Pest Management (IPM). using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure: Integrated Pest Management (IPM). using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: Integrated Pest Management (IPM).

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures; how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary

mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: Integrated Pest Management (IPM).

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: Integrated Pest Management (IPM).

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 816 - INCREASE IN USE OF CHEMICALS OF UNKNOWN TOXICITY.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Increase in Use of Chemicals of Unknown Toxicity.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Increase in Use of Chemicals of Unknown Toxicity.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Surfactant Toxicity.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

A Federal Court wrote:
"EPA has found approximately 40 "inert ingredients" to be of toxicological concern after testing them and has determined that approximately 65 others are potentially toxic." "More than two thousand inert ingredients are used in pesticides however, and most of them have not been tested by EPA or evaluated for toxicity." NCAMP v. EPA 941 F.Supp 197, 198 (1996)

Inerts can be organic soaps and surfactants that hasten pesticide penetration through the cuticle and the stomata of leaves. The analogous surfaces in animals are the skin and the respiratory system.

Standard toxicological tests are typically evaluated without the inerts (often surfactants and organic soaps) used in commercial preparations that can alter the properties of pesticides and influence the route of exposure.
Source: Warren Porter, et al., "Endocrine, immune and behavioral effects of aldicarb (carbamate), atrazine (triazine) and nitrate (fertilizer) mixtures at groundwater concentrations," Toxicology and Industrial Health (1999) 15, 133-150. University of Wisconsin-Madison.

Approximately 1,050 of the secret ingredients are considered "inerts of unknown toxicity." EPA does not require testing to determine their toxicity. These ingredients include:

Chemicals known to be toxic (e.g., POEA or polyoxyethyleneamine, naphthalene, and zinc). POEA is present in Monsanto's glyphosate formulations Roundup and Vision. The POEA is 400 times more toxic to immature salmon than a glyphosate formulation, Rodeo, that contains no POEA. It belongs to a class of surfactants that have been reported to cause adverse gastrointestinal and central nervous system effects and damage to red blood cells. POEA is contaminated with 1,4-dioxane, a chemical that causes toxic effects in the liver and kidneys of humans and various cancers in numerous animal species.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Surfactant Toxicity.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 819 - GROUND APPLICATION OF PESTICIDES.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of
Ground Application of Pesticides.

Because of the loss to "drift" aircraft apply about 30% more pesticide than ground application. (Miller, Living In The Environment, 1999 pg 624)
(See Drift)

* 820 - SWIMMING POOL CHLORINE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Swimming Pool Chlorine.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Swimming pool chlorine dumped as runoff into streams and storm drains
is not uncommon. It can harm Areas of Biological Significance (ABS) and
the Monterey Bay National Marine Sanctuary (MBNMS). The Sanctuary office Urban Water testing program has found chlorine in
its tests of the urban watersheds of Monterey and Pacific Grove.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Swimming Pool Chlorine.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable,
credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 821 - COMBINED PESTICIDE AND FERTILIZER.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Combined Pesticide and Fertilizer.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

New Study Points to Inadequate Testing of Pesticides; March 26, 1999

A new study in the journal Toxicology and Industrial Health identifies significant shortcomings in toxicological testing protocols currently used to register pesticides in the United States. The five year study suggests that combinations of commonly used agricultural chemicals in concentrations that mirror levels found in groundwater can significantly influence immune and endocrine systems as well as neurological health.

"The single most important finding of the study is that common mixtures, not the standard one-chemical-at-a-time experiments, can show biological effects at current concentrations in groundwater," said Warren Porter, lead author and University of Wisconsin professor of zoology and environmental toxicology. "Although they frequently co-occur, tests for these compounds in combination are very rare."

The experiments performed by Porter's group suggest that children and the developing fetus are most at risk from pesticide-fertilizer mixtures. Their influence on developing neurological, endocrine and

immune systems, said Porter, portend change in ability to learn and in patterns of aggression.

The study focused on three commonly used farm chemicals: aldicarb, an insecticide; atrazine, an herbicide; and nitrate, a chemical fertilizer. All three are in wide use worldwide and are the most ubiquitous contaminants of groundwater in the United States.

In the series of experiments, when mice were given drinking water laced with combinations of pesticides and nitrate, they exhibited altered immune, endocrine and nervous system functions. Those changes, according to Porter, occurred at concentrations currently found in groundwater. Effects were most noticeable when a single pesticide was combined with nitrate fertilizer.

The apparent influence of pesticide and fertilizer mixtures on the endocrine system, the system of glands such as the thyroid that secrete hormones into the bloodstream, may also result in changes in the immune system and affect fetal brain development. "Thyroid disruption in humans has multiple consequences," Porter said. Some of these include effects on brain development, level of irritability, sensitivity to stimuli, ability or motivation to learn and altered immune function.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Combined Pesticide and Fertilizer.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 822 - GOLF COURSE NITROGEN FERTILIZER USE.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
GOLF Couse Nitrogen Fertilizer Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

EPA's 1990 National Pesticide Survey of 1300 community water systems
estimated there are 49,300 Community Water System wells
polluted with
nitrates.

EPA's 1990 National Pesticide Survey of 1300 community water systems
estimated there are 5.9 million Rural Domestic wells polluted
with
nitrates.

Synthetic nitrogen fertilizer runoff raises levels of nutrients in water, causing excessive algae growth, which decreases oxygen available to aquatic life.

Synthetic nitrogen fertilizer runoff raises levels of nutrients in water, causing excessive algae growth, which decreases oxygen available to aquatic life. Fertilizers increase the stress on turf because their excessive nutrition increases the habitat value for pests thus increasing pesticide use.

"Mystery poison found in Carmel River"
"Health Dept warns that children, pets should stay away."
-Carmel Pine Cone Headlines Sept 19 1997
At least three dogs died from Oct 1996 to September 1997 immediately after drinking from the standing pools in the Carmel River. One attending veterinarian suspected a blue-green algae (also known as cyanobacteria), but there was no investigation. "I've been here 35 years and never seen anything like this before." said Carmel Valley veterinarian Gerald Petkus. County Health Dept Director Melton said two other dogs died after drinking water in 1996. No water samples were taken. According to Melton the algae is "very toxic to any animal" (this presumably includes humans).

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
GOLF Couse Nitrogen Fertilizer Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 823 - FERTILIZER KILLING MARINE MAMMALS BY INCREASING ALGAE BLOOMS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Fertilizer killing Marine Mammals by Increasing Algae Blooms.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Nitrogen and phosphorus compounds from sewage discharges, fertilizers and some industrial wastes nourish the algae, causing their populations to explode and release poisons." WWF, 1990

"Vast blooms of Algae have emerged as the most serious effect of marine pollution." WWF, 1990

"In the summer of 1988, a slick of toxic algae more than 10 meters deep and 10 kilometers wide, spread through the Kattegat and

Skagerrak, which separate the coasts of Sweden, Norway and Denmark. More than 200 kilometers of coastline was blighted, beaches were closed, millions of fish are thought to have died; it became known as the 'Marine Chernobyl.'" WWF, 1990

"Toxic algae caused sea lion die-off" Herald headline, Jan 7(?) 1999

"Over 400 sea lions in Central Coast perished in 1998" This was due to domoic acid produced by microscopic marine organism called diatoms.
"Domoic acid is poisonous to people as well as animals." It is a poison created when a microscopic algae, Pseudo-nitzschia, multiplies rapidly in the sea. The toxin cause neurological problems, with seizures and severe depression.

"A toxin [Domoic acid] that has killed at least 25 sea lions along the Central Coast [of California] in the past couple of weeks was identified Tuesday as the same one that killed pelicans and cormorants in Monterey Bay in 1991 and dozens of sea lions in 1998." Herald, July 12, 00 pB1

During El Nino of 1997-1998 nutrient upwelling stopped as winds dropped, the undercurrent lost strength, and chlorophyll concentrations across the equatorial Pacific plummeted to their lowest recorded levels.

"During the next year, the subsequent La Nina, these trends reversed, with a vengeance." A dramatic bloom of chlorophyll ensued. Science, Dec 10 1999

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Fertilizer killing Marine Mammals by Increasing Algae Blooms.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 824 - GOLF COURSE NITROGEN FERTILIZER USE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Golf Course Nitrogen Fertilizer Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

EPA's 1990 National Pesticide Survey of 1300 community water systems estimated there are 49,300 Community Water System wells polluted with nitrates.

EPA's 1990 National Pesticide Survey of 1300 community water systems estimated there are 5.9 million Rural Domestic wells polluted with nitrates.

Synthetic nitrogen fertilizer runoff raises levels of nutrients in water, causing excessive algae growth, which decreases oxygen available to aquatic life. Fertilizers increase the stress on turf because their excessive nutrition increases the habitat value for pests thus increasing pesticide use.

Golf Course Greens receive a mean of 210 pounds of Nitrogen fertilizer per acre per year. "Greens may account for up to 10% of the area of a golf course." Golf Course Fairways receive a mean of 150 pounds of Nitrogen fertilizer per acre per year. Golf Course Tees receive a mean of 150 pounds of Nitrogen fertilizer per acre per year. - Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. Oct 1993 pg 13 citing Welterlen 1988

"Up to 84% of the nitrogen fertilizers applied to turfgrass may leach to groundwater, with the average hovering between 5% and 10%." Petrovik, A.M. 1990 The fate of nitrogenous fertilizers applied to turfgrass. Journal of Environmental Quality 19:1-14

Nitrate may pose a threat to infant when the concentration in drinking water exceeds 10 mg/l as N. Of the various studies of nitrogen leaching reviewed by Petrovik, 14% reported nitrate concentrations of 10 mg/l N or greater in leachate.

"Ideally, the amount of fertilizer applied to a golf course should equal the amount taken up by grass. Unfortunately this ideal is difficult to achieve. THE QUANTITY OF FERTILIZER ACTUALLY APPLIED TO TURFGRASS IS ALWAYS IN EXCESS OF THE PROJECTS UPTAKE." (emphasis added)
"It is assumed that a portion of the fertilizer will be lost to plants either because it washes away in surface runoff or leaches below the rooting depth of grass, which averages 18 inches." Frere, M.H., Ross, Lane 1980. The nutrient submodel. Chapter 4, In: CREAMS - A field scale model for Chemicals, Runoff, and Erosion from Agricultural Management Systems. Southeast Watershed Research Laboratory, US Dept of Agriculture, Tifton Georgia.

"Ammonium nitrate and Calcium Nitrate have a high leaching potential. But even when slow release fertilizers are used significant losses of nitrogen can occur. For example the nitrate level in groundwater beneath the Falmouth golf course on Cape Cod was 10 to 24 times greater than the background concentration even though slow-release fertilizers were used." -Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. Oct 1993 pg 14

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Golf Course Nitrogen Fertilizer Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 825 - NITRATE FERTILIZER KILLS FROGS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Nitrate Fertilizer Kills Frogs.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Fertilizer levels the US-EPA says are safe for human drinking water can kill some species of frogs and toads, according to a new study. Oregon State University researchers found some tadpoles and young frogs raised in water with low levels of nitrates typical of fertilizer runoff ate less, developed physical abnormalities, suffered paralysis and eventually died. In control tanks with normal water, none died."
Herald Jan 6 2000, pg 2

Please analyze and discuss the potential impact on the California
Red-Legged Frog (*Rana aurora draytonii*).

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Nitrate Fertilizer Kills Frogs.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 826 - GOLF COURSE PHOSPHORUS FERTILIZER USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Golf Course Phosphorus Fertilizer Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Golf Course Greens receive a mean of 44 pounds of Phosphorus fertilizer per acre per year. Golf Course Fairways receive a mean of 88 pounds of Phosphorus fertilizer per acre per year. Golf Course Tees receive a mean of 93 pounds of Phosphorus fertilizer per acre per year. - Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. Oct 1993 pg 13, citing Welterlen 1988

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Golf Course Phosphorus Fertilizer Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 827 - SENSOR IRRIGATED GOLF COURSE WATERING REDUCING FERTILIZER USE.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of
Sensor Irrigated Golf Course Watering Reducing Fertilizer Use.

Excessive irrigation of turfgrass increased nitrate-nitrogen leaching to groundwater by six-fold.
-Morton, 1988

The amount of nitrogen leached from daily-irrigated plots was 2 to 28 times greater when compared to sensor irrigated plots. Snyder (1984) compared the nitrogen losses from grass plots irrigated on a daily basis with plots irrigated only when sensors indicated watering was needed. Snyder, Augustin, Davison 1984. Moisture sensor controlled irrigation for reducing N leaching in Bermudagrass turf. Agronomy Journal 76:964-969

* 828 - GOLF COURSE PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Golf Course Pesticide Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

New Phillipine President Joseph Estrada opposes the construction of new golf courses in the county because they hurt agricultural production.
Associated Press April 18 1999

Pesticides are used on almost all golf courses and driving ranges.
An estimated 126 pesticides are used on golf courses (Kriner, R.E. 1985.
Final Report on the results of a national survey of pesticide usage on golf courses in the U.S. AARP under a cooperative agreement with the US-EPA) including chlorothalonil, 2,4-D, and trifluralin which have caused cancer in laboratory animals. Sierra Magazine July/Aug 1993

The twenty most heavily used golf course pesticides in the US in 1982 (and their use in thousands of pounds of active ingredient) were:
Chlorothalonil (1,298), MCPP mecoprop (1,096), MSMA (834), Iprodione (815), Thiram (635), Diazinon (512), Benoyml (500), Paraffin oil (487), Dimethylamine 2,4-D (462), Pentachlorophenol (456), EDB - ethylene dibromide (402), DCPA (400), Maneb (376), Isofenphos (374), Dicamba (297), Mancozeb (218), Trichlorfon (215), Bensulide (210), Aromatic petroleum derivative / solvent (190), Xylene / solvent (152). USGA's 1993 book "Golf Course Management and Construction" pg 228

Two of the most common families of pesticides are organophosphates and carbamates. These classes of chemicals account for a large percentage of the pesticides used on golf courses and "their immediate physiological effects on arthropods can be quantified." "Organophosphates and carbamates exert their toxicity by suppressing the production of the cholinesterase enzymes necessary for the breakdown of the neurotransmitter acetylcholine and the normal functioning of the peripheral and central nervous systems." Li, Q. Sakuda, K. Harada, R. and Guo, F. Analysis of WaterSamples for Low Levels of Pesticides and Analysis of Inhibition of Neurotransmitter Breakdown in Insects. Dept. of Env. Biochem. University of Hawaii 1998.

Other typical poisons used on golf courses include Phosphorus, Mercury, Arsenic, Nemaacur (phenamiphos).

EPA's National Pesticide Survey of 1300 community water systems estimated the numbers of community Rural domestic wells poisoned with specific pesticides included (number of wells): DCPA acid metabolites (264,000), Atrazine (70,800), DBCP (38,400), Simazine (25,100), Prometon (25,600), Ethylene dibromide (19,200), Lindane (13,000), Ethylene thiourea (8,470), Bentazon (7,160), Alachlor (3,140).

EPA's National Pesticide Survey of 1300 community water systems estimated the numbers of community water system wells poisoned with specific pesticides included (number of wells): DCPA acid metabolites

(6,010), Atrazine (1570), Simazine (1,080), Prometon (520), Hexachlorobenzene (470), DBCP (370), Dinoseb (25).

LOCAL GOLF COURSE PESTICIDE USE

! Some Monterey Peninsula Golf Courses use thousands of pounds of pesticides on golf courses every year.

"750 kilograms (about 1650 pounds) of pesticides are sprayed on a typical golf course annually, and average of 11 kilograms per hectare (about 10 pounds per acre)." -Toxic Green, Worldwatch May/June 1994 pg 27 This is roughly six (6) to eight (8) times higher pesticide concentration than that used on agricultural crops.

HUMAN PESTICIDE POISONINGS

! Pesticides are designed and applied to kill. Some 428 cases of human pesticide poisoning were reported to public officials in Monterey County during a six year period. Fifty 50 cases of human pesticide poisoning were reported in Monterey County in 1996.

In 1983 a healthy 30 year old US Navy flight officer died of a violent allergic reaction ("basketball size blisters") to Chlorothalonil (Daconil 2787) after playing golf. Sierra Magazine July/Aug 1993; TD p 6

LEGAL DISCLOSURE

The Calif Supreme Court noted, in Laurel Heights v Regents of University of California 1988, that while a scientific facility need not set forth all the potentially dangerous chemicals it could use because that would require prescience and unreasonably shackle scientific imagination "a manufacturing facility could reasonably be expected to know or estimate what materials it intends to use in its operations."

It is completely reasonable to expect that a golf course proposed to be located in the middle of NINETEEN OTHER GOLF COURSES can predict with a small margin of error WHICH PESTICIDES it could use AND HOW MUCH OF THEM.

! Pesticides concentrate in runoff from rains.
A study of 87 golf courses by the Attorney General of New York State found 6 of the most common pesticides "are known to be capable of contaminating groundwater after normal applications following label directions." These six pesticides are: chlorothalonil, dacthal, dicamba, 2,4-D, prometon and trifluralin.

Diazanion is the second most commonly detected pesticide detected in California surface waters. ("Disrupting the Balance", 1999 CPR)

That NY Attorney General report also found some soils are a very poor barrier to pesticide migration. Two pesticides (chlorothalonil and Dacthal) are rated "as having a 'small' leaching potential have nevertheless reached Long Island's groundwater."

"Putting greens are more susceptible to chemical leaching than fairways or roughs because beneath that thin layer of turf is a base of 70 to 90

percent sand. Chemicals sometimes leach through the sand, especially after heavy rainfalls. if those chemicals migrate into a stream filled with brook trout, which have a low tolerance for pollution, the fish may die." Sierra Magazine July/Aug 1993

PESTICIDE MIGRATION

According to Dr. Stuart Cohen (an advocate for golf course developers as President of Environmental & Turf Services) sometimes pesticides degrade to something more toxic; that he knows "of no way to seal an entire golf course"; "that as much as 15% of pesticides could leave a golf course"; Comments on Rancho San Carlos EIR 1997.

Expert opinion from the University of California at Santa Cruz noted in their comments on the Rancho San Carlos Draft EIR included in the RSC FEIR VOL 1 page B-216: "The effects of pesticides alone can cause significant groundwater and surface water contamination, fishery losses, and losses of birds and other wildlife (Pimentel, et al. 1992)."

Expert Opinion from a man employed as water Quality Biologist for the California Department of Fish and Game states: "In my opinion it will be expensive and difficult to rectify the situation once pesticides or nitrates are found in the drinking water or streams."

! No one is required to test Watercourses for Pesticides In 1995 Monterey County Health Department tried to trivialize golf course pesticide impacts to the Carmel River by saying "we've never found any pesticides in the Carmel River."

This is professional misconduct and massive negligence because Monterey County "Health" department admits they have NOT tested the watercourses adjacent to golf courses including the Carmel River or any stream in Pebble Beach for each pesticide.

Worse - Monterey County "Health" admits they don't even keep a list of pesticides used on golf courses built before 1997 and they don't track liquid or solid poison use of less than 100 pounds.

! Pesticides kill, injure and weaken wildlife. Browsing Carmel Valley's Quail Lodge Golf Course pesticide use forms at the County Agriculture Department we find hundreds of pounds of Copper Sulphate and Miles-Nemacur and thousands of pounds of other chemicals without cross references. For context - Quail Lodge golf course is right next to the Carmel River and just upstream of pumps for our Peninsula drinking water and the place where the Red-Legged Frog tadpoles were found.

California Department of Fish and Game notes Copper Sulphate is "Highly Toxic to Fish, ESPECIALLY TROUT AND SALMON" and Nemacur (aka Fenamiphos) is "EXTREMELY TOXIC TO FISH and wildlife [emphasis added]."

! Killing or injuring wildlife is an obvious environmental impact.

! Killing or injuring a single individual of a species listed under the ESA is illegal and a mandatory significant environmental impact under CEQA Guidelines Section 15065.

! Harming the habitat of a species listed under the ESA is illegal and a significant environmental impact under CEQA Guidelines Section 15065.

The degradation of the stream water quality due to the chemical cocktail in pesticides causes a loss of habitat for fish and amphibians. This loss of habitat is a reduction in the range of the California red-legged frog and Steelhead and must be identified as a significant environmental impact.

! Chemicals have different toxicities. There is no such thing as a "representative" pesticide to test for.

EACH PESTICIDE MUST BE TESTED FOR DETECTION SEPARATELY! According to a Monterey Peninsula College chemistry professor (Gordon Williams) and a former forensic chemist for the Los Angeles Police Department - there is no single test for "pesticides." Each pesticide must be tested for detection individually.

Chemicals have Different Toxicities Without knowing the specific pesticide names and chemical components and quantities to be used - no one, including experts, can make any reliable conclusions regarding their impacts. If an expert could make reliable conclusions regarding pesticide impacts - without knowing the specific pesticide and chemical names or quantities, there would be no need for data on different pesticides and all MSDS sheets would be identical.

ALL Pesticides and their chemical constituents must be disclosed. The toxicity of each chemical constituent must be disclosed.

! Increasing Carmel River pumping increases the river dewatering and concentrates the existing pesticides in the river.

! Please estimate (considering Laurel Heights) the proposed yearly amounts of use (in pounds) of each pesticide product.

! Please describe the toxicity limits to humans and wildlife for each product AND chemical described above in terms of Carcinogenic, hazardous, poisonous, and lethal doses including the LD and LC.

! Please describe the half life of each chemical so we can get a ballpark idea of the persistence of the chemical in the environment.

! If there are no studies of toxicity or persistence for a specific chemical - please explicitly note that.

! Please include an Material Data Safety Sheet (MSDS) for each chemical to be applied to the Golf Course, just as required for every chemical used in a school laboratory.

! Please list and describe all products and all (including so called "inert" components) their chemical constituents (Brand name and chemical name) to be applied to the proposed golf turf.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Golf Course Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 829 - FERTILIZER REDUCTION REDUCING PESTICIDE NEED.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Fertilizer Reduction Reducing Pesticide Need.

Fertilizers increase the stress on turf because their excessive nutrition increases the habitat value for pests thus increasing pesticide use. If fertilizers are only used during the growing season, and only as much fertilizer is used as the turf needs - pesticide use can be cut back significantly.

* 830 - GOLF COURSE INTEGRATED PEST MANAGEMENT (IPM).

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Golf Course Integrated Pest Management (IPM).

"At best IPM may reduce pesticide use on a golf course by 50%, which would still result in pesticide applications 3 to 4 times greater than those made on cropfields."
-Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. 1990, (updated Oct 1993) p 22, cited in USGA's 951 page "Golf Course Management and Construction"

"[Integrated Pest Management] alone will not eliminate the potential for contamination of ground and surface waters with pesticides."
-Handbook of Integrated Pest Management for Turf and Ornamentals, edited by Anne R. Leslie, US-EPA Washington DC pg 168

"Integrated Pest Management" is a quantitatively meaningless term. Unless the specific pesticides to be used are disclosed; and the potential amounts of pesticides use without the proposed IPM is disclosed and the amounts used under IPM are disclosed there is no factual basis for any claim of a pesticide use reduction under IPM.

* 831 - GRANULAR PESTICIDES VS LIQUID.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Granular Pesticides vs Liquid.

Agronomists find that changing the pesticide from a liquid to a granular form can reduce the amount of pesticide needed by 90 percent in weight.

* 832 - PESTICIDE FREE GOLF COURSE.

Several golf courses are pesticide free. Those include the San Francisco Presidio's National Park Service Golf Course managed by Arnold Palmer Golf Management starting in 1996; "The Resort" at Squaw Creek near Lake Tahoe in California's Sierras has not used pesticides since 1991; and Colorado's Applewood Golf Course owned by the Coors Brewing Company which has not used any pesticides since 1989. Coors was concerned because the water for their beer comes from the aquifer directly below the course.

If pesticides will not be used please describe how their non-use will be permanently prohibited and enforced.

This Alternative does not require any non-off-the shelf technology.

ALTERNATIVE FACTUAL ANALYSIS

There is little or no factual evidence in the document showing why this alternative is infeasible.

A. Please clearly identify by name and describe each of the objective (non-subjective) criteria used to determine this Alternative's benefits.

A1. If no objective criteria are used please state that clearly.

A2. If the criteria are different than those used to evaluate the benefits

of the proposed project, please explain as it is not generally acceptable to compare apples and oranges.

B. Please state the name of the measurement units (numbers) used to determine the value for Each criteria.

B1. If no measurement units are used please state that clearly.

C. Please state the method of measurement used to determine the value for each criteria.

C1. If no measurement units are used please state that clearly for each criteria.

C2. If no objective criteria are used please clearly describe how the method of measuring value is scientifically credible and defensible.

D. Please state the existing or current baseline measurement (level) for each criteria.

E. Please state the normal variance or fluctuation, assumed or expected for each of the criteria listed above.

E1. If an average is used, please state which kind of average.

E2. Please state the extreme conditions which will be encountered.

F. Please provide a graph of historical measurement.

G. Please state the measured, assumed or expected margin of error for each measurement, calculation, and conclusion and whether it is measured or assumed.

H. Please state the total maximum change, in Percent, to which the Alternative would raise or lower the baseline number.

H1. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

H2. Please state the degree, in Absolute Amount, to which this Alternative would raise or lower the baseline number;

H3. Please state whether this total maximum change amount is an average amount, a best case expected or other.

I. Please state the threshold number at which the value changes from a significant impact to a less-than-significant impact and the clear rationale for that number.

I1. Please provide the margin of error used (in percent and absolute amount) to insure the Significance Threshold Level for this Alternative is not somehow exceeded.

I2. If no margin of error is used please state that clearly.

J. ALTERNATIVE VALUE PROOF

Please cite and provide relevant studies that clearly show that the project purposes could not be achieved with this alternative or with this

alternative in combination with other alternatives.

J1. Please discuss the limitations of those studies.

BENEFIT DURATION

K. Please clearly describe how the benefits vary over the time during the studies.

K1. Please graph the benefits for this alternative versus time in the studies. It is important to know the duration of an Alternative's benefits compared with the benefits from the proposed project.

COSTS

L. Please cite the costs for the Alternatives studied.

L1. It is important to know the cost to benefit ratio, please explain that ratio.

M. EXPERT QUALIFICATIONS

Please name each expert who prepared and reviewed this Alternative analysis.

M1. Please cite each expert's training, competence and experience specific to this Alternative analysis.

* 833 - GOLF COURSE CHEMICAL USE OTHER THAN FERTILIZERS AND PESTICIDES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Golf Course Chemical use other than Fertilizers and Pesticides.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Hydrogen Peroxide is commonly used to prepare soil for a golf course. (World Watch May/June 1994) Please describe whether Hydrogen Peroxide will be used to prepare the ground, if so how much will be used and if not how its use will be prohibited and enforced.

What other chemicals will be used?

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Golf Course Chemical use other than Fertilizers and Pesticides.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 834 - CHEMICAL USE DURING GOLF COURSE PREPARATION AND CONSTRUCTION.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

Chemical use during Golf Course Preparation and Construction.

If you claim the document contains proof of no-significant impact for this impact please explicitly state the page number and paragraph.

Hydrogen Peroxide is commonly used to prepare soil for a golf course.
(World Watch May/June 1994) Please describe whether Hydrogen Peroxide will be used to prepare the ground, if so how much will be used and if not how its use will be prohibited and enforced.

What other chemicals will be used?

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Chemical use during Golf Course Preparation and Construction.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 835 - GOLF COURSE FERTILIZER STARTUP USE.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Golf Course Fertilizer Startup use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Golf Course Fertilizer Startup use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 836 - GOLF COURSE PESTICIDE STARTUP USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Golf Course Pesticide Startup use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Golf Course Pesticide Startup use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 839 - PROFESSIONAL LANDSCAPING PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Professional Landscaping Pesticide Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Professional Landscaping Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 840 - NON-PROFESSIONAL HOME LANDSCAPING PESTICIDE USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

Non-Professional Home Landscaping Pesticide Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Consumers can still buy and use pesticides no longer available to professionals, because those pesticides are exceedingly deadly and high risk.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Non-Professional Home Landscaping Pesticide Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 841 - REQUIRE PERMITS FOR HOME PESTICIDE USE.**

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of
Require Permits for Home Pesticide Use.

Counties or cities can require permits for home pesticide use because of the health and safety risk. In jurisdictions where this is in place the consumer fills out a form with the product name, amount and location for its use. Some areas require notification of all neighbors within 100 yards of all property lines.

*** 842 - HAZARDOUS MATERIALS USE.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Hazardous Materials Use.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Hazardous Materials Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 843 - HAZARDOUS MATERIALS HANDLING.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Hazardous Materials Handling.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Hazardous Materials Handling.
- 1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
- 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
- 3b. Please quote the definition used.
4. If no measurement units are used please state that clearly.
- 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
- 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.
6. Please quantify the existing or current BASELINE measurement (level) for each criteria.
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
9. Please state the variance's MARGINS of ERROR or confidence level.
10. Please state whether this MARGIN of ERROR is measured or assumed.
11. If an average is used, please state which kind of average.
12. Please state the most extreme values which could be encountered.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
15. Please provide a graph of HISTORICAL measurements.
16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20s. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
24. Please state whether the MARGIN of ERROR is measured or assumed.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
27. Please state whether the MARGIN of ERROR is measured or assumed.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
29. Please list all potential CUMULATIVE impacts related to this one.
30. Please describe all potential CUMULATIVE impacts related to this one.
31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergetic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.
-
- * 844 - HAZARDOUS MATERIALS STORAGE.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Hazardous Materials Storage.
- If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.
- Please state the maximum quantity of the hazardous material that would be stored at any one time.
- Please analyze a worst case spill of each material.
- QUANTIFICATION OF BASELINES AND IMPACTS:
- This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Hazardous Materials Storage.
- 1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
- 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
- 3b. Please quote the definition used.
4. If no measurement units are used please state that clearly.
- 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
- 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

-
- * 845 - GENUINELY HAZARDOUS - BUT NOT DEFINED AS SUCH - WASTES.
- The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Genuinely Hazardous - but not defined as such - Wastes.
- If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.
- "EPA estimates 6 Billion tons (with a "B") of hazardous waste are produced every year in the US. But because only about six percent (6%) is legally defined as hazardous waste - ninety four percent (94%) of the country's hazardous waste is not regulated by hazardous waste laws."
- Several materials are omitted from Congress' definition of Hazardous
- Wastes but are clearly hazardous and probably deadly. Those include -
- 1) radioactive wastes,
 - 2) hazardous and toxic materials discarded by households,
 - 3) mining wastes,
 - 4) oil and gas drilling wastes (routinely discharged into surface waters,
 - 5) liquid waste containing in organic hydrocarbons (80% of all liquid hazardous wastes),
 - 6) cement kiln dust produced when liquid hazardous wastes are burned in a cement kiln (a practice classified as recycling by the US-EPA but considered dangerous sham recycling by environmentalists, and
 - 7) wastes from the thousands of small businesses and factories that generate less than 100 kilograms (220 pounds) of hazardous waste per month.
- (G Tyler Miller, Living in the Environment, 1998 pg 566
- QUANTIFICATION OF BASELINES AND IMPACTS:
- This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Genuinely Hazardous - but not defined as such - Wastes.
- 1b. If no objective criteria are used please state that clearly.
2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
- 3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
- 3b. Please quote the definition used.
4. If no measurement units are used please state that clearly.
- 5a. Please state the METHOD of measurement used to determine the significance for each criteria.
- 5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 846 - PESTICIDE IMPACTS ON LISTED SPECIES.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Pesticide Impacts on Listed Species.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Fish and amphibians are especially harmed by pesticides in surface waters. The California Red-Legged Frog (*Rana aurora draytonii*) and the West Coast Steelhead (*Oncorhynchus mykiss*, or *O. mykiss*) are formally protected under the Endangered Species Act. Both species are particularly harmed by pesticide impacts. The fish because it "breathes" river water in which pesticides can occur; and the frog because its entire skin must be kept constantly wet and it absorbs pesticides through its skin.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of

Pesticide Impacts on Listed Species.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 847 - PESTICIDE BIOACCUMULATION IMPACTS ON HUMANS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pesticide Bioaccumulation Impacts on Humans.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

Bioaccumulation is the uptake and retention of chemicals in a single living organism via food, air or water consumption or contact. For some chemicals (e.g., pesticides, mercury) even extremely low concentrations in water or sediments have the potential to bioaccumulate in fish tissue to concentrations high enough to pose health risks to fish consumers.

In 1996 2,193 fish consumption advisories were issued in 48 states. Mercury, PCBs, chlordane, dioxin and DDT were responsible for almost all fish consumption advisories in 1996. -EPA Administrator, Carol Browner and Secretary, Dept of Agriculture Dan Glickman Feb 14th 1998 in Report called the "Clean Water Action Plan" to Vice President Al Gore. "Predatory organisms at the top of the food web generally have higher mercury concentrations." Mercury Study Report to Congress Dec 1997

According to Mark Miller, M.D. MPH a member of the Environmental Health Committee of the American Academy of Pediatrics (quoted in Coast Weekly April 22 1999) - even low level exposure to Organophosphorus pesticide compounds (e.g. diazinon, cypermethrin, Chlorpyrifos, hydramethlynon, propetamphos and Malathion) may cause symptoms. "The effects of organophosphates are cumulative so that if the chemical used in the home and in food is added to those used on school grounds, something may tip the bucket."

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Pesticide Bioaccumulation Impacts on Humans.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 848 - PESTICIDE BIOACCUMULATION HARM TO LISTED SPECIES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pesticide Bioaccumulation Harm to Listed Species.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Bioaccumulation is the uptake and retention of chemicals in a single
living organism via food, air or water consumption or contact.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Pesticide Bioaccumulation Harm to Listed Species.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 849 - PESTICIDE BIOMAGNIFICATION.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pesticide BioMagnification.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Biomagnification is how Bioaccumulation increases through a food chain.

"As PCBs work their way up the food chain, their concentrations in animal tissue can be magnified up to 25 million times."
"Our Stolen Future, 1999 citing R. Norstrom., D. Hallett, and R. Sonstegard 'Coho Salmon and Herring Gulls as Indicators of Organochlorine Contamination in Lake Ontario,' Journal of the Fisheries Research Board of Canada 35(11):1401-1409 (1978)

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pesticide BioMagnification.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

* 853 - PESTICIDE IMPACTS ON THE WEST COAST STEELHEAD HABITAT.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Pesticide impacts on the West Coast Steelhead Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Pesticides can cause the loss of populations of food which the steelhead depend upon.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pesticide impacts on the West Coast Steelhead Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 854 - ENDOCRINE DISRUPTOR CHEMICALS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Endocrine Disruptor Chemicals.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Known Endocrine Disruptor chemicals include Organochlorines (e.g. DDT and its degradation products), PCBs, Alkylphenol Ethoxylates (APEs), Phthalates, Nonylphenols, Bisphenol-A, Phytoestrogens, DEHP, dicofol, HCB, kelthane, kepone, lindane, methoxychlor, octachlorostyrene, synthetic pyrethroids, triazine herbicides, EBDC fungicides, cadmium, lead, mercury, tributlin, alkyl phenols. OSF pg 217, 253

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Endocrine Disruptor Chemicals.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 855 - CARCINOGENS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Carcinogens.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"When carcinogens are deliberately or accidentally introduced into the environment, some number of vulnerable persons are consigned to death. The impossibility of tabulating an exact body count does not alter this fact."

Please list ALL potential and known Carcinogens which could potentially be used in the project or its construction or operations or maintenance.

Please list ALL potential and known carcinogens currently on or affecting the project site.

Use California's Proposition 65 list of known carcinogens, California EPA's list, the US-EPA's list of carcinogens, and the US-Coast Guard's list.

Listed Carcinogens include Diesel engine exhaust (creating 3-Nitrobenzanthrone the most carcinogenic material known), lead, urethane (insulation), benzene (most hydrocarbon fuels), arsenic, asbestos, ceramic fibers (roof insulation), pentachlorophenol (telephone poles).

Please list all quantities of each of the carcinogens to be used in any phase of the project from construction to operations and maintenance.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Carcinogens.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 856 - LEAD.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Lead.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Lead is a Cumulative Poison (Sax's Properties of Dangerous Materials)

Lead causes Irreversible Damage (263 J. American Medical Assoc 790-91)

Lead is the Most toxic of ATSDR's "20 most hazardous toxics"

Lead Accumulates in bones and soft tissue.

Lead Can only be cleaned from soft tissue, not from bones. (86 Pediatrics 455-57, 1990; 144 Am J. Dis Child 1039-44, 1990)

Lead does not appear at all in the healthy human body.

Center for Disease Control (CDC) recently (circa 1991) reduced the level of toxicity for lead in human blood, to 10 mg/L.

In 1985, CDC concluded that blood levels above 25 mg/l were toxic. In 1984, CDC estimated that 3 to 4 million children under age 6 suffered from serious blood lead levels.

Known human Lead caused damage begins at blood levels of about 5 mg/l (or 5 micrograms per deciLiter) where Developmental Toxicity is measured including loss of IQ, Hearing and Growth deficiencies (height, weight and chest circumference).

May 2000 Dr. Bruce Lanphear reported a study showing cognitive impairment in children with blood levels as low as 2.5 mg/L. Lanphear estimated some 12.8 million youngsters born between 1988 and 1994 have blood levels in excess of 2.5 mg/L. AP 4/16/00

Fatalities occur when blood lead levels reach 80 mg/l (called "acute lead encephalopathy"). 24 Clinical Pediatrics 280-85, 1985

Blood lead levels of 25-45 mg/l have resulted in children losing 4 to 5 IQ points. (79 Pediatrics 457-65, 1987)

LEAD PAINT

"The risk presented by leaded paint is severe. A one gram paint chip containing 5 percent lead could deliver a potentially fatal dose."

"Lead absorption is increased in children with iron deficiencies, digestive problems, and those suffering from malnutrition." "Exterior lead-based paint pigments were not restricted by the US

Consumer Product safety Comm. until 1977." (Defending Lead Poisoning Claims, "For the Defense" April 1992)

Many

ATSDR - ToxFAQs - Lead

ToxFAQs Lead April 1993

Agency for Toxic Substances and Disease Registry

This fact sheet answers the most frequently asked health questions about lead. For more information, you may call 404-639-6000. This fact sheet is one in a series of summaries about hazardous substances and their health effects. This information is important because this substance may harm you. The effects of exposure to any hazardous substance depend on the dose, the duration, how you are exposed, personal traits and habits, and whether other chemicals are present.

SUMMARY: Exposure to lead happens mostly from breathing workplace air or dust, and eating contaminated foods. Children can be exposed from eating lead-based paint chips, or playing in contaminated soil. Lead can damage the nervous system, kidneys, and the immune systems. Lead has been found in at least 922 of 1,300 National Priorities List sites identified by the Environmental Protection Agency.

What is lead? (Pronounced led)

Lead is a naturally occurring bluish-gray metal found in small amounts in the earth's crust. It has no special taste or smell. Lead can be found in all parts of our environment. Most of it came from human activities like mining, manufacturing, and the burning of fossil fuels.

Lead has many different uses, most importantly in the production of batteries. Lead is also in ammunition, metal products (solder and pipes), roofing, and devices to shield x-rays.

Because of health concerns, lead from gasoline, paints and ceramic products, caulking, and pipe solder has been dramatically reduced in recent years.

What happens to lead when it enters the environment?

Lead itself does not break down, but lead compounds are changed by sunlight, air, and water. When released to the air from industry or burning of fossil fuels or waste, it stays in air about 10 days.

Most of the lead in soil comes from particles falling out of the air.

City soils also contain lead from landfills and leaded paint.

Lead sticks to soil particles.

It does not move from soil to underground water or drinking water unless the water is acidic or "soft".

It stays a long time in both soil and water.

How might I be exposed to lead?

Breathing workplace air (lead smelting, refining, and manufacturing industries)

Eating lead-based paint chips

Drinking water that comes from lead pipes or lead soldered fittings

Breathing or ingesting contaminated soil, dust, air, or water near waste sites

Breathing tobacco smoke

Eating contaminated food grown on soil containing lead or food covered with lead-containing dust

Breathing fumes or ingesting lead from hobbies that use lead (leaded-glass, ceramics)

How can lead affect my health?

Lead can affect almost every organ and system in your body. The most sensitive is the central nervous system, particularly in children. Lead also damages kidneys and the immune system. The effects are the same whether it is breathed or swallowed.

Exposure to lead is more dangerous for young and unborn children. Unborn children can be exposed to lead through their mothers. Harmful effects include premature births, smaller babies, decreased mental ability in the infant, learning difficulties, and reduced growth in young children. These effects are more common after exposure to high levels of lead.

In adults, lead may decrease reaction time, cause weakness in fingers, wrists, or ankles, and possibly affect the memory. Lead may cause anemia, a disorder of the blood. It can cause abortion and damage the male reproductive system. The connection between these effects and exposure to low levels of lead is uncertain.

How likely is lead to cause cancer?

The Department of Health and Human Services (DHHS) has determined that lead acetate and lead phosphate may reasonably be anticipated to be carcinogens based on studies in animals. There is inadequate evidence to clearly determine lead's carcinogenicity in humans.

Is there a medical test to show whether I've been exposed to lead?

A blood test is available to measure the amount of lead in your blood and

to estimate the amount of your exposure to lead. Blood tests are commonly used to screen children for potential chronic lead poisoning. The Centers for Disease Control and Prevention (CDC) considers children to have an elevated level of lead if the amount in the blood is at least 10 micrograms per deciliter (10 g/dL). Lead in teeth and bones can be measured with X-rays, but this test is not as readily available.

Has the federal government made recommendations to protect human health?

The Centers for Disease Control and Prevention (CDC) recommends all children be screened for lead poisoning at least once a year. This is especially important for children between 6 months and 6 years old.

The Environmental Protection Agency (EPA) requires lead in air not to exceed 1.5 micrograms per cubic meter (1.5 ug/m³) averaged over 3 months. The sale of leaded gasoline is illegal as of December 31, 1995. EPA limits lead in drinking water to 15 micrograms per liter (15 ug/L).

The Consumer Product Safety Commission (CPSC), EPA, and the states control the levels of lead in drinking water coolers. Water coolers that release lead must be recalled or repaired. New coolers must be lead-free. Drinking water in schools must be tested for lead.

The Department of Housing and Urban Development (HUD) requires that federally funded housing and renovations, public housing, and Indian housing be tested for lead-based paint hazards. Hazards must be fixed by covering the paint or removing it.

The Occupational Safety and Health Administration (OSHA) limits the concentration of lead in workroom air to 50 ug/cubic meter for an 8-hour workday. If a worker has a blood lead level of 40 ug/dL, OSHA requires that worker to be removed from the workroom.

Glossary

Carcinogenicity:
Ability to cause cancer.
Anemia:
Low numbers of red blood cells or hemoglobin.
Ingesting:
Taking food or drink into your body.
Microgram (ug):
One millionth of a gram.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Lead.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 857 - LOW STREAMFLOW CAUSING POPULATION DECLINE BY PREDATION INCREASE.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Low Streamflow Causing Population Decline by Predation Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Overpumping a stream can reduce it to pools connected only by dry riverbed. This reduces or eliminates the capability of a fish to escape land based predators including humans.

SWRCB Memorandum Nov 1999 in File 262.0(27-08-01) -
"[W]hen the fish are confined to pools such as this, the opportunity for predation is significantly higher than during periods of continuous flow..." (pg 7)

"[L]ow [streamflow] flow periods are times when aquatic organisms are most susceptible to predation. Although the stream habitat may exhibit the capability to support large numbers of fish at a relatively low flow, there are significant population declines among aquatic organisms during

these periods because the aquatic habitat is more accessible to land and avian predators." (pg 10)

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Low Streamflow Causing Population Decline by Predation Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 858 - AQUATIC AND RIPARIAN HABITAT DEWATERING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Aquatic and Riparian Habitat Dewatering.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Overpumping a river or other water body, whether by surface or groundwater extraction can dewater habitat and cause the death of aquatic species.

ESA Listed Steelhead Take:

US-National Marine Fisheries Service, SW Region letter Nov 6 1991 New
Los Padres Dam Draft EIR comments:

"Excessive drawdown of [the Carmel Valley and Seaside] aquifers results in a dry lower Carmel River, such that river flow does not reach the sea, preventing steelhead migration." "As the populations and water demand grow, mandatory water rationing and water shortages during droughts will be more severe, and fisheries impacts could worsen."

"We are not sure whether either the CDFG instream flow recommendations or the MPWMD flow recommendations are appropriate to adequately restore the steelhead run."

During the 1987 to 1995 time period the steelhead trout run in the Carmel River dropped. It fell to ZERO for four years at the beginning of that decade. Only single digit numbers of the species showed up for 6 of the last 10 years. This, among other things, caused the steelhead to be federally listed and protected under the Endangered Species Act in 1997.

The California Red-legged Frog was also recently ESA listed (1996) by

the US-Fish & Wildlife Service. The headwaters of the Carmel River host one of the three "largest" (really meaning non-tiny) remaining populations of the frog.

ESA Listed Steelhead Take:

US-National Marine Fisheries Service, SW Region letter Oct 10 1997:

"...Water District Senior Fisheries Biologist Dave Dettman counted 289 dead juvenile steelhead in the Robinson Canyon to Shulte Road reach of the Carmel River. Mr. Dettman observed that the cause of the fish kill was due to no, or minimal flows, and high water temperatures. The fish kill was attributed to pumping rates at Cal-Am wells in excess of Stream flows, and recharge capacity. If these allegations are true, Cal-Am's practices could be significantly affecting a fish species that NMFS has listed for protection under the ESA."

"WR 95-10 Conditions are inadequate in light of the subsequent ESA listing for steelhead and designation of critical habitat and because steelhead are continuing to be taken every year due to the overpumping."

Comments by Steve Edmondson, Team Leader, Fishery Biologist in the Northern California Habitat Conservation Division of the United States Department of Commerce, National Marine Fisheries Service (NMFS) in testimony to California Water Resources Control Board May 30, 2000 in Monterey, CA. Carmel River Steelhead Population Importance:

US-National Marine Fisheries Service, SW Region letter May 20 1996

"...given the importance of the Carmel River Steelhead population for recovery of steelhead coastwide,..."

ESA Listed Frog Take:

US-FWS letter Dec 10 1997:

"Existing water diversions along the Carmel River may be resulting in the take of the threatened The California Red-Legged Frog (*Rana aurora draytonii*)."

"The Service is concerned that water diversions along the Carmel River may be resulting in the take of the threatened California Red-Legged Frog."

ESA Listed Frog Take:

US-FWS letter July 20 1997 to the SWRCB Chairman:

Titled "Potential Endangered Species Act Violation for the California Red-Legged Frog from Water Diversions on the Carmel River, Monterey County, California."

ESA Listed Species Predation:

Overpumping a stream can reduce it to pools connected only by dry

riverbed. This reduces or eliminates the capability of a fish to escape land based predators including humans.

SWRCB Memorandum Nov 1999 in File 262.0(27-08-01) -

"[W]hen the fish are confined to pools such as this, the opportunity for predation is significantly higher than during periods of continuous flow..." (pg 7)

"[L]ow [streamflow] flow periods are times when aquatic organisms are most susceptible to predation. Although the stream habitat may exhibit the capability to support large umbers of fish at a relatively low flow, there are significant population declines among aquatic organisms during these periods because the aquatic habitat is more accessible to land and avian predators." (pg 10)

We feel that sufficient flow for the river must be maintained so that the species are not harmed by dewatering.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Aquatic and Riparian Habitat Dewatering.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 860 - GROUNDWATER WATER TABLE LOWERING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Groundwater Water Table Lowering.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Water Tables around the world are falling at an average rate of three meters (9.8 feet) a year. The Earth's annual water deficit is at 160 billion cubic meters.
-Worldwatch book: Pillar of Sand: Can the Irrigation Miracle last?

"Tapping groundwater consumes liquid capital."
The Ogallala aquifer, underlying eight US Great Plains states is being depleted to such a degree that water tables are falling up to a meter a year. A quarter of all US irrigated cropland is onyl kept watered at the cost of depleting groundwater supplies, and some areas have already been abandoned. WWF, 1990

Please use criteria which compare water table levels with and without existing and proposed pumping.

We recommend that an absolute critical threshold of significance is reached when more water is pumped than is refilled by direct and indirect recharge. Any additional water pumping, no matter how small, is a significant impact when the Water table is permanently descending.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Groundwater Water Table Lowering.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 861 - LOCAL GROUNDWATER OVERDRAFTING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Local Groundwater Overdrafting.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Overdraft" is the difference between the amount of water being drawn
from the ground and nature's ability to replenish the supply.

Lowering the water table can cause water stoppages for neighbors and
can cause the deaths of local trees and plants and the animals and
ecosystems that depend on them.

The groundwater level in the "East Zones" of the Salinas Valley has
dropped more than 70 feet and continues to drop.

Please use criteria which compare water table levels with
and without
existing and proposed pumping.

Please use criteria which measure water pumping rates over
the course
of one month during the driest part of the year - August.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the
objective
(non-subjective) CRITERIA used to determine the impact
significance of
Local Groundwater Overdrafting.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 862 - OVERPUMPING AN AQUIFER.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Overpumping an Aquifer.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Overpumping an Aquifer affects a much larger area than Local Groundwater
Overdrafting and a normally a smaller area than Overpumping a Watershed.
Overpumping an Aquifer is a systemic problem generally involving many
pumps over a wide area.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Overpumping an Aquifer.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 863 - OVERPUMPING A WATERSHED.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Overpumping a Watershed.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Overpumping a Watershed.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 864 - PUMPING THE LAST ACRE FOOT OF WATER FROM THE CARMEL RIVER AQUIFER.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Pumping the Last Acre Foot of Water from the Carmel River Aquifer.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

The Carmel River Aquifer has never been pumped dry, yet. However the wells once were sucking air when there was theoretically 10,000 acre feet of water remaining. Personal communication with MPWMD Manager Darby Feurst, June 1998

How do we know the actual capacity of the Carmel River Aquifer?

How do we know when we have pumped all the water practical out of it?

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Pumping the Last Acre Foot of Water from the Carmel River Aquifer.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

*** 865 - POOR SPAWNING IN CARMEL RIVER FROM OVERPUMPING CAUSED WARM WATER.**

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Poor spawning in Carmel River from overpumping caused warm water.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Poor spawning in Carmel River from overpumping caused warm water.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 866 - AQUIFER COMPACTION FROM OVERPUMPING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Aquifer Compaction from Overpumping.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Aquifer Compaction is a separate impact from Subsidence. Slight
subsidence can occur every year with normal rain and drought cycles.
Aquifer Compaction is the permanent loss of a soil's water bearing
capacity.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact
significance of
Aquifer Compaction from Overpumping.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 867 - NEW WATER HOOKUPS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
New Water Hookups.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

NEW CONNECTIONS CONTINUE
In the meantime, in the very face of "severe" rationing, Cal-Am and the District continue to allow new users to hook up to their water system. Among other projects Cal-Am recently hooked up a Car Wash at the mouth of Carmel Valley. Pacific Grove approved a 50,000 square foot expansion of a Supermarket on May 6 1998. Pebble Beach Company proposes another golf course and 350 houses. Carmel Valley's September Ranch was approved in December 1998 to build 100 houses and an Equestrian center. Although a judge turned the project down in Sept. 1999 in part because of a lack of water, the developer intends to try again.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
New Water Hookups.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal

laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 868 - ADDITIONAL WATER ALLOCATION FROM A WATER DISTRICT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Additional Water Allocation from a Water District.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Additional Water Allocation from a Water District.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 869 - RESIDENTIAL WATER USE INCREASE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Residential Water Use Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Residential Water Use Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 870 - HOTEL WATER USE INCREASE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Hotel Water Use Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Hotel Water use:
Standard hotels use 0.10 acre feet of water per room per year.

Luxury hotels use 0.21 acre feet of water per room per year.

Meeting Rooms use 0.541 acre feet of water per 1000 square feet per year.

Most standard hotels have swimming pools and spas.
Monterey Peninsula
Water Management District, May 2000

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Hotel Water Use Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 871 - MEETING ROOM WATER USE INCREASE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Meeting Room Water Use Increase.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Meeting Rooms use 0.541 acre feet of water per 1000 square feet per year. Monterey Peninsula Water Management District, May 2000

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Meeting Room Water Use Increase.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 873 - SWIMMING POOL WATER USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Swimming Pool Water Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Any exposed body of water evaporates in warm weather. The rate depends upon air and water temperatures, humidity, and water surface area.
Carmel Valley's San Clemente Rancho pool evaporates about 2 inches per week in the summer. (About 1 acre foot of evaporation every 6 weeks per acre of swimming pool surface) Bruce Dormody, owner, personal communication.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Swimming Pool Water Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 874 - GOLF COURSE WATER USE.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
Golf Course Water Use.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

An 18 hole golf course can use as much as 350 acre feet of water or more per year. California's Carmel Valley Ranch Resort used 372 acre feet in 1988 according to the Monterey Peninsula Water Management District.

Golf courses use considerably more water during startup years.
Golf courses can use 50% to double normal use during startup years (e.g. Pebble Beach Company's Spanish Bay golf course records show twice the normal amount of water use in its first few years).

"Greens may account for up to 10% of the area of a golf course."
-Richard D. Klein, Protecting the Aquatic Environment from the Effects of Golf Courses. Oct 1993

Golf Course Water Use	Acre Feet	Water Year
1 Cypress Point	110	1988
2 Monterey Peninsula Shore	117	1988
3 Monterey Peninsula Dunes	102	1988
4 Poppy Hills	142	1988
5 Pebble Beach	159	1988
6 Spyglass	147	1988
7 Spanish Bay	196	1988
8 Peter Hay	10	1988
9 Old Del Monte	158	1988
10 Pacific Grove	108	1988
11 Rancho Canada West	305	1988
12 Rancho Canada East	305	1988
13 Quail Lodge	327	1988
14 Carmel Valley Ranch	372	1988
15 Laguna Seca	239	1996
16 Navy School	198	1991
17 Ft Ord 1 (Bayonet)	0	1996
18 Ft Ord 2 (Black Horse)	282	1996
19 Pebble Beach Driving Range	7	1988
Total Acre feet =	3284	

(Data from Monterey Peninsula Water Management District.)

What is the Golf course water DEMAND (in acre feet / year) during construction?

What is the Golf course water SOURCE during construction?

What is the Golf course water DEMAND (in acre feet / year) during TURF startup?

What is the Golf course water SOURCE during TURF startup?

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Golf Course Water Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 875 - PEBBLE BEACH FIELDS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Pebble Beach Fields.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Pebble Beach Fields use large amounts of water.

Acre feet	
RLS Fields	12.1 (1990)
Practice fairway	6.5 (1990)
Collins Field	5.8 (PBC estimate)

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Pebble Beach Fields.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergetic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 876 - SPRINKLER WATER APPLICATION.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Sprinkler Water Application.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

"Sprinkler Irrigation loses significantly more water to evaporation than flood irrigation. Sprinkling exposes approximately 1000 times more water surface area to the air than flooding."
-Bill Ohrman, "I have had years of experience running an irrigated ranch and also heading an irrigation company." EFJ, Yule 2000

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Sprinkler Water Application.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 877 - FLOOD IRRIGATION.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Flood Irrigation.

Irrigation by sprinklers loses significantly more water to evaporation than flood irrigation. Sprinkling exposes approximately 1000 times more water surface area to the air than flooding.
-Bill Ohrman, "I have had years of experience running an irrigated ranch and also heading an irrigation company." EFJ, Yule 2000

* 878 - TURFGRASS WATER CONSERVATION PRACTICES.

The Document appears to have ignored this potentially feasible Mitigation.

If you do not adopt this mitigation measure, please explain fully why it is not feasible.

Please carefully analyze and disclose the potential benefits of Turfgrass Water Conservation Practices.

Irrigation by Need vs by Calendar Saves Significant Water
"Using visual indicators as a control [as opposed to calendar scheduling] and with tensiometers and pan evaporation as the guide to irrigatio scheduling, Marsh et al. (1980) and Youngner et al. (1981) used 55 percent less water on warm season grasses without loss of turfgrass quality."

Low-Water-Use Turfgrass
Some turfgrass selections can cut water consumption in half. "Turfgrass cultivars have a fairly wide range of water use rates making generalizations difficult." USGA

"Compared to other plants and landscape options, turfgrasses have relatively high rates of water consumption. In turfgrass systems, up to 90 percent of irrigation water and precipitation may be lost by evapotranspiration." USGA

Mowing

More frequent mowing decreases water consumption.
"Mowing with a dull blade decreased long-term water use by decreasing leaf area..." USGA

Fertilization
Turfgrass water use rates increase with increased nitrogen nutrition.
Feldrake et al. (1983) observed a 13% increase in water use when 0.4 kg 100 m² of nitrogen was applied monthly to Kentucky bluegrass during the spring and summer compared to a single spring application. USGA

* 879 - MORE PERSISTENT TRIBUTARY DELTAS IN MAINSTEM REDUCE SPAWNING HABITAT.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of More Persistent Tributary Deltas in Mainstem Reduce Spawning Habitat.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of More Persistent Tributary Deltas in Mainstem Reduce Spawning Habitat.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 880 - RIVERBANK HARDENING AND RIPARIAN AREA LOSS FROM CONCRETE RIP-RAP.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Riverbank Hardening and Riparian Area Loss from Concrete Rip-Rap.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Riverbank Hardening and Riparian Area Loss from Concrete Rip-Rap.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 881 - BREACHING RIVER MOUTH SAND BAR.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of Breaching River Mouth Sand Bar.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"Breaching Sand Bar at River Mouth and water quality problems due to pesticide contamination have adversely affected fish and aquatic habitat." Pajaro River Watershed Management Plan, Final 1999 pg 3-124

Breaching a sand bar can flush fish into the ocean killing a large percentage.

Breaching a sand bar can reduce the water level in a lagoon decreasing the wetland area.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Breaching River Mouth Sand Bar.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 882 - FIRE PROTECTION WATER REQUIREMENTS.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of Fire Protection Water Requirements.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

NEW FIRE PROTECTION NEEDS AS OF MARCH 1999
The PUC Requires Cal-Am to provide fire service water connections to any property within the Cal-Am service area regardless of where the property's water supply originates.
"This ... has the potential to make it more difficult for Cal-Am to achieve the water production goal set by the State Water Resources Control Board (SWRCB) in its Order No. 95-10. Fire services require

periodic flushing and testing, and fire hydrant testing contributes to the amount of unaccounted water use within the Cal-Am system."
-MPWMD Staff Agenda Report pg 53, March 15 1999

Please quantify the maximum amount of water potentially needed for periodic flushing and testing.

Please quantify the amount and percentage of unaccounted water use.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Fire Protection Water Requirements.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 883 - EXTREMES OF HIGH OR LOW WATER.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Extremes of High or Low Water.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Extremes of High or Low Water.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 884 - RECLAIMED WATER USE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Reclaimed Water Use.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

Demand for Reclaimed water drops at least 25% during the rainy season.

Reclaimed water from the CAWD system has a salinity content too high
for use with golf course greens.

"... high salinity levels (commonly above an electrical conductivity of
four (4) deciSiemens per meter) for many crops) make it more difficult
for plant roots to extract water from the soil, which may reduce growth
rates." Donahue et al 1983, Soils: An Introduction to soils and plant
growth, Prentice-Hall

Please specify the users of the Reclaimed water and their estimated
daily use in amount.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Reclaimed Water Use.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable,
credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH
criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 885 - WATER SUPPLY CAPACITY.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Water Supply Capacity.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

Please graph the water capacity needed through the construction phase of the project.

Please graph the water capacity available and permitted through the construction phase of the project.

Please identify the source of water through the construction phase of the project.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Water Supply Capacity.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20a. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 886 - STRONG FREQUENT AND LONG (200 YEAR) DROUGHTS.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of
Strong Frequent and Long (200 year) Droughts.

If you claim the document contains proof of no-significant impact for
this impact please explicitly state the page number and paragraph.

CALIFORNIA HAS RECENTLY HAD TWO - ONE HUNDRED YEAR DROUGHTS
California has been subject to two droughts exceeding 100 years in the last 1000 years (1),(2). One drought exceeded two hundred years (3).

"..a study of tree stumps rooted in present day lakes, marshes and streams, which suggests that California's Sierra Nevada experienced extremely severe drought conditions for more than two centuries before AD ~ 1112 [AD 912] and for more than 140 years before AD ~ 1350 [AD 1210]. During these periods, runoff from the Sierra was significantly lower than during any of the persistent droughts that have occurred in the region over the past 140 years." (1)

"Meanwhile, researchers from the California State University believe they have found further evidence that small changes in global climate can have dramatic regional impacts. Radiocarbon data suggest that California suffered two periods of extended severe drought during the Medieval Warm Period between AD 900 to AD 1400. These droughts which lasted 220 years and 140 years respectively, were even more severe than the 1987-1992 drought and the Dust Bowl drought of the 1930s. Richard Madole from the US Geological Survey suggests that this different climate, with temperatures not much higher than current temperatures but with very much lowered water tables, could mean that California may already be near the threshold of desertification. The study prompted researcher, S. Stine, to state: "We can't predict when (another such) drought will come, but the consequences would be profound...The mind boggles about what would happen to California's agriculture, should global warming tip the Local climate towards another drought period." (From the GREENPEACE Climate Impacts Database Web site.)

Failing to recognize that California droughts can last and have lasted beyond a six (6) year period - to decades and centuries - makes conclusions based on a 6 year drought scientifically indefensible and invalid. According to accepted science AT THE VERY LEAST - ONE THIRD (33%) of California's last eleven hundred years experienced what we

define as drought conditions.

"The period from 1850 to 1950 had one of the lowest frequencies of drought of any one hundred years period in the 2089 year record [from 101 BC to AD 1988]." (4)

"The averages or norms of weather properties do not comprise a sufficient set of statistics to describe the atmospheric environment. The variability and particularly the extremes of weather are often more useful for climate applications than are norms." (5)

Central Coastal California Specifically
"There have been major fluctuations in precipitation variability including changes in the frequency of extremes and rare events that have not occurred in the modern record." (6)

"The extremely dry year of 1841 is also well documented. The reconstructed value for this year is only 0.53 inches [of rain], ..."

"Most of the seventeenth century was characterized by relatively high frequencies of extremes." "Variability continued at a high level into the beginning of the twentieth century, dropped markedly in the middle of the century, and began to increase again in the last 20-30 years." (6)
"There is some evidence in the last 20 years that conditions may be becoming more variable again. For example 1976 was the driest year in more than 50 years, and the second and third wettest years on record have occurred in 1978 and 1983." (6)

"If variability continues to increase, and evidence from the reconstructions suggest it might, the consequences for water use in Central California could be major."

"How successful would the present systems be in meeting demand during a period when six out of seven years were below normal, or during a five-year period when precipitation averaged two-thirds of normal, or during an individual year as dry as 1841?" (6)

(6) "400 years of Central California Precipitation Variability Reconstructed from Tree Rings", J. Michaelson, L. Haston, F. Davis, 1987.

a. Potential Drought Severity is highly underestimated. The worst drought year should be described and quantified.

Please recognize and incorporate into the calculations the true severity of local droughts.

b. Potential Drought Durations are highly underestimated. Please recognize and incorporate into the calculations that local droughts can and have lasted 100 to 200 years.

c. Potential Drought frequency is highly underestimated. At least one third and possibly as much as half of all years should be expected to be drought years. Please recognize and incorporate into the calculations the true frequency of local droughts.

Please prepare an analysis of the water runoff graphs during reasonably frequent severe, long droughts.

Please analyze the fewest number of years of drought which could render the project ineffective.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Strong Frequent and Long (200 year) Droughts.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergistic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 887 - DESERTIFICATION.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Desertification.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

"Desertification threatens about one third of the world's land surface and affects the lives of some 850 million people." (WWF, Atlas of Environment, 1990)

There are five main causes of desertification:

1. Deforestation, especially of upland watersheds.
2. inappropriate irrigation resulting in salinization or alkalization of agricultural land.
3. Overcultivation of poor soils.
4. Overgrazing by cattle, sheep, goats and camels on fragile rangeland.
5. excessive cutting of fuelwood in drylands. (WWF, Atlas of Environment, 1990)

"The [worldwide] process of desertification seems to be accelerating in

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Desertification.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal

laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 892 - MEDIEVAL WARM PERIOD BETWEEN AD 900 TO AD 1400. THESE DROUGHTS WHICH.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of

Medieval Warm Period between AD 900 to AD 1400. These droughts which.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Medieval Warm Period between AD 900 to AD 1400. These droughts which.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 904 - DATABASE WEB SITE.).

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of Database Web site.).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Database Web site.).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 905 - FAILING TO RECOGNIZE THAT CALIFORNIA DROUGHTS CAN LAST AND HAVE LASTED.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Failing to recognize that California droughts can last and have lasted.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Failing to recognize that California droughts can last and have lasted.

1b. If no objective criteria are used please state that clearly.

* 906 - BEYOND A SIX (6) YEAR PERIOD - TO DECADES AND CENTURIES - MAKES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
beyond a six (6) year period - to decades and centuries - makes.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of beyond a six (6) year period - to decades and centuries - makes.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 907 - CONCLUSIONS BASED ON A 6 YEAR DROUGHT SCIENTIFICALLY INDEFENSIBLE AND.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of conclusions based on a 6 year drought scientifically indefensible and.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of conclusions based on a 6 year drought scientifically indefensible and.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 908 - INVALID. ACCORDING TO ACCEPTED SCIENCE AT THE VERY LEAST - ONE THIRD.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
invalid. According to accepted science AT THE VERY LEAST - ONE THIRD.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
invalid. According to accepted science AT THE VERY LEAST - ONE THIRD.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows

whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 909 - (33%) OF CALIFORNIA'S LAST ELEVEN HUNDRED YEARS EXPERIENCED WHAT WE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of (33%) of California's last eleven hundred years experienced what we.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of (33%) of California's last eleven hundred years experienced what we.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 910 - DEFINE AS DROUGHT CONDITIONS..

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of define as drought conditions..

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of define as drought conditions..

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 911 - THE PERIOD FROM 1850 TO 1950 HAD ONE OF THE LOWEST FREQUENCIES OF.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

The period from 1850 to 1950 had one of the lowest frequencies of.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
The period from 1850 to 1950 had one of the lowest frequencies of.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 912 - DROUGHT OF ANY ONE HUNDRED YEARS PERIOD IN THE 2089 YEAR RECORD [FROM.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of drought of any one hundred years period in the 2089 year record [from.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of drought of any one hundred years period in the 2089 year record [from.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 915 - SUFFICIENT SET OF STATISTICS TO DESCRIBE THE ATMOSPHERIC ENVIRONMENT..

The Document appears to have ignored this potentially significant impact.

Please carefully analyze and disclose the potential impacts of

sufficient set of statistics to describe the atmospheric environment..

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of sufficient set of statistics to describe the atmospheric environment..

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 916 - THE VARIABILITY AND PARTICULARLY THE EXTREMES OF WEATHER ARE OFTEN MORE.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

The variability and particularly the extremes of weather are often more.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
The variability and particularly the extremes of weather are often more.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.
 12. Please state the most extreme values which could be encountered.
 13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
 14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
 15. Please provide a graph of HISTORICAL measurements.
 16. Please quantify the length of time this impact would last.
 17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
 18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
 19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
 - 20s. Please state whether this MARGIN of ERROR is measured or assumed.
 - 20b. If no margin of error is used please state that clearly.
 21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
 22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
 23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
 24. Please state whether the MARGIN of ERROR is measured or assumed.
 25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
 26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
 27. Please state whether the MARGIN of ERROR is measured or assumed.
 28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
 29. Please list all potential CUMULATIVE impacts related to this one.
 30. Please describe all potential CUMULATIVE impacts related to this one.
 31. Please quantify all potential CUMULATIVE impacts related to this one.
 32. Please list, describe and quantify all potential compound and synergetic impacts.
 33. Please list, describe and quantify all Construction impacts related to this one.
 34. Please list, describe and quantify all Growth impacts related to this one.
 35. Please list, describe and quantify all Indirect impacts related to this one.
 36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
 37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
 38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
 39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
 40. Please state whether the margin of error is measured or assumed.
 41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
 42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
 43. Please name each EXPERT who prepared and reviewed this impact.
 44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
 45. Please provide AVOIDANCE MITIGATION for this impact.
 46. Please provide the reverse of this impact as Mitigation.
 47. Please provide an ALTERNATIVE which avoids this impact.
 48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 921 - NOT OCCURRED IN THE MODERN RECORD." (6).

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of not occurred in the modern record." (6).

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of not occurred in the modern record." (6).

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.
9. Please state the variance's MARGINS of ERROR or confidence level.
10. Please state whether this MARGIN of ERROR is measured or assumed.
11. If an average is used, please state which kind of average.
12. Please state the most extreme values which could be encountered.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.
15. Please provide a graph of HISTORICAL measurements.
16. Please quantify the length of time this impact would last.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.
- 20s. Please state whether this MARGIN of ERROR is measured or assumed.
- 20b. If no margin of error is used please state that clearly.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
24. Please state whether the MARGIN of ERROR is measured or assumed.
25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.
26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.
27. Please state whether the MARGIN of ERROR is measured or assumed.
28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.
29. Please list all potential CUMULATIVE impacts related to this one.
- 30 Please describe all potential CUMULATIVE impacts related to this one.
31. Please quantify all potential CUMULATIVE impacts related to this one.
32. Please list, describe and quantify all potential compound and synergetic impacts.
33. Please list, describe and quantify all Construction impacts related to this one.
34. Please list, describe and quantify all Growth impacts related to this one.
35. Please list, describe and quantify all Indirect impacts related to this one.
36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.
37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.
38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.
39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.
40. Please state whether the margin of error is measured or assumed.
41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.
42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.
43. Please name each EXPERT who prepared and reviewed this impact.
44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.
45. Please provide AVOIDANCE MITIGATION for this impact.
46. Please provide the reverse of this impact as Mitigation.
47. Please provide an ALTERNATIVE which avoids this impact.
48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

- * 922 - THE EXTREMELY DRY YEAR OF 1841 IS ALSO WELL DOCUMENTED. THE.

The Document appears to have ignored this potentially significant impact.
Please carefully analyze and disclose the potential impacts of
The extremely dry year of 1841 is also well documented. The.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.
- 1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
The extremely dry year of 1841 is also well documented. The.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 923 - RECONSTRUCTED VALUE FOR THIS YEAR IS ONLY 0.53 INCHES [OF RAIN].

* 924 - MOST OF THE SEVENTEENTH CENTURY WAS CHARACTERIZED BY RELATIVELY HIGH.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of

Most of the seventeenth century was characterized by relatively high.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 932 - IF VARIABILITY CONTINUES TO INCREASE, AND EVIDENCE FROM THE.

The Document appears to have ignored this potentially significant Impact.

Please carefully analyze and disclose the potential impacts of

If variability continues to increase, and evidence from the.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of If variability continues to increase, and evidence from the.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

impact.

48. Please list all other studies initiated by the applicant
related to this impact, including subject matter breadth,
author's names and dates and where they
can be examined.

-

* 939 - (1) S. STINE.

-

* 940 - PATAGONIA DURING MEDIEVAL TIME".

-

* 941 - 1994.

The Document appears to have ignored this potentially
significant Impact.
Please carefully analyze and disclose the potential impacts
of
1994.

If you claim the document contains proof of no-significant-
impact for
this impact please explicitly state the page number and
paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the
objective
(non-subjective) CRITERIA used to determine the impact
significance of
1994.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe
how the threshold of significance chosen is scientifically
testable, repeatable, falsifiable,
credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS
(numbers) used to determine the significance for EACH
criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.	25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.	-
5a. Please state the METHOD of measurement used to determine the significance for each criteria.	26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	* 943 - DRY SPELL".
5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.	27. Please state whether the MARGIN of ERROR is measured or assumed.	-
6. Please quantify the existing or current BASELINE measurement (level) for each criteria.	28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.	* 944 - (3) "CALIFORNIA'S CLIMATE POISED ON A KNIFE EDGE".
7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.	29. Please list all potential CUMULATIVE impacts related to this one.	* 945 - P.10.
8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.	30. Please describe all potential CUMULATIVE impacts related to this one.	-
9. Please state the variance's MARGINS of ERROR or confidence level.	31. Please quantify all potential CUMULATIVE impacts related to this one.	* 946 - (4) HUGHES.
10. Please state whether this MARGIN of ERROR is measured or assumed.	32. Please list, describe and quantify all potential compound and synergetic impacts.	The Document appears to have ignored this potentially feasible Mitigation.
11. If an average is used, please state which kind of average.	33. Please list, describe and quantify all Construction impacts related to this one.	If you do not adopt this mitigation measure, please explain fully why it is not feasible.
12. Please state the most extreme values which could be encountered.	34. Please list, describe and quantify all Growth impacts related to this one.	Please carefully analyze and disclose the potential benefits of (4) Hughes.
13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.	35. Please list, describe and quantify all Indirect impacts related to this one.	since 1012 B.C. recorded in giant sequoia tree rings." Climate Dynamics (1992) 6: 161-167 (5) Water Resources and Implications of CLimate Uncertainty, USGS 1989 (6) "400 years of Central California Precipitation Variability Reconstructed from Tree Rings", J. Michaelson, L. Haston, F. Davis, 1987.
14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.	36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.	-
15. Please provide a graph of HISTORICAL measurements.	37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.	* 947 - WATER SUPPLY INTERRUPTIONS.
16. Please quantify the length of time this impact would last.	38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.	The Document appears to have ignored this potentially significant Impact.
17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.	39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.	Please carefully analyze and disclose the potential impacts of Water Supply Interruptions.
18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.	40. Please state whether the margin of error is measured or assumed.	If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.
19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.	41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.	QUANTIFICATION OF BASELINES AND IMPACTS:
20s. Please state whether this MARGIN of ERROR is measured or assumed.	42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.	This impact appears to be potentially significant.
20b. If no margin of error is used please state that clearly.	43. Please name each EXPERT who prepared and reviewed this impact.	1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Water Supply Interruptions.
21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.	44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.	1b. If no objective criteria are used please state that clearly.
22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.	45. Please provide AVOIDANCE MITIGATION for this impact.	2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.
23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.	46. Please provide the reverse of this impact as Mitigation.	3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.
24. Please state whether the MARGIN of ERROR is measured or assumed.	47. Please provide an ALTERNATIVE which avoids this impact.	3b. Please quote the definition used.
	48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.	4. If no measurement units are used please state that clearly.
		5a. Please state the METHOD of measurement used to determine the significance for each criteria.

* 942 - (2) F. ALAYNE STREET-PERROTT.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 948 - DECREASED WATER QUANTITY FOR OTHER USES.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Decreased Water Quantity For Other Uses.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of
Decreased Water Quantity For Other Uses.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 949 - SEWAGE DISCHARGE DUE TO FLOODING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Sewage Discharge due to Flooding.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

During past flooding events Carmel Area Wastewater District CAWD has released sewage. This has resulted in cease and desist orders.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective
(non-subjective) CRITERIA used to determine the impact significance of
Sewage Discharge due to Flooding.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 950 - HUMAN HEALTH HAZARD DUE TO FLOODING.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Human Health Hazard Due to Flooding.

If you claim the document contains proof of no-significant-impact for
this impact please explicitly state the page number and paragraph.

The Southern California Coastal Water Research Project
states in January

1999 that "measurements for viruses found in the human digestive system have been taken, primarily at storm drain sites, along a 300 mile stretch of the California Coastline. Those viruses have been detected more than 50 percent of the time after heavy rains and are even detected in summer when only a trickle of water is coming through the storm drain."

During every Carmel River flood in the 1990's Monterey County Dept. of Environmental Health has issued a "No-Contact" warning due to excessive nitrate contamination of the river due to Carmel Valley septic systems.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Human Health Hazard Due to Flooding.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

-

* 951 - FLOODING CAUSED EVACUATION PROBLEMS.

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of
Flooding Caused Evacuation Problems.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Carmel Valley is a good example of a typical western river impacted by humans who did not plan for evacuations when flooding occurs.
There is a single road along one bank of the river and many houses are built into and near the 100 year floodplain. When flooding occurs there is dangerous traffic congestion as emergency staff and residents all need to use the single road at the same time.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Flooding Caused Evacuation Problems.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30. Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

*** 952 - RECLAIMED WATER FOR GOLF COURSES.**

The Document appears to have ignored this potentially significant Impact.
Please carefully analyze and disclose the potential impacts of Reclaimed Water for Golf Courses.

If you claim the document contains proof of no-significant-impact for this impact please explicitly state the page number and paragraph.

Demand for Reclaimed water drops at least 25% during the rainy season.
Reclaimed water from the CAWD system has a salinity content too high for use with golf course greens.

"... high salinity levels (commonly above an electrical conductivity of four (4) deciSiemens per meter) for many crops) make it more difficult for plant roots to extract water from the soil, which may reduce growth rates." Donahue et al 1983, Soils: An Introduction to soils and plant growth, Prentice-Hall

In the 1990's on the Monterey Peninsula in California a water district, a community services district and a corporation signed a contract to create recycled water for golf course use. The project failed to provide the promised water.

The deal (written by the corporation) gave the corporation some 380 acre feet of contract drinking water if the system generated 800 acre feet of reclaimed, or recycled, water.

The maximum amount of recycled water the project produced was only 500 to 600 acre feet, and even that water wasn't good enough to be used on the golf courses as it contained too much sodium (about 150 ppm v the needed 92 ppm). (Carmel Area Wastewater District General Manager Ray Van Doren at Pebble Beach Community Services District June 2000 meeting)

Golf Course Water Use	Acre Feet	Water Year
1 Cypress Point	110	1988
2 Monterey Peninsula Shore	117	1988
3 Monterey Peninsula Dunes	102	1988
4 Poppy Hills	142	1988
5 Pebble Beach	159	1988
6 Spyglass	147	1988
7 Spanish Bay	196	1988
8 Peter Hay	10	1988
9 Old Del Monte	158	1988
10 Pacific Grove	108	1988
11 Rancho Canada West	305	1988
12 Rancho Canada East	305	1988
13 Quail Lodge	327	1988
14 Carmel Valley Ranch	372	1988
15 Laguna Seca	239	1996
16 Navy School	198	1991
17 Ft Ord 1 (Bayonet)	0	1996
18 Ft Ord 2 (Black Horse)	282	1996
19 Pebble Beach Driving Range	7	1988
Total Acre feet =	3284	

Data from Monterey Peninsula Water Management District.

QUANTIFICATION OF BASELINES AND IMPACTS:

This impact appears to be potentially significant.

1a. Please clearly identify by NAME and describe each of the objective (non-subjective) CRITERIA used to determine the impact significance of Reclaimed Water for Golf Courses.

1b. If no objective criteria are used please state that clearly.

2. If no objective criteria are used please clearly describe how the threshold of significance chosen is scientifically testable, repeatable, falsifiable, credible and defensible.

3a. Please state the NAME of the MEASUREMENT UNITS (numbers) used to determine the significance for EACH criteria.

3b. Please quote the definition used.

4. If no measurement units are used please state that clearly.

5a. Please state the METHOD of measurement used to determine the significance for each criteria.

5b. If no method of measurement was used please state that clearly for each criteria and explain thoroughly how the data was obtained.

6. Please quantify the existing or current BASELINE measurement (level) for each criteria.

7. Please state its MARGIN of ERROR or a confidence level and whether the MARGIN of ERROR is measured or assumed.

8. Please state the VARIANCE or fluctuation, assumed or expected for each of the criteria listed above.

9. Please state the variance's MARGINS of ERROR or confidence level.

10. Please state whether this MARGIN of ERROR is measured or assumed.

11. If an average is used, please state which kind of average.

12. Please state the most extreme values which could be encountered.

13. Please describe and quantify which criteria and ASSUMPTIONS the Impact Significance predictions are most SENSITIVE.

14. Please analyze and quantify how sensitive those predictions are to reasonably foreseeable varying criteria and assumptions.

15. Please provide a graph of HISTORICAL measurements.

16. Please quantify the length of time this impact would last.

17. Please quantify how this impact would vary over that time period. Please use a graph for clarity.

18. Please state the THRESHOLD number at which the impact changes from significant to less-than-significant and the clear criteria and rationale for that number.

19. Please provide the MARGIN of ERROR used (in percent and absolute amount) for measuring the Significance THRESHOLD Level.

20s. Please state whether this MARGIN of ERROR is measured or assumed.

20b. If no margin of error is used please state that clearly.

21. Please disclose all threshold numbers at which the impact changes from LEGAL to ILLEGAL for ALL related and potentially relevant local, state and federal laws.

22. Some Impacts increase in a LINEAR RELATIONSHIP with increasing input, other impacts have complex non-linear relationships. Please provide a graph that shows whether the relationship is linear or otherwise - when at and near the significance threshold values.

23. Please quantify the total PERCENT MAXIMUM CHANGE, to which the IMPACT could raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

24. Please state whether the MARGIN of ERROR is measured or assumed.

25. Please state whether this total PERCENT maximum change is an AVERAGE amount, a worst case expected or a best case expected.

26. Please quantify the ABSOLUTE MAXIMUM AMOUNT, to which the impact would raise or lower the baseline number and its MARGIN of ERROR or confidence levels.

27. Please state whether the MARGIN of ERROR is measured or assumed.

28. Please state whether this total maximum change amount is an AVERAGE amount, a worst case expected or a best case expected.

29. Please list all potential CUMULATIVE impacts related to this one.

30 Please describe all potential CUMULATIVE impacts related to this one.

31. Please quantify all potential CUMULATIVE impacts related to this one.

32. Please list, describe and quantify all potential compound and synergetic impacts.

33. Please list, describe and quantify all Construction impacts related to this one.

34. Please list, describe and quantify all Growth impacts related to this one.

35. Please list, describe and quantify all Indirect impacts related to this one.

36. Please list and quantify every OTHER IMPACT - this impact or mitigation could increase.

37. Please describe the EXISTING USABLE limit of the RESOURCE this impact affects.

38. Please state the METHOD of measurement used to determine the limit of the RESOURCE this impact affects.

39. Please describe the MARGIN of ERROR or confidence level used to measure how much of this resource is left.

40. Please state whether the margin of error is measured or assumed.

41. Please quantify what is the maximum amount (in AMOUNT of existing) of this resource that can be lost and still be restored.

42. Please quantify what is the MAXIMUM amount (in PERCENTAGE of existing) of this resource that can be LOST and still be restored.

43. Please name each EXPERT who prepared and reviewed this impact.

44. Please cite each expert's training, and peer reviewed, validly published articles specific to this impact.

45. Please provide AVOIDANCE MITIGATION for this impact.

46. Please provide the reverse of this impact as Mitigation.

47. Please provide an ALTERNATIVE which avoids this impact.

48. Please list all other studies initiated by the applicant related to this impact, including subject matter breadth, author's names and dates and where they can be examined.

* 953 - LU-A2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
LU-A2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the
Primary mitigation measure:
LU-A2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the
primary mitigation measure:
LU-A2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the
primary mitigation measure: LU-A2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the

mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
LU-A2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
LU-A2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 954 - GSS A1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
GSS A1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
GSS A1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
GSS A1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS A1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS A1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS A1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
GSS B-1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS B-1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS B-1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS B-1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 958 - GSS B-1-3.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
GSS B-1-3.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
GSS B-1-3.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
GSS B-1-3.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS B-1-3.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS B-1-3.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:

GSS B-1-3.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS D1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS D1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS D1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 962 - GSS D2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
GSS D2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
GSS D2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
GSS D2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS D2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS D2.

D2. Please provide a survey reporting the number of times this secondary

mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
GSS D2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 963 - GSS D3.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
GSS D3.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
GSS D3.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
GSS D3.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: GSS D3.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 966 - BIO A1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO A1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO A1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO A1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO A1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs

unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 967 - BIO A1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO A1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO A1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO A1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO A1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 971 - BIO A5.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:

BIO A5.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the

Primary mitigation measure:

BIO A5.

using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO A5.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO A5.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A5.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO A5.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO B1-4.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO B1-4.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO B1-4.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 976 - BIO B1-5.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO B1-5.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO B1-5.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO B1-5.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO B1-5.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO B1-5.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO B1-5.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 980 - BIO C1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO C1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO C1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO C1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO C1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: BIO C1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: BIO C1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 981 - BIO C1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO C1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO C1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO C1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO C1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO C1-2.

D2. Please provide a survey reporting the number of times this secondary

mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO C1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 985 - BIO D1-3.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D1-3.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:

BIO D1-3.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:

BIO D1-3.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D1-3.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs

unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D1-3.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D1-3.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

BIO D3.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 989 - BIO D4.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D4.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO D4.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D4.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D4.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D4.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D4.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 990 - BIO D4-1C.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D4-1C.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the

Primary mitigation measure:

BIO D4-1C.

using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D4-1C.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D4-1C.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 993 - BIO D5-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D5-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO D5-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D5-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D5-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D5-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D5-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 994 - BIO D5-3.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D5-3.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO D5-3.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D5-3.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D5-3.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D5-3.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D5-3.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 998 - BIO D8-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D8-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO D8-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D8-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D8-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D8-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs

unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D8-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 999 - BIO D8-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO D8-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO D8-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO D8-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO D8-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D8-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO D8-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

BIO I1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO I1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines

listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 100 - BIO I1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
BIO I1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
BIO I1-2.

using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
BIO I1-2.

using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: BIO I1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO I1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
BIO I1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-
* 100 - HWQ B1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
HWQ B1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
HWQ B1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
HWQ B1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: HWQ B1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
HWQ B1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
HWQ B1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 100 - HWQ B1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
HWQ B1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
HWQ B1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
HWQ B1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: HWQ B1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
HWQ B1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
HWQ B1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

primary mitigation measure:
PSU D1C.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the
primary mitigation measure: PSU D1C.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
PSU D1C.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
PSU D1C.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 101 - PSU E1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
PSU E1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
PSU E1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
PSU E1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: PSU E1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
PSU E1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
PSU E1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 101 - AES B1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
AES B1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
AES B1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
AES B1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful

implementation of an identical or reasonably identical example for the primary mitigation measure: AES B1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AES B1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AES B1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 101 - AES B1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
AES B1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
AES B1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
AES B1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: AES B1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AES B1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs

unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AES B1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 102 - TC A2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC A2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC A2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC A2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC A2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: TC A2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure: TC A2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 102 - TC B1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC B1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC B1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC B1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC B1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:

TC B1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC B1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines

listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 102 - TC A2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC A2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC A2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC A2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC A2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC A2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC A2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 102 - TC C2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC C2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC C2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC C2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC C2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC C2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC C2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 102 - TC F1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC F1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC F1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC F1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC F1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is

defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC F1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC F1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of

them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 103 - TC G1-1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC G1-1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the
Primary mitigation measure:
TC G1-1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the
primary mitigation measure:
TC G1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the
primary mitigation measure: TC G1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC G1-1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC G1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 103 - TC G1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC G1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC G1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC G1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC G1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC G1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC G1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 103 - TC G1C.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
TC G1C.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
TC G1C.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
TC G1C.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: TC G1C.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
TC G1C.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:

TC G1C.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 103 - AQ C1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
AQ C1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
AQ C1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
AQ C1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful

implementation of an identical or reasonably identical example for the primary mitigation measure: AQ C1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AQ C1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
AQ C1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

NOISE B1-1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-1.

D2. Please provide a survey reporting the number of times this secondary

mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 103 - NOISE B1-2.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
NOISE B1-2.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
NOISE B1-2.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
NOISE B1-2.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-2.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-2.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-2.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSIs and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

-

* 104 - NOISE B1-3.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
NOISE B1-3.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
NOISE B1-3.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
NOISE B1-3.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-3.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:

NOISE B1-3.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-3.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 104 - NOISE B1-6.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
NOISE B1-6.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
NOISE B1-6.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
NOISE B1-6.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-6.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-6.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-6.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 104 - NOISE B1-7.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
NOISE B1-7.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1 . Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
NOISE B1-7.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
NOISE B1-7.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-7.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-7.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
NOISE B1-7.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 104 - NOISE B1-8.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
NOISE B1-8.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the Primary mitigation measure:
NOISE B1-8.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the primary mitigation measure:
NOISE B1-8.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the primary mitigation measure: NOISE B1-8.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
CR B1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
CR B1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

* 104 - CR C1.

MITIGATION QUANTIFICATION

PRIMARY MITIGATION MEASURE:
CR C1.

"CURE WORSE THAN THE DISEASE"

This Mitigation Measure is of the wrong type, inadequate, not fully enforceable and causes its own potentially significant environmental impacts.

BACK-UP MITIGATION MEASURE:

A1. Please describe the "Back-up", Secondary or Reserve" Mitigation measure in case the primary mitigation measure fails.

A2. If there is no Back-up Mitigation Measure please state that clearly.

MITIGATION IMPACT REDUCTION

B1. Please state the Absolute Amount of impact reduction contributed by the
Primary mitigation measure:
CR C1.
using the same units of measure used to determine the impact.

B2. Please state the Absolute Amount of impact reduction contributed by the Secondary mitigation measure using the same units of measure used to determine the impact.

B3. Please state the impact reduction, in Percent, contributed by the
primary mitigation measure:
CR C1.
using the same units of measure used to determine the impact.

B4. Please state the impact reduction, in Percent, contributed by the secondary mitigation measure using the same units of measure used to determine the impact.

TRACK RECORD EXAMPLE

C1. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the
primary mitigation measure: CR C1.

C2. Please cite at least one real world example of successful implementation of an identical or reasonably identical example for the back-up mitigation measure.

This would be an example that is in place and has been self-sustaining for a minimum of 5 years; Include clear descriptions of mitigation measures, how long the mitigation measure has been operating, where in the process the mitigation is now, and what percentage of mitigation has been successful, and how successful is

defined.

C3. If there are no successful examples for the primary measure - please identify the proposed mitigation measure as speculative or experimental.

C4. If there are no successful examples for the secondary measure - please identify the proposed mitigation measure as speculative or experimental.

D1. TRACK RECORD STUDY

Please provide a survey reporting the number of times this primary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
CR C1.

D2. Please provide a survey reporting the number of times this secondary mitigation measure has been attempted, and the ratio of successful vs unsuccessful implementations. If no such study is available - please identify as speculative or experimental the proposed mitigation measure:
CR C1.

NEW LEVEL IF SUCCESSFUL

E1. Please state the new total number if the proposed primary mitigation measure is successful.

E2. Please state the new total number if the proposed secondary mitigation measure is successful.

E3. Please state the total change, in PERCENT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E4. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E5. Please state the total change, in PERCENT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E6. Please state whether this total maximum change percent is an average amount, a worst case expected or a best case expected.

E7. Please state the degree, in ABSOLUTE AMOUNT, to which the primary mitigation measure would raise or lower the maximum impact amounts.

E8. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

E9. Please state the degree, in ABSOLUTE AMOUNT, to which the secondary mitigation measure would raise or lower the maximum impact amounts.

E10. Please state whether this total maximum change amount is an average amount, a worst case expected or a best case expected.

F1. Please state the deadline when this primary Mitigation Measure must be completed.

F2. Please state the deadline when this secondary Mitigation Measure must be completed.

G. MONITORING

Unfortunately most mitigation measures are inadequate or fail or both. "The U.S. EPA studied 1200 Environmental Assessments and FONSI's and estimated that 70% of

them contained either inadequate mitigation measures or no mitigation measures.

So the public can determine the probability of the ability of the Agency to enforce the mitigation measures -

G1. Please explain clearly how the primary mitigation measure will be monitored.

G2. Please explain clearly how the secondary mitigation measure will be monitored.

G3. Please explain clearly what date-certain deadlines will be used to determine whether this primary mitigation measure has failed.

G4. Please explain clearly what specific performance criteria will be used to determine whether this primary mitigation measure has failed by the deadlines listed above.

G5. Please explain clearly what date-certain deadlines will be used to determine whether this secondary mitigation measure has failed.

G6. Please explain clearly what specific performance criteria will be used to determine whether this secondary mitigation measure has failed by the deadlines listed above.

G7. Please explain clearly which other specific criteria will be used to determine whether the primary mitigation measure has failed.

G8. Please explain clearly which other specific criteria will be used to determine whether the secondary mitigation measure has failed.

G9. Please explain clearly how much money will be needed to adequately monitor these mitigations.

G10. Please explain the source and the quantify the certainty of the money needed to adequately monitor these mitigations.

H1. Please explain clearly how this primary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

H2. Please explain clearly how this secondary mitigation measure will be protected from impacts of future projects and all non-discretionary activities.

MONITORING FREQUENCY

I1. Please describe carefully how often this primary mitigation measure will be monitored.

I2. Please describe carefully how often this secondary mitigation measure will be monitored.

J1. Please describe clearly how long the primary mitigation should last.

J2. Please describe clearly how long the secondary mitigation should last.

AGENCY ENFORCEMENT

K1. Please list all agencies who will enforce the primary mitigation measure.

K2. Please list all agencies who will enforce the secondary mitigation measure.

One of California's few examples of a fully enforceable legal violation is a parking ticket. If the ticket is not paid, ultimately a vehicle's registration will not be renewed.

L1. Please explain clearly how the primary mitigation measure will be fully enforced.

L2. Please explain clearly how the secondary mitigation measure will be fully enforced.

M1. Please explain clearly how long it takes each agency listed above to issue a stop order after a valid complaint is filed.

M2. Please give a specific example of a real complaint that resulted in a stop work order for failure to comply with a mitigation measure for each agency.

MITIGATION LOCATION

N1. Please describe the exact physical location(s) for the proposed primary mitigation.

N2. Please describe the exact physical location(s) for the proposed secondary mitigation.

MITIGATION IMPACTS

Mitigation measures normally create their own impacts.

O1. Please list all potential impacts from the primary mitigation measure

O2. Please quantify all potential environmental impacts from the primary mitigation measure.

O3. Please qualify all potential impacts from the primary mitigation measure.

P1. Please list all potential impacts from the secondary mitigation measure

P2. Please quantify all potential environmental impacts from the secondary mitigation measure.

P3. Please qualify all potential impacts from the secondary mitigation measure.

EXPERT QUALIFICATIONS

Q1. Please name each expert who prepared and reviewed the primary mitigation measure.

Q2. Please name each expert who prepared and reviewed the secondary mitigation measure.

Q3. Please cite each expert's training, competence and experience specific to the primary mitigation measure.

Q4. Please cite each expert's training, competence and experience specific to the secondary mitigation measure.

R. What will it cost, in time and money, to replace the loss from the impact?

CITIZEN ENFORCEMENT

CEQA requires that Mitigation Measures and Conditions of Approval be "Fully enforceable." CEQA Section 21081.6

A. Please identify the names of all Agency documents which track mitigation measures. If no such documents exist, please state that clearly.

B. For each agency charged with mitigation monitoring, please describe the complaint steps for citizens.

C. Please describe the yearly budget for each agency provided to enforce mitigation monitoring.

D. Please describe how many full time and part time staff in each agency enforce mitigation monitoring. Do not include administrative staff.

E. Please describe the number and nature of complaints each agency has had in the past ten years for failure to enforce mitigation.

F. Please list all legal remedies for citizen complaints about any mitigation failure or implementation.

G. If there are no legal remedies for citizens complaints - please clearly state there are no legal remedies.

Please put us on your list of "Interested Parties" so we get all notices of the project (if for no other reason than we ask under authority of CEQA Sections: 21092.(b)(3) and 21092.2)

With all due Respect,
-David Dilworth, Executive Director

Definitions:

CEQA requires Consultation under several circumstances specifically Sections 21080.1, 21104, 21153, and 21092.4(a). We have observed many instances where the lead agency considered "consultation" to mean "We sent them a notice, but we don't know and we don't care if they read it."

Notice is information going in one direction only.
Consultation means information goes in two directions.
Notice means sending information.
Consultation means "We got some kind of written response."

Please carefully and clearly Define "Consultation" as you have used it to comply with CEQA requirements for this project.

Please remember:

NEPA 40 CFR 1503.4
"(a) An agency preparing a final environmental impact statement shall assess and consider comments both individually and collectively, and shall respond by one or more of the means listed below, stating its response in the final statement."

CEQA Guideline 15088. Evaluation of and Response to Comments

"(a) The Lead Agency shall evaluate comments on environmental issues received from persons who reviewed the draft EIR and shall prepare a written response. The Lead Agency shall respond to comments received during the noticed comment period and any extensions and may respond to late comments."

"(b) The written response shall describe the disposition of significant environmental issues raised (e.g., revisions to the proposed project to mitigate anticipated impacts or objections). In particular, the major environmental issues raised when the Lead Agency's position is at variance with recommendations and objections raised in the comments must be addressed in detail giving reasons why specific comments and suggestions were not accepted. There must be good faith, reasoned analysis in response. CONCLUSORY STATEMENTS UNSUPPORTED BY FACTUAL INFORMATION WILL NOT SUFFICE."

* A detailed response is required when a comment raises a specific issue.
Cleary v County of Stanislaus (1981) 118 CA3d 348

Founded in 1998, H.O.P.E. is a non-profit, tax deductible, public interest group protecting our Monterey Peninsula's natural land, air, and water ecosystems and public participation in government, using science, law, education, news alerts and advocacy.
Printed On 35% Post-Consumer Recovered Fiber.
