Before the Planning Commission in and for the County of Monterey, State of California

In the matter of the application of:
FERNANDO M. MORGANDINHYO & MARILYN M. TRS (PLN090006)

RESOLUTION NO. 10-030

Resolution by the Monterey County Planning Commission:

1) Categorically Exempt the project from environmental review pursuant to CEQA Guidelines Section 15301; and

2) Approving the Combined Development Permit consisting of an Administrative Permit and Design Approval to allow an addition to a single family dwelling within a Site Plan review district and Use Permit to allow development within the Carmel Valley Floodplain. Development consists of partial demolition, remodel, and addition to a single family dwelling to the main level, demolition of the existing 609 square foot second story and construction of a new 1,234 square foot second story, and the construction of a 536 square foot attached garage, a 351 square foot covered front porch, and a 759 square foot rear deck. Materials and colors to consist of stucco and wood painted brown and taupe for the walls, green clad windows and metal guardrails, and grey asphalt shingles. The project includes the replacement of the existing septic system and approximately 200 cubic yards of grading (less than 100 cubic yards of cut and less than 100 cubic yards of fill).

[PLN090006, Fernando and Marilyn Morgandinho, 35 Paso Hondo, Carmel Valley, Carmel Valley Master Plan area (APN: 189-111-014-000)]

The Morgandinho application (PLN090006) came on for public hearing before the Monterey County Planning Commission on October 27, 2010. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Planning Commission finds and decides as follows:

FINDINGS

1. FINDING: CONSISTENCY – The Project, as conditioned, is consistent with the applicable plans and policies which designate this area as appropriate for development.

EVIDENCE: a) During the course of review of this application, the project has been reviewed for consistency with the text, policies, and regulations in:
   - the Monterey County General Plan,
   - Greater Monterey Peninsula Area Plan,
No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and regulations in these documents.

b) The property is located at 35 Paso Hondo, Carmel Valley (Assessor’s Parcel Number 189-111-014-000), Carmel Valley Master Plan. The parcel is zoned “LDR/1-D-S-RAZ” (Low Density Residential, 1 acre per unit with Design Control, Site Plan Review, and Residential Allocation Zoning Overlays), which allows additions to single family dwellings. Therefore, the project is an allowed land use for this site.

c) The subject property is located within a Design Approval district. Therefore, the project requires a Design Approval for the proposed exterior modifications. Policy No. 26.1.32 (CV) of the Carmel Valley Master Plan requires that materials and colors used in construction be selected for compatibility with the structural system of the building and with the appearance of the building’s natural and man-made surroundings. The proposed project includes the use of stucco and horizontal wood siding painted taupe for the exterior walls, green wood clad windows, and grey/green color blended asphalt shingles for the roofing materials. The proposed design, materials, and colors for the proposed single family dwelling were found to be consistent with the Carmel Valley Master Plan Policy.

d) The subject property is located within a Site Plan Review district. Section 21.45.010 of Title 21 requires that all development applications within “S” Districts be strictly reviewed due to the potential of sensitive natural resources or unusual site constraints on the property. In this case, the subject property’s close proximity to the Carmel river. Therefore, structure additions within “S” Districts require approval of an Administrative Permit. Consistent with the requirements of Title 21, the application includes an Administrative Permit for the addition to the single family dwelling.

e) The project planner conducted a site inspection on September 16, 2010 to verify that the project on the subject parcel conforms to the plans listed above.

f) The subject property is located entirely within the 100-year floodplain of the Carmel River. Therefore, pursuant to Section 21.64.130.D.1.A of the Monterey County Zoning Ordinance (Title 21), the proposed project requires a Use Permit for development within the Carmel Valley Floodplain. The project was reviewed by the Water Resources Agency and was found to be consistent with Chapter 16.16 of the Monterey County Code, Regulations for Floodplains in Monterey County. In addition, conditions of approval have been incorporated as a requirement of floodplain development regulations. For further discussion, see Finding No. 3, Evidence c.

g) The Monterey Geographic Information System indicates that the subject property is located within an “Undetermined” seismic hazard zone and within 1/8th mile (600 feet) of a known fault. Therefore, consistent with Section 21.66.040.C.1.b of Title 21, the proposed project and existing...
conditions of the property were reviewed and investigated by a Geotechnical Engineer, Grice Engineering and Geology, Inc. No issues relative to seismic or soil hazards were identified. See Finding No. 3, Evidence d for further discussion.

h) The Monterey County Geographic Information System indicates that the property is located within a high archaeological sensitivity zone. Pursuant to the requirements of Section 21.66.050.C.1.a of Title 21, an archaeological report (see Finding No. 2, Evidence B) was submitted. The archaeological report concluded that no surface evidence of archaeological resources were found on site during field reconnaissance and that there were no previous reports indicating sites located on the property. Therefore, it is assumed that there is a low probability of cultural resources to be located onsite and the proposed development should not be delayed for archaeological reasons. However, as normal County practice, a standard condition of approval has been incorporated requiring the contractor to halt construction work if remains are accidentally uncovered.

i) The project was referred to the Carmel Valley Land Use Advisory Committee (LUAC) for review on October 18, 2010. Based on the LUAC Guidelines, not enough members of the committee were present to form a quorum. The project was not rescheduled for a subsequent LUAC meeting in order to meet the Permit Streamlining Act. Therefore, no official recommendation of the project was made to Planning Commission.

j) In an effort to limit water consumption, Section 18.50.050.B of the Monterey County Code requires that new construction include as part of the exterior landscape development, low water use or native drought-resistant plant material and low precipitation sprinkler heads, bubblers, drip irrigation system and timing devices. Therefore, as a condition of a discretionary permit and prior to the issuance of any grading or building permits, the applicant is required to submit a landscape plan for review and approval by the Director of the Planning Department in conformity with landscape guidelines adopted by the Board of Supervisors. However, in this particular case, existing landscaping, native grass and trees, exists on the subject property. The applicant proposes to keep what is existing; therefore, a landscaping condition of approval is not required.

k) The application, project plans, and related support materials submitted by the project applicant to the Monterey County RMA - Planning Department for the proposed development found in Project File PLN090006.

2. **FINDING:** SITE SUITABILITY – The site is physically suitable for the use proposed.

**EVIDENCE:**

a) The project has been reviewed for site suitability by the following departments and agencies: RMA - Planning Department, Carmel Valley Fire Protection District, Public Works, Environmental Health Bureau, and Water Resources Agency. There has been no indication from these departments/agencies that the site is not suitable for the proposed development. Conditions recommended have been incorporated.
b) Staff identified potential impacts to archaeological resources and soil and/or seismic hazards. Consistent with the requirements of the Monterey County Zoning Ordinance (Title 21), technical reports by outside consultants were required as part of the application. The Archaeological and Geotechnical reports by outside consultants indicated that there are no physical or environmental constraints that would indicate that the site is not suitable for the use proposed. County staff independently reviewed these reports and concurs with their conclusions. The following reports have been prepared:
- "Geotechnical Report" (LIB100264) prepared by Grice Engineering and Geology Inc, Salinas, CA, July 2010.

c) Staff conducted a site inspection on September 16, 2010 to verify that the site is suitable for this use.

d) The application, project plans, and related support materials submitted by the project applicant to the Monterey County RMA - Planning Department for the proposed development found in Project File PLN090006.

3. FINDING: HEALTH AND SAFETY - The establishment, maintenance, or operation of the project applied for will not under the circumstances of this particular case be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use, or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County.

EVIDENCE: a) The project was reviewed by the Carmel Valley Fire Protection District, Public Works, Environmental Health Bureau, and Water Resources Agency. The respective departments/agencies have recommended conditions, where appropriate, to ensure that the project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.

b) Necessary public facilities are available for the existing single family dwelling and will continue to be available post-project. A Monterey Peninsula Water Management District Water Calculation Form has been submitted by the applicant and no additional water use was identified, as the project does not include a net increase of water fixture units on the property. The existing septic system was installed in 1983 and the proposed additional bedroom requires that the system be upgraded. The project was not conditioned by the Environmental Health Bureau. However, as part of the project, the applicant requests to upgrade the septic system and install an additional “at grade bed system.” This was found to be acceptable to the Environmental Health Bureau as there is adequate room on the property for the system and for future repairs to the system.

c) The project was reviewed by the Water Resources Agency, and as proposed and conditioned, was found to be consistent with the Monterey County Code Chapter 16.16, Regulations for Floodplains in
Monterey County. Based on the FEMA (Federal Emergency Management Agency) Flood Insurance Rate Map 06053C-05330G, dated April 2, 2009, the subject property is located entirely within Zone AE, 100-year floodplain of the Carmel River. Section 16.16.050.C of the Monterey County Code requires that if substantial improvements are made to any structure within this zone, the lowest floor (including basements) shall be elevated to at least one foot above the base flood elevation. In this case, the BFE for the subject property is 261 feet (NAVD 1988). The applicant submitted a FEMA Elevation Certificate, as part of the application, certifying that the top of the bottom floor elevation for the building is 262.27 ft (NAVD 1998). In addition, the project has been condition by the Water Resources Agency requiring the applicant to: record notices on the property stating that the property is located within a floodplain and that wet flood proofed garage remain unfinished or constructed of flood resistant materials, and design all fully enclosed areas below the lowest floor and subject to flooding to automatically equalize hydrostatic flood forces on exterior walls by allowing for entry and exit of floodwaters. Furthermore, upon completion of construction of the structure addition, the elevation of the lowest floor shall be certified by a registered civil engineer or surveyor that elevation requirements have been met. Conditions of approval are incorporated and can be found within Exhibit 1.

d) The Monterey County Geographic Information System indicates that a known fault is located within 1/8th mile (600 feet) of the subject property. Furthermore, the seismic hazard zone for the area is undetermined. Therefore, as part of the application materials, the applicant was required to submit a Geotechnical report to address any issues related to existing soils conditions and/or seismic activity. The applicant submitted a Geotechnical report by Grice Engineering and Geology Inc. (see Finding No. 2, Evidence b). The closest local fault, the Tularcitos Fault, is located 0.19 miles southwest of the subject property. The fault is considered to be "potentially active" and is expected to produce seismic events. However, the fault is short and localized and the energy released will be considerably less significant than regional faults or Holocene Faults, such as the San Andreas Rift System. During the onsite geotechnical investigation, surface features indicative of a fault rupture occurring on the site were not found, nor did the existing improvements on the site reveal any strains attributed to subsurface lateral or vertical displacements caused by fault slips. The Geotechnical Engineer recommends that the proposed structures be designed and built in accordance with the California Building Code and no additional special recommendations were made. The report concludes that the native soils are acceptable for the proposed foundation and the soils' engineering properties are adequate for the

1 "Zone AE" means the flood insurance rate zone that corresponds to the one-percent annual chance floodplains. In most instances, whole-foot base flood elevations derived from the detailed hydraulic analyses are shown at selected intervals within this zone. (Section 16.16.020.MMM of the Monterey County Code)

2 Base Flood Elevation (BFE)" means the elevation shown on the Flood Insurance Rate Map for Zones AE, AH, and VE that indicates the water surface elevation resulting from a flood that has a one-percent chance of being equaled or exceeded in any given year.
anticipated soil pressures.

e) Preceding findings and supporting evidence for PLN090006.

4. FINDING: NO VIOLATIONS - The subject property is in compliance with all rules and regulations pertaining to zoning uses, subdivision, and any other applicable provisions of the County's zoning ordinance. No violations exist on the property.

EVIDENCE: 

a) Staff reviewed Monterey County RMA - Planning Department and Building Services Department records and is not aware of any violations existing on subject property.

b) Staff conducted a site inspection on September 16, 2010 and researched County records to assess if any violation exists on the subject property.

c) There are no known violations on the subject parcel.

d) The application, plans and supporting materials submitted by the project applicant to the Monterey County Planning Department for the proposed development are found in Project File PLN090006.

5. FINDING: CEQA (Exempt): - The project is categorically exempt from environmental review and no unusual circumstances were identified to exist for the proposed project.

EVIDENCE: 

a) California Environmental Quality Act (CEQA) Guidelines Section 15301, categorically exempts the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structure, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination.

b) Subsection (e) of the section states that additions to existing structures are categorically exempt provided that the addition will not result in an increase of more than 50% of the floor area of the structure before the addition, or 2,500 square feet, whichever is less. However, the section is not intended to be all-inclusive and a project can be categorically exempt if it involves negligible or no expansion of an existing use. For instance, although the proposed project includes a single family dwelling addition of 3,585 square feet which is larger than 50% of the existing floor area, the use structure will continue as a single family dwelling. Therefore, staff has determined that the project meets the requirements of this section.

c) The subject property is located within the 100-year floodplain of the Carmel Valley River. The project, as designed and conditioned, was found to be consistent with FEMA requirements and does not constitute the construction of structures in a hazardous location. For further discussion, see Finding No. 3, Evidence c.

d) The Tularcitos Fault, a local fault, is found to be 0.19 miles southwest of the subject property. The proposed project and existing conditions of the property were reviewed and investigated by a Geotechnical Engineer, Grice Engineering and Geology, Inc., and no issues relative to seismic or soil hazards were identified. See Finding No. 3, Evidence d for further discussion.

e) Section 15300.2 of the CEQA Guidelines list exceptions to the exemptions, were projects normally found to be exempt from CEQA
may require an environmental review. These exceptions include: project location, cumulative impact, significant effect, scenic highways, hazardous waste sites, or historical resources. The subject property is not located within an officially designated state scenic highway, it is not listed on the Cortese List (for hazardous materials sites) from the Department of Toxic Substances Control (DTSC), nor are there any historic resources located on the site. No environmental resource of hazardous or critical concern was found on the property and no unusual circumstance exists where the project will have a significant effect on the environment. Construction impacts will be temporary; however, the project as proposed and conditioned will not create a significant impact on the environment and cumulative impacts were not identified.

f) No adverse environmental effects were identified during staff review of the development application during a site visit on September 16, 2010.

g) See preceding and following findings and supporting evidence.

6. **FINDING:** APPEALABILITY - The decision on this project may be appealed to the Board of Supervisors.

**EVIDENCE:** Section 21.80.040.D Monterey County Zoning Ordinance (Board of Supervisors).
NOW, THEREFORE, based on the above findings and evidence, the Planning Commission does hereby:

A. Categorically Exempt the project from environmental review pursuant to CEQA Guidelines Section 15301; and
B. Approve the Combined Development Permit consisting of an Administrative Permit and Design Approval to allow an addition to a single family dwelling within a Site Plan review district and Use Permit to allow development within the Carmel Valley Floodplain. Development consists of partial demolition, remodel, and addition to a single family dwelling (a 703 square foot addition to the main level, demolition of the existing 609 square foot second story and construction of a new 1,234 square foot second story, and the construction of a 536 square foot attached garage, a 351 square foot covered front porch, and a 759 square foot rear deck). Materials and colors to consist of stucco and wood painted brown and taupe for the walls, green clad windows and metal guardrails, and grey asphalt shingles. The project includes the replacement of the existing septic system and approximately 200 cubic yards of grading (less than 100 cubic yards of cut and less than 100 cubic yards of fill), in general conformance with the attached sketch and subject to the conditions, both being attached hereto and incorporated herein by reference.

PASSED AND ADOPTED this 27th day of October, 2010 upon motion of Commissioner Vandevere, seconded by Commissioner Diehl, by the following vote:

AYES: Getzelman, Rochester, Padilla, Salazar, Diehl, Vandevere, Brown, Ottone
NOES: None.
ABSENT: Roberts
ABSTAIN: None.

COPY OF THIS DECISION MAILED TO APPLICANT ON OCT 28 2010

THIS APPLICATION IS APPEALABLE TO THE BOARD OF SUPERVISORS.

IF ANYONE WISHES TO APPEAL THIS DECISION, AN APPEAL FORM MUST BE COMPLETED AND SUBMITTED TO THE CLERK TO THE BOARD ALONG WITH THE APPROPRIATE FILING FEE ON OR BEFORE NOV 08 2010

This decision, if this is the final administrative decision, is subject to judicial review pursuant to California Code of Civil Procedure Sections 1094.5 and 1094.6. Any Petition for Writ of Mandate must be filed with the Court no later than the 90th day following the date on which this decision becomes final.
NOTES

1. You will need a building permit and must comply with the Monterey County Building Ordinance in every respect.

   Additionally, the Zoning Ordinance provides that no building permit shall be issued, nor any use conducted, otherwise than in accordance with the conditions and terms of the permit granted or until ten days after the mailing of notice of the granting of the permit by the appropriate authority, or after granting of the permit by the Board of Supervisors in the event of appeal.

   Do not start any construction or occupy any building until you have obtained the necessary permits and use clearances from the Monterey County Planning Department and Building Services Department office in Salinas.

2. This permit expires 3 years after the above date of granting thereof unless construction or use is started within this period.

Project Name: MORGADINHO FERNANDO M & MARILYN M TRS
File No: PLN090006
APNs: 189-111-014-000
Approved by: Planning Commission
Date: October 27, 2010
approved in accordance with County ordinances and land use regulations subject to the following terms and conditions. Any use or construction not in substantial conformance with the terms and conditions of this permit is a violation of County regulations and may result in modification or revocation of this permit and subsequent legal action. No use or construction other than that specified by this permit is allowed unless additional permits are approved by the appropriate authorities. (RMA-Planning Department)

2. **PD002 - NOTICE-PERMIT APPROVAL**
The applicant shall record a notice which states: "A permit (Resolution 10-030) was approved by the Planning Commission for Assessor's Parcel Number 189-111-014-000 on October 27, 2010. The permit was granted subject to 22 conditions of approval which run with the land. A copy of the permit is on file with the Monterey County RMA - Planning Department." (RMA-Planning Department)

Obtain appropriate form from the RMA-Planning Department.
Owner/Applicant
Prior to the issuance of grading and building permits or commencement of use.

3. **PD032(A) - PERMIT EXPIRATION**
The permit shall be granted for a time period of 3 years, to expire on October 27, 2013 unless use of the property or actual construction has begun within this period. (RMA - Planning Department)

The applicant shall complete the form and furnish proof of recordation of this notice to the RMA - Planning Department.
Owner/Applicant
As stated in the conditions of approval

4. **PD003(A) – CULTURAL RESOURCES – NEGATIVE ARCHAEOLOGICAL REPORT**
If, during the course of construction, cultural, archaeological, historical or paleontological resources are uncovered at the site (surface or subsurface resources) work shall be halted immediately within 50 meters (165 feet) of the find until a qualified professional archaeologist is contacted.

Stop work within 50 meters (165 feet) of uncovered resource and contact the Monterey County RMA - Planning Department and a qualified archaeologist immediately if cultural, archaeological, historical or paleontological resources are uncovered. When contacted, the

**19. FIRE011 - ADDRESSES FOR BUILDINGS**

All buildings shall be issued an address in accordance with Monterey County Ordinance No. 1241. Each occupancy, except accessory buildings, shall have its own permanently posted address. When multiple occupancies exist within a single building, each individual occupancy shall be separately identified by its own address. Letters, numbers and symbols for addresses shall be a minimum of 4-inch height, 1/2-inch stroke, contrasting with the background color of the sign, and shall be Arabic. The sign and numbers shall be reflective and made of a noncombustible material. Address signs shall be placed at each driveway entrance and at each driveway split. Address signs shall be and visible from both directions of travel along the road. In all cases, the address shall be posted at the beginning of construction and shall be maintained thereafter. Address signs along one-way roads shall be visible from both directions of travel. Where multiple addresses are required at a single driveway, they shall be mounted on a single sign. Where a roadway provides access solely to a single commercial occupancy, the address sign shall be placed at the nearest road intersection providing access to that site. Permanent address numbers shall be posted prior to requesting final clearance. *(Carmel Valley Fire Protection District)*

Applicant shall incorporate specification into design and enumerate as “Fire Dept. Notes” on plans.

Applicant or owner

Prior to issuance of building permit

Applicant shall schedule fire dept. clearance inspection
